EFFORTS OF PORTLAND CONCERNS TO GORBLE UP ALL THE BUTTER FAT CAUSE OUTSIDERS TO GET TOGETHER - EGGS ARE LOWER

Front street, Feb. 26.—The principal items of attrest in the Portland wholesale markets tolay are: Rates against wheat shipments.

Starch is higher. starch is higher. Eggs tumbling again. Farmers holding wheat tighter. Much flour is selling. Hop market very dull. Creamery butter looks lower. Veal market not so firm. Can't explain poultry scarcity. Arbuckle coffee is higher, Bastern lard is higher. Smelt is scarcer again. Potatoes are selling.

Creamery Butter Looks Lower.

The creamery butter market along Front street has shown several declines during the past month and still the market is in an unsettled condition with the tendency toward a lower mark. Some of the city creameries have been trying to boost up their prices on their better grades in an endeavor to unload their second-class stocks, but this has proven unavailing. The large receipts of outside creamery butter during the past few weeks and the high figures which have prevailed for the local stocks has been the principal cause of the weakness here. The better grades of outside creamery butter can easily be bought and sold in this market at 274cc per pound, as the goods are of as good quality as the local stocks they are selling while the home article remains inactive and accumulating.

War Ameng the Creameries. Creamery Butter Looks Lower.

War Among the Creameries. Despite the fact that the Hazlewood creamery has denied that there is any war among the creamery men on account of the high figurer being paid by some of the butter men for fat, the fact remains that the outside creamery men are out with their little hatchets for the local men and have subscribed to a fund simply for the purpose of meeting the inventor of the local men and have subscribed to a fund simply for the purpose of meeting the inroads of the large concerns. The country creamery men make the argument that the butter men in this city cannot make as sweet a grade of stock as those institutions near to the base of supplies and they are just as able to get as good prices as the local men are. They say that the prices quoted by the local firms are quite confusing inasmuch as they deliver the goods free to the retailers and then take back all stale butter to be sold as off-grade. back all stale butter to be sold as off-grade. This, they say, forms a majority of the butter manufactured as the big creameries are therefore not getting any more for their product than the country men are. The fact that the city creameries are paying at least ic advance for butter fat over what the market should be is evidence enough for the country men to know that the city people are making war upon them—hence the raising of a fund to

of the more prominent makes.

Bmeit is Scarcer.

The weather conditions are unfavorable for large catches of smelt and receipts in this market today were very small. No changes were made in prices, but a continuance of present conditions will cause an advance. Hallbut is now entirely out of the market on account of the stormy weather and the inability of the fishermen to go out. The scarcity in the salmon market continues. the salmon market continues.

Potatoes Selling Again. The receipts in the potato market are growing larger on account of the higher figures. The San Francisco market market has been very high during the past week, but this has proved of no advantage to the local shippers because they could not get the goods into the bay city market.

Doings in Onions.

Doings in Onions.

The onion market continues its stiff condition with a few purchases being made out in the country at top figures. The outlook for good prices in onions is more favorable than ever. All the coast markets except this is very short

city creameries are paying at least 1c advance for butter fat over what the market should be is evidence enough for the country men to know that the city people are making war upon them—hence the raising of a fund to fight the encroachments of the trust.

Butter Will Surely Drop.

Unless there is radical change in the butter situation in this city during the next week or to there is sure to be a decline in values, for the creamery men cannot afford to let their stocks accumulate simply so as to pay the farmer a high price for butter fat. This is the time of the year when butter is always weak and weather conditions now point to the usual course—a decline in values. The very best butter can be purchased today at 30.

Per pound and the retailers say they would be foolish to pay some one cless 32½c. The recipits of country store and dairy grades are far beyond the demand and an accumulation of stocks is the result.

Rates Against Wheat Shipments.

The fact that railroad rates are so high between this city and the east is just what is keeping the local farmers from deriving a benefit from the high figures now ruling in all of the eastern centers. Arbuckle Follows Lion.

The manufacturers of Arbuckle coffee have notified the trade of a decline of 50c per hundred in the former lists, making the new quotations \$13.25, the same as that on Lion brand. The New York coffee market was weaker and lower yesterday.

Eastern Lard Is Higher.

The Armour Packing company has made an advance of ½c in the lists of eastern lard of both the steam and kettle-rendered grades. The same change was made by the local lard manufacturers yesterday.

TERDAY THE BASIER TONE TO-

(Furnished by Overbeck, Starr & Cooks Co.)
Chicago, Feb. 26.—Logan & Bryan advise:
In wheat the greatest weakness is in May.
After the general buying of yesterday the
easier tone was a disappointment and brought
a good deal of liquidation. The market
railied sharply from an opening weakness but
there was less force to the outside buying and
profit-taking enough to cause the above decline.
There is no change in the political situation
but the markets everywhere seem to be getting used to it and there is less uneasiness apparently as to what may happen. Primary recelpts are running in excess of last year and
offers are increasing. We are inclined to think
there will be two sides to the market unless
something very important develops in the political situation.

Corn Was Irregular. Furnished by Overbeck, Starr & Cooke Co.)

Corn Was Irregular. The corn market was irregular and seemed to have the support of pretty good local buying on the week spots. The conditions in corn are much the same as they are in wheat. The

are much the same as they are in wheat. The cash situation is not a good one, inasmuch as stocks are accumulating and there is a poor demand for corn and all grades are selling at a large discount. The Armour interest, however seems to be in it.

Commission Houses Buy Oats.

In cats there was a large trade through commission houses, but nothing indicative of short interest. While the break today was not great yet the general action of the market has not been encouraging to the bears. The cash situation was a steady one and stocks of contract cats are supposed to be increasing quite rapidly.

Provisions Were Active.

Provisions Were Active.

Provisions closed very active with general outside trade good. There was a great deal of liquidation on the hard spots, but there was enough outside buying to offset the selling. To many people the action of the provision market is peculiar to say the least, owing to the fact that the packing house interests are arrayed on the short side and still the price advances. These people do not take into consideration the fact that the south has had high priced cotton and the "colored brother" likes his pork. There is an enormous outside long interest and it is being added to daily. However, we are not inclined to buy provisions at this level and should there be anything but war news of the most favorable kind for the holder of long stuff we would have a most decided set back. Take profits ou long pork, as it seems likely you will be able to replace cheaper without much difficulty.

## **BROKERS' OPINIONS** ON NEW YORK STOCKS

(Furnished by Overbeck, Starr & Cooke Co.) Walker Bros., New York—Some of the houses representing large financial interests are doing little or nothing and the stock market is essentially a traders' market. Everyone is waiting for something to turn up to give a trend one way or the other. The market closed week

# day. LA GRANDE CREAMERY CO., 264 Yambill Street. **UNLOADING WAITS** ON DRY WEATHER

On account of the rain the work of discharging cargo from the British bark Thistlebank has not yet been started. The freight consists largely of cement, and it can be handled only in dry weather. As a consequence it is feared that some little time will clapse

before the cargo is discharged. Harbormaster Ben Biglin says that he has notified the captain to place a net underneath the gangplank, but as NOW SEEMS LIKELY net underneath the gangplank, but as with. If it is not attended to by to-morrow he says the probabilities are that the commander of the vessel will be forced to do so or go to jail. Mr. Biglin states that he is going to see that the city ordinance bearing upon this subject is enforced.

## LONE BURGLAR HAS **MUCH HARD WORK**

Successful in one attempt, but baffled in two others, a lone burglar is being searched for by the police. The successful attempt was made at 388 Water street, where the robber is said to have stolen a gold watch early yesterday morning.
The thief broke into the Water street

house by smashing the lock on the front door. A gold watch is all that was reported missing.

The thief is next supposed to have gone to the Depot saloon, where an at-5.55 gone to the Depot saloon, where an at-5.85 tempt was made yesterday morning to 5.95 break in the rear door, but the 4hief was frightened away before he gained

an entrance.

The same man is believed by the po the foot of Mill street. The scow was broken into, but the occupant scared for our PRICE CUTTING him away.
The police are of the opinion that for March. the three orines were committed by the same man, who is described by the scow's occupants as a short negro.
