La Fontaine began to receive wheat yesterday at the Oceanic dock, but on account of the shortage of grain she will be unable to continue loading operations steadily. The bark Marechal de Turenne is also taking wheat at the

Montgomery dock.

The French captains are very much interested in the war that is now in progress in the Orient. They are prominent pro-Russians, and believe in the course of time the Japs will be completely subjugated. Asked why he favored the Russians, Captain Haumon, commander of La Fontaine, said:

"I am in favor of them because they are white. If the Japs or Chinese were fighting the Americans my sympathies would be with the latter. Were the matter brought close to home there would be a different sentiment in this country. Suppose the whites were fighting against the blacks in the United States. It is natural to suppose that every white man in the country would color win, whether his individual inter-

ests were directly involved or not. That is the way I feel about the war that is now in progress. The Russians belong to the same race as myself, and that is the reason I sympathize with them. I think they are more capable company.
