WEATHER REPORT.

Weather conditions and general forecast for Oregon, Washington and Idaho—During the last 24 hours light rain has fallen in western Oregon, Washington, northern Idaho and along the California coast. Good rains are also reported in Missouri, Iowa and Hiltons.

It is much colder this morning in Arizona, New Mexico, Colorado, Kansas, Nebraska and the Canadian northwest. In the latter section the temperatures are from 4 to 16 degrees below zero, which is unusually cold for this season of the year.

The indications are for partly cloudy weather with showers in this district tonight and Wednesday.

Maximum temperature in the last 24 hours, 42; minimum, 36; precipitation, .82. MARRIAGE LICENSES.

TRANSACTIONS IN THE FINANCIAL WORLD

PROVEMENT-LARGER SALES OF DAY-EGGS ARE HIGHER.

Front Street, March 22.—The principal items of interest in the Portland wholesale markets today are:
Hogs show good tone.
White lead is higher.

Eggs still ranging up.
Poultry market very firm.
Another car dressed poultry comes.
Potato altuation remains dull. Onions drag wearily, Hops are still inactive. Some valley wheat sell Flour is very dull.

supply for the demand.

Eggs Are Ranging Upward Again. The receipts in the egg market are quite liberal, but an excessive demand continues both from the city trade and from the north. One of the northern cities reserved telegraphed an offer of 17 cents for 1,000 cases of eggs.

an offer of 17 cents for 1,000 cases of eggs, but it had to be refused, as that amount could not be secured on the street. Today the price of eggs in round lots is quoted at 17 cents.

San Francisco Helps Butter.

The San Francisco butter market is showing a temporary firmness and this makes the quotations about the same as those in this city. This condition makes the receipts from that city into this market smaller than they would otherwise be and enables the local brands to move better. The market is, however, very weak and is inclined to show an accumulation.

a temporary firmness and this makes the quotations about the same as those in this city. This condition makes the receipts from that city into this market smaller than they would otherwise be and enables the local brands to move better. The market is, however, very weak and is inclined to show an accumulation.

Why the Price Is Kept Up.

The fight between the various creamery and condensed milk plants for cream is what is leausing the price of butter to show such a high figure in this city. The butter manuacturers are forced to pay such a price for their material that they cannot afford to sell at lower rates. This condition is very likely to be even worse than it is now, for the condensels of flarge size have lately begun operations. As matters now stand the creamery men ciaim that they cannot aftered to get the condensels of flarge size have lately begun operations. As matters now stand the creamery men ciaim that they cannot secure half enough material to run their institutions. Prices of butter remain unchanged.

As matters now stand the creamery men ciaim that they cannot secure half enough material to run their institutions. Prices of butter remain unchanged.

Valley Wheat Is Selling. During the past few days there has been about 30,000 bushels of valley wheat sold. These transactions were made at figures about 1 cent over the quotations ruling here. The other grades of wheat are very dull and without the small sales of valley there would have been no business at all.

Flour Market Very Dull. Flour Market Very Dull.

At present the flour market is a very small one and business is only nominal. The Orient is not in the market at all and the local consumption is not over large. Some of the jobbersthink that if the bakers' strike continues for some time it will cause a further break in the market. There is but little inquiry for flour from the retailers. In exceptional cases lower prices are ruling.

Poultry Market Is Firm. The receipts of poultry remain much under the demand and the highest prices on the list are ruling teday. The receipts today consisted mostly of hens, but the demand has taken a sudden switch and now calls for young springs. Former prices are ruling.

Merchants' Opinions on Today's Market.

W. T. Turner & Co.-Egg and poultry markets are active.
Mark Levy & Co.—Vegetables which arrived on the last steamer are fairly well cleaned up; car celery arrived last night; oranges are pretty well cleaned up; good apples are

Chatterton & Co.—Eggs are selling readily at market prices; local demand for potatoes very good; weal of fancy quality is in demand; also block hogs; chickens very scarce. Levy & Splegi.—Car mixed vegetables came

in today.

G. S. Smith Co.—Oranges are showing a larger outward movement; eggs are scarce and high; chickens not coming fast enough; fresh meats are wanted.

Malarker & Co.—No smelt in market; plenty of salmon and halibut; Shoalwater bay oysters still out of market.

Smith Bros.—The demand for hogs has sud-

potatoes or onious; if anything the markets show less encouragement.

Page & Son.—Eggs are being held pretty stiff with the receipts much smaller than the demand; prices look up; no change in creamery butter; poultry scarce and market is stronger; demand now for springs.

McKinley Mitchell.—Potatoes and onlous continue dull; nothing doing at all in hogs.

Toft. Hine Co.—No especial change in our lines during the past few days; chickens are wanted and eggs are firm.

Eastern Poultry Arrives. A car of eastern poultry arrived in late yesterday and is being placed on the market today. The demand is great, but as poultry is scarce this season in the east as well as in the west, the shippers did not make any large sur-

Fruits and Vegetables.

Flour is very dull.

Business Shows an Improvement.

There was considerable improvement in the tone of the business in the Front street markets today. The arrest showed a liveller tone than for some time previous and it new looks as if the weather will bring still further improvements. Fruit of all kinds shows a larger sale. Oranges especially are now selling well. The supply of the best grade of apples is about exhausted and prices are booming.

White Laad is Righer.

According to the Northwest Paint & Oil company the price of white lead shows an advance. The new ruling priets are: Ton lots, 6%c; 500 lb. lots, 7c; less lots, 7%c.

Dullness in Potatoes.

The potato situation for shipping is very dull with the dealers showing little inclination to buy. Some sales have lately been reported as high as 1 cent a pound for the very best grades, but-beyond this figure no sales are reported. The inquiry from Arisona. Texas, and Missouri river points is showing an improvement, but very little business as yet has been transacted in the latter territory. The freight fate is so heavy that it leaves the shippers here unable to compute. A better tone is expected in the California markets within the next few weeks. Locally the demand for potatoes is very good and usual quotations are prevailing.

Onions Retain Former Dullness.

best grades, but beyond this figure no sales are reported. The inquiry from Arizona, Texas, and Missouri river points is showing an improvement, but very little business as yet has been transacted in the latter territory. The freight rate is so heavy that it leaves the shippers here unable to compete. A better tone is expected in the California markets within the next few weeks. Locally the demand for potatoes is very good and usual quotations are prevailing.

Onions Retain Former Duliness.

The onion situation is dull as ever and stocks are fast decaying. This results in a large loss to the buyers who paid very high figures when the market was so strong about a month ago. There is very little demand for onlons from California on account of the poorness of stocks.

Oysters Remain Scarce.

The supply of cysters is just as scarce as ever and the only arrivals today were a small quantity of opened Olympias. Shoalwater bay oysters are now entirely out. The fish market shows a scarcity in Columbia river smelt. Halibut and salmon are in large enough supply for the demand.

Exercise Texas and the demand or onlons from Columbia river smelt. Halibut and salmon are in large enough supply for the demand.

Description of the poorness of stocks.

UNION PACIFIC SELLS HIGHER ON RUMORS

(Furnished by Overbeck, Starr & Cooke Co.)
New York, March 22.—The feature of interest today was the great advance in Union Pacific and Northern Sccurities. There was buying in both which took everything offered and seemed unsatisfied at the close. There was a tremendous trade in both. Various theories are advanced to explain this purpose. The consensus of them is that whatever the details may be, the reorganization of the Northern Securities must befavorable to the Union Pacific as they owned a -majority of the stock of the Northern Pacific at the time of the formation of the Northern Securities company, and possibly a majority of the Great Northern. This was the largest day in the stock exchange for the past six months.

NEW YORK SUMMARY.

New York, March 22 .- Dow, Jones & com-American stocks in London were steady, 1/2
American stocks in London were steady, 1/2
to 1/4 point above parity. Rock Island stockholders approve the bond issue of \$163,000,000.
Irish land loan in London is heavily oversubscribed. Rate cutting was both in the
northwest and on eastern roads. No truth in rumored cut in billets. Thirty-eight roads for
the second week of March show gross decrease
of 1.45 per cent. Pittsburg is bearish on steel
esrnings for the March quarter. No news from
the far east of authentic worth except the
rumored capture of Port Arthur. The demand
for Sterling and Paris exchange on London iswithin a small fraction of figure where the gold
exports will be profitable. Twelve industrials
declined .50 per cent; twenty roads declined .57
per cent.

AND SHEEP WEAKER

Portland Union Stockyards, March 22.—The receipts of livestock in the local yards consist of 90 hogs and 350 cattle. The hog market is stirring with prices showing an upward inclination. Cattle are slightly weaker and sheep very quiet. Buling official prices are:

Cattle—Best eastern Oregon steers, \$4.50; best valley steers, \$3.50@3.75; bedium steers, \$3.50@3.75; bedium steers, \$3.50@3.75; bedium steers, \$3.50@3.75; bedium steers, \$4.00@4.85.

Hogs—Best heavy, \$5.55@6.00; block, \$5.00; China fats, \$5.10@5.35; stockers and feeders, \$4.00@4.85.

Sheep—Best grain-fed wethers and lambs. \$4.00@4.85. Sheep—Best grain-fed wethers and lambs, \$4.50; mixed sheep, \$3.25@4.50; stockers and feeders, \$2.25@3.00.

EASTERN HOGS ARE HIGHER.

NEW YORK COTTON MARKET.

New York, March 22,-Cotton closed today as

PRICES IN THE CHICAGO WHEAT PIT WERE UNCHANGED TO %-CENT HIGHER-MARKET AN IR-REGULAR ONE ON SMALLER VOL-UME OF BUSINESS.

('00) 20000 W LIBIS 'ADRIGIONO SQ PROGRIMA)
Chicago, March 22.—Logan & Bryan say:
Wheat—Frices are unchanged to %c higher.
The market was irregular on a smaller volume
of business. On this strength the pit was disposed to buy wheat—and during the early part
of the day showed a great deal of strength,
but the close was weak with the early advance
lost. Good rains through the winter wheat belt
cast of the Missouri fiver. The general tone
of crop advices from the southwest is favorable.
We still think a good scalping market is a
very likely proposition for some time to come.
On general conditions as they are we see no
ourgency for its selling higher, and while it
may be a purchase for moderate profits on sharp
breaks, we are inclined to think it may be sold
on sharp railies.

Nothing New in Corn.

Provisions Close Irregular.

The provisions close was irregular but on the whole was without much change. Local hog receipts were less than expected and this with the early strength in grain gave a firm market during the morning. Outside buying was lighter, however, and the packing interests which bought yesterday seemed selling on the rallies. The whole tone and action were notably easy. Receipts of hogs at western markets were light, but there is nothing to indicate that it is more than temporary. Shipments were considerably in excess of a year ago.

REVIEW OF HOP MARKET.

The New York Producers' Price Current says:
The hop market continues in the same duil.
Its tiess condition as has characterized the trade
for the past seven weeks. There is scarcely
anything doing here, but nothing offering and
no indication of any weakness on the part of
holders. It is doubtful if any desirable hops
could be purchased any cheaper than inte full
asking prices, yet any attempt to realize would
necossitate concessions. Weather continues wintry, which curtails the consumption of beer and
brewers are not showing a particle of interest,
though considerable contracts are reported with
merchant growers on the coast for three to five
years at 15c. The only feature of interest on the
coast is the reported sais of 1,000 bales said to
be for export and stated to have been at 27c;
othegwise the market on the Pacific coast continues of the said to the particle coast continues quiet and holders generally firm in their views. Remaining stocks are certainly light and it is hoped that with the advent of warmer weather and an increased consumption of beer that brewers will be compelled to take on more

The Weekly Commercial News of San Fran-The Weekly Commercial News of San Francisco says:

While there is a continued lack of demand in the hop market there is little weakness in prices except in the case of new crop, for which buyers have slightly reduced their bids. Stocks in the east and on the coast are very light, and the market is a waiting one, brewers being poor buyers on account of cold weather, and holders awaiting a warmer period. The increase in the new acreage promises to be heavy. In this state, about 3,000 to 3,500 acres will be set out to the new plant, about 1,000 acres of which will be in the Sonoma district. There will be an increase of about 3,500 acres in Oregon and 2,500 to 3,500 acres in Washington. Frices on new crop in Washington range from 15c to 17c; in Oregon new business has been done at 15c; in California 19c to 20c is still the ruling rate.

FOREIGN CROP REPORT.

Broomhall's Liverpool Corn Trade News says:
United Kingdom—The weather of the past
week has been fluer and colder, but with occasional falls of snow. On the whole it has
been much more agreeable than the continuous
rains of the early part of January and February, and besides it has been much more
favorable for agriculture. On light lands in
the south of England farmers started drilling
seed as early as last Tuesday, and as the
wock progressed the work became almost general, and, on the whole, the seed bed appeared
to be satisfactory. On heavy soils seeding has
continued to be impossible and the sharp frosts
experienced the last night or two may cause
further delay. But few will grumble at this
delay if fine weather follows the frost, for the
improved condition of the land will amply make
amends for a little extra waiting. The smallness of the area under wheat in the United
Kingdom continues to attract attention and
we fascy that when the official figures are
published it will be found that the total is
sensationally small. There will certainly be a
reduction of 25 per cent, and possibly much
more.

Russia—Mail advices continue to mention very

we fancy that when the official figures are published it will be found that the total is sensationally small. There will certainly be a reduction of 25 per cent, and possibly much more.

Russia—Mail advices continue to mention very mild weather in the south, and the rivers are reopsaing to navigation. So far, the outlook for the crops would appear to have somewhat improved, but it is evident that if the mild period is followed by a sudden return of severe frost, the latter state would be worse than the first. The shipping movement is well maintained, but mainly at the expense of stocks; however, some arrivais are already coming down by barge and if the rivers keep free of ice, supplies by these routes will soon increase and do something toward replenishing the stock. Reports now have little to say about the war, and it does not appear likely that it will interfere actively with the export movement.

Roumania—After some rain, a good deal of snow fell last week, and the crops are now under cover. Spring seeding had been commenced, but of course the return of winter will have stopped the work. Exports fell off sharply last week and, although rather more grain is now arriving at the shipping ports, the quantities are still light.

Austria-Hungary—The weather last week was variable, and the temperature falling sharply towards the end, but the crops in many districts have still a good cover of snow.

Argentina—Our cables continue to report favorable of course of snow.

Argentina—Our cables continue to report favorable, and the temperature falling sharply towards the end, but the crops in many districts have still a good cover of snow.

Argentina—Our cables continue to report favorable, on the railway men's strike, which is said to be syreading, and threatens to cut off the arrivals at the ports, which in turn will affect the shipments. A telegram received today says that the efforts of the government to arrange a settlement of the strike have ended in failure, and business is paralyzed.

Australasia—Good rains have f

was done; generally speaking, however, crop conditions continue favorable. Spain—The weather continues rainy, and there are fears that the crops may suffer from exare fears that the crops may suffer from excessive moisture.
Germany—The weather has been changeable,
sharp freat having followed a mild period.
The crops have snow cover in some parts, but
others are bare—the weather is not, of course,
considered very favorable for the crops, but so
far there have been no serious complaints. Only
small quantities of native wheat are offered,
and buyers have, in consequence, made liberal
purchases of foreign sorts.
