

INDIANAN FLIGHT WILL BE BITTER

REPUBLICANS CONFIDENT WITH A STUBBORN PROPOSITION IN THE "HOOSIER STATE" IN VIEW OF THE COMING PRESIDENTIAL CAMPAIGN—FACTS RELATED.

(Journal Special Service.) Hartford, Conn., Feb. 9.—To the Editor of The Journal: Last week I attended the meeting of the Indiana Democratic Editorial Association at Indianapolis, and yesterday I was present at the meeting of the Blackfoot county central committee in this city. At these meetings there was a seriousness which showed a determination to present a united party this year.

The Republicans in Indiana will have the fight of their lives to retain the legislature. The gerrymander, or reapportionment, which gave them the legislature, has been declared unconstitutional by a Republican judge in Boone county. Judge Arntsen, who was speaker of the house of representatives in 1901. The unit for a representative district is 6,943 votes, and for a senatorial district, 13,886 votes. It is held that while these units cannot be adhered to with mathematical precision, they should be held to as nearly as practicable.

Unfair Laws. Many instances are given of the unfairness of the law, and in all such cases the objects of those who framed and enacted it are apparent. The general intention, of course, was to favor the Republican party. In addition to this, there was a purpose to favor certain individuals. For instance, Shelby county has an excess of 470, but this county has no representative. Bartholomew county has a deficiency of 385, and yet it has a special representative. Decatur county, with a deficiency of 1,365, has a special representative. Elkhart county has an excess of 1,444, though it is 1,444 below the official unit.

Complications are developing so rapidly in the Republican party in Indiana that thoughtful Republicans, well-balanced, clear-sighted men, privately express their alarm for the party's prospects and see nothing but defeat for the Republican ticket at the polls in the fall. The reasons for their conclusions are as follows:

1. The knocking out of the vicious apportionment law which now seems practically certain, will completely disconcert the Republican workers in the various districts. Besides the "stop thief" effect that the condemnation of the obnoxious law will have with all independent voters who will naturally desire to rebuke a party guilty of an act of wholesale larceny.

2. The practical certainty that Senator Fairbanks will be the nominee for vice-president will start at once a lively fight for his place in the senate, with Hemenway, Durbin and Charles L. Henry in a fierce scramble for the senatorial shoes of Fairbanks.

3. All Beveridge's friends will be filled with distrust and alarm over the men to be elected to the legislature, because men who will go to the assembly either for Hemenway, or Durbin, or Henry, will not be likely to contain much Beveridge enthusiasm under their hides. In other words, the enemies of Senator Beveridge will have an excellent opportunity to carry out their original intentions to "get rid of" the bright, alert, able and ambitious junior senator.

No matter how dead sure Beveridge may feel about the "good faith" of the machine leaders, it is as sure as fate that the wheelhorse of the Fairbanks machine will knife him when other political happenings will give them the necessary cover to perform the job when public attention is turned in another direction.

ALBERT TOZIER. VENEZUELAN ARBITRATION. (Journal Special Service.) The Hague, Feb. 13.—The Venezuelan arbitration tribunal convened today to consider the judgment in the case of the appeal of the blockading powers for preferential treatment. The sittings, it is expected, will continue until the middle of the coming week.

Remember the name—Doan's—and take no substitute.

FOES OF FRUITS; HOW TO KILL THEM

FRUIT FROM UNSPRAYED TREE SORTED INTO THREE GRADES. No. 1—Free from Scuf. No. 2—Slightly Scuffy. No. 3—Very Scuffy.

By Wilbur K. Newell, Horticultural Commissioner First District. The apple plant louse, or as they are commonly known, green lice or aphids. These lice do considerable damage at times, principally on nursery stock and young trees, but old bearing trees are by no means exempt. The insects appear with the foliage, and where they are at all numerous the leaves begin to curl and growth is checked in early summer. The aphids excrete a sweet, sticky fluid, called honey dew, in great abundance, and on this a black sooty fungus develops which chokes the leaves, causing them to become dry, turn brown, and sometimes to drop. Often the tips of the shoots are killed, though more frequently they are stunted, and the young tree makes no satisfactory growth, barely maintaining itself in many cases. On bearing trees the young fruit is checked in development, becomes sooty, crippled and never ripens properly. The best time to fight this pest is in the spring just as the foliage is coming out, when the insects are just hatching from the eggs that have wintered over; and the best spray to use at this time is the tobacco wash; later the quassa chips and whale oil soap spray should be used. With small

thoroughly. The only way in which any lasting good can be accomplished in this matter is by everyone interested taking hold and putting their own premises in good order and keeping them so, and then assisting in enforcing the law against those who will not do it voluntarily, by reporting such cases to the secretary's office. It is an impossibility under the present arrangement for the commissioner to personally visit and inspect every tree and vine, and see that they are properly sprayed; but if all citizens who have pride in seeing their city look neat and clean in this respect will help, it will be possible to accomplish great good, and I once more earnestly appeal to all such to give this matter their attention.

LARRY SULLIVAN BARRED BY BOTH

WESTWELLS NORTH END BOSS DROPPED BY THE MITCHELL AND SHUT OUT BY THE SIMON FRACTION AND IS POLITICALLY HOMELESS—GAMBLERS' SHERIFF FLAY.

In the struggle between the local Republican factions, Larry Sullivan appears to be like Topsy, whom nobody wanted. Each side is anxious to see him in the opposing camp, and his room is more desired than his company. His presence at the conclaves of the Mitchell leaders became so unwelcome that Jack Matthews is reported to have said to him: "If you will let me know each time that you are coming, I will give you \$30 to stay away." And when the rumor became current recently that Sullivan had gone over to the other faction, the Simon Republicans shouted with one voice: "Larry Sullivan is a dead one and we have no use for him. We won't have him in our camp."

The sigh of relief, heaved by the Mitchell followers, when Sullivan went over to the enemy, gave place to consternation when it was rumored a day or two ago that he had returned to his first allegiance, but the rumor has not yet received confirmation and hope is reviving in their breasts.

The Sign of the KK. There was a time when Larry Sullivan was one of the wheelhorses of the Republican party, and when his active aid in a campaign was as welcome as it is now unwelcome. He had a following in the north end which made him formidable. But Sullivan's political methods are not of a character to inspire trust and confidence among those with whom he allies himself. Time and again he has given them the "double cross" and even his followers have fared no better.

EASTERN OREGON MINES ACTIVE

MINERAL BELT OF GREAT EXTENT—DOZENS OF MINING PLANTS IN OPERATION AND DISTRICT FORGING RAPIDLY TO THE FRONT AS A PRODUCER.

(Journal Special Service.) Sumpter, Or., Feb. 13.—Few people have a correct idea of the richness of the eastern Oregon mineral belt. Instead of a few straggling and struggling prospect holes we have a district that has been thoroughly explored and proven to be continuous for more than 150 miles in length by some 60 miles in width. Upon the great mother lode system of veins which traverse the district from end to end is located properties in all stages of development too numerous to mention. Besides hundreds of mines, many of which have passed the prospect stage, we have properties equipped with machinery as follows: Cracker Oregon—Mill nearly completed; new hoist, 500 feet depth, and compressor plant. Carpenter Hill—Five stamp mill and one concentrator. Crown Point—Compressor plant. California—Seventy ton concentrator plant, leaching and roasting plant. Cyclone—Gasoline hoist and compressor plant. Dixie Meadows—One hundred ton concentrating mill; mine buildings and saw mill. Dixie Mine—New Kinkaid mill, operated by water power. Golconda—New hoist, 1,200 feet capacity; new boilers and tables; extended water ditch. Golden Wizard—One hundred ton stamp mill and tables in course of construction. I. X. L.—Battery of steam stamps and concentrators; also gasoline plant. Indiana Copper Company—Hoist 600 feet capacity; 40 horsepower boiler and everything complete. Jupiter Company (Prairie Diggings) hoist 500 feet capacity. Last Chance—New hoist, 700 feet capacity. Morning Mine—Five-foot Bryan roll mill and two concentrating tables. May Queen—New hoist, just completed. Midway—New hoist, 1,200 feet capacity; new sawmill and mine buildings. Maxwell—New bumper tables added to concentrating plant. North Pole—Forty stamps, 16 vanners, eight bumping tables, nine large percolating tanks, six agitating tanks, 2,500 feet of aerial tram. Psycho—Twenty stamp mill. Phoenix—Five-foot Bryan mill. Royal White—Three stamp mill. Snow Creek—Ten stamp mill and four concentrators. Virtue—Sinking plant capable of sinking 2,400 feet, and moving 20 stamp mill from Idaho. Victor—Six-drill compressor and power drills. Blue Bird—One ton roll plant in course of construction. Six drill air compressor in operation. Columbia—New electric power plant, partly completed; new water power ditch; 80 stamp mill and everything complete. Copperolis—Steam compressor plant, power drills. Colorado—New concentrators and re-sieving stamps. Balsley-Elkhorn—Sixteen drill compressors; water power plant, and stamp mill complete. Black Eagle—Twenty stamp mill, stamp plant; no concentrators. Belcher—Ten stamp mill just ordered. Bull of the Woods—New hoist installed. Alpine—Twenty stamp mill in course of construction.

THE VALUE OF CHARCOAL.

Few People Know How Useful it is in Preserving Health and Beauty. Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose. Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the system. Charcoal sweetens the breath after smoking, drinking, or after eating onions and other odorous vegetables. Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic. It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poison of catarrh. All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Absorbent Lozenges; they are composed of the finest powdered Willow charcoal and other harmless antiseptics in tablet form, or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey. The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and other benefits, and the beauty of it is that no possible harm can result from their continued use, but, on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal, says: "I advise Stuart's Absorbent Lozenges to all patients suffering from gas in stomach and bowels, and to clear the complexion and purify the breath, mouth and throat; I also believe the liver is greatly benefited by the daily use of them; they cost but twenty-five cents a box at drug stores, and although in some sense a patent preparation, yet I believe I get more and better charcoal in Stuart's Absorbent Lozenges than in any of the ordinary charcoal tablets."

"FOR ALL CATARRHAL COMPLAINTS"

Pe-ru-na is Most Excellent," Writes Congressman John L. Sheppard.

CONGRESSMAN JOHN L. SHEPPARD.

Congressman John L. Sheppard, Member of Congress from Texas, writes: "Gentlemen:—I have used Peru-na in my family and find it a most excellent remedy for all catarrhal complaints."—Congressman John L. Sheppard. There are two things that the whole medical profession agrees about concerning catarrh. The first is that catarrh is the most prevalent and omnipresent disease to which the people in the United States are subject. All classes of people have it. Those who stay in doors much and those who go outdoors much. Working classes have it and sedentary classes have it. The doctor finds catarrh to be his constant and ever-present foe. It complies upon nearly every disease he is called upon to treat. The second thing about catarrh on which all doctors agree, is that it is difficult to cure it. Local remedies may give relief but they fail to cure permanently. Sprays or snuffs amount to little or nothing except to give temporary relief. Catarrh is frequently located in internal organs which cannot be reached by any sort of local treatment. All this is known by every physician. To devise some systemic internal remedy which would reach catarrh at its source, to eradicate it permanently from the system—this has been the desire of the medical profession for a long time. Forty years ago Dr. Hartman confronted this problem. He believed then that he had solved it. He still believes he has solved it. He cures thousands of people annually. During all these years Peru-na has been the remedy upon which he has relied. It was at first a private prescription,

afterwards manufactured expressly for him in large quantities. This remedy, Peru-na, is now to be found in every drug store and nearly every home in the land. It is the only reliable internal remedy ever devised to cure any case of catarrh, however long the case may have been standing.

A Case of Nasal Catarrh of Five Years' Standing Cured by Peru-na. Hon. Rudolph M. Patterson, a well-known lawyer, of Chicago, Ill., writes: "I have been a sufferer from nasal catarrh for the past five years and at the earnest solicitation of a friend I tried Peru-na and am glad to say it has afforded a complete cure. It is with pleasure I recommend it to others."—Rudolph M. Patterson.

A course of Peru-na never fails to bring relief. There is no other remedy like Peru-na. Its cures are prompt and permanent.

Mr. Camillus Senna, 227 West 123rd street, New York, writes: "I have fully recovered from my catarrhal troubles. I suffered for three years with catarrh of the head, nose and throat. I tried all kinds of medicine without relief, but at last I have been cured by the wonderful remedy called Peru-na."

Hearing Lost by Catarrh—Restored by Peru-na. Mr. William Bauer, Burton, Texas, G. Ginner and Miller, writes: "Some years ago I lost the hearing in my left ear, and upon examination by a specialist, catarrh was decided to be the cause. I took a course of treatment and regained my hearing for a time but I soon lost it completely. I commenced to take Peru-na according to directions and have taken eight bottles in all, and my hearing is completely restored, and I shall sing the praises of Peru-na whenever an opportunity occurs."—Wm. Bauer.

If you do not derive prompt and satisfactory results from the use of Peru-na, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

dwells perhaps the youngest grand-mother in this state—Mrs. John W. George, a native of Portland, Or. Mrs. George is 35 years old, and is the daughter of the late Alonzo L. Tosier. Her mother lives within a block of two daughters, five grandchildren and one great-grandson. The grandmother, Mrs. Jennie Tosier; her daughter, Mrs. John W. George; the latter's daughter, Mrs. Fred Smith, and the latter's son, Leonard Smith, are frequently together, and all have a good word for Portland, Or., and propose visiting Portland next year.
