THE OREGON DAILY JOURNAL, PORTLAND, TUESDAY EVENING, MARCH 22, 1904.

The steamer Alliance will arrive tonight and is scheduled to sail Thursday night on the return trip down the coast.

"We intend to make every possible effort to keep the Alliance running," said F. P. Baumgartner, local agent of the line, this morning. "She is not a steam schooner, and for that reason it is hardly probable that she will be tied up on account of the marine engineers' strike at San Francisco. The Bay City was omitted from her itinerary on this sibility trip in order to prevent any pos her becoming involved in the difficulty.

"If the engineers, however, should decide to walk ashore here we do not in-tend to put up a fight. The steamer will be quietly tied up, and that will be an end of the matter so far as we are concerned, until the difficulty is set-tled. It is true that the Allance is caught hold of a piling and managed to scramble ashore. owned by a member of the Steam Schooners' association, but that is no reason why she should be dragged into the fight. She carries three engineers bar at 8 a. m., rough; wind southeast; weather cloudy and squally. and they work only eight hours a day. The contention among the engineers on the steam schooners does not affect these men. They want \$1 an hour for Francisco. all overtime after working nine hours a day while a vessel is lying in port. On each vessel they have but two engineers. So it can be seen the conditions are entirely different. The men Alliance do not want to quit and if they do it will be because they are forced to do so.

"During the sailors' strike two years ago we managed to keep the Alliance running when almost every other gteamer on the coast was out of commission. For some reason the entire crew would rather work on her than almost any other vessel plying up and down the coast. The way we managed then was by cutting out San Francisco the same as is being done at the present time.

"So far as I know I do not think the Alliance will be tied up upon her ar-rival here. If all goes well she will go out on the return trip Thursday night."

The Liverpool Underwriters' association has issued its monthly returns of tives on the journey, three more about most material part of the new agreecasualties to vessels of over 500 tons gross register during February. From this it is seen that the total losses include three British sailers of 3,847 tons, three British steamers of 10,412 tons, six foreign sailers of 5,318 tons, and eight foreign steamers of 9,940 tons. The partial losses were: British, 26 sailers, and 225 steamers; foreign, 46 sailers and 191 steamers-a grand total of 20 losses and 488 partial losses. These figures are, generally speaking, lower than in the corresopndng period of last year, but higher than the figures for the same month, in 1902 and 1901.
