

BANER CITY WATER SHED RE SERVE NEEDS A MAN TO LOOK AFTER IT, BUT SALARY IS SMALL -SUMPTER WANTS PROTECTION FOR ITS WATER SUPPLY.

(Special Dispatch to The Journal.) Sumpter, Or., March 30 .- D, B. Shelle of Washington, forest superintendent, was here yesterday for the purpose of appointing a supervisor to take charge of the Baker City water-shed reserve, which was set aside by proclamation Februry 5, 1994, to reserve the purity of the source of Baker's water supply. Mr. Sheller solicited an application for the position from V. R. Mead of this city. but inasmuch as the office only pays \$75 per month, and the man in charge has to pay his own expenses, Mr. Mead declined to file an application for the place. The reserve in question em-braces 50,300 acres, and it would prob-ably consume the entire time of one man to keep it clear of stock.

Some time ago an application was made by the city council of Sumpter for a reserve to be set aside northeast of here and covering the head waters of Pole and Wind creeks, which furnish the city's water supply, and which becomes exceedingly foul during the sum-mer months on account of the stock being allowed to graze there. The re serve asked for takes in about 60,000 but no action has yet been taken by the government. Mr. Sheller's at tention was called to this application while here, and he agreed to take the matter up with City Attorney Richards in Baker, where he went yesterday on business.

The fact that the Baker reserve will no longer be available to stock will nave a tendency to drive sheep cattle over to the Sumpter water shed and pollute the waters more than eye This was impressed upon Mr before. Sheller, and he promised to take the matter up at once and do all in his power toward the attainment of the reerve.

### Gasoline Eoist Being Installed.

J. Frank Shelton, secretary of the Nell J. Sorensen company of this city, operating the Friday mine at Pearl, iaho, returned from the property yes terday, accompanied by Otto Herlocker, general manager of the Highland mine, the Rock Creek district, controlled by the same company. They stated that the foundation for the sinking plant to he installed at the Friday is now com pleted, and the machinery is nearly ali on the ground ready to be set up. The engine has 25 horse-power capacity, and is very complete in every respect. As soon as it is in place it is the purpose of the management to begin working in the double compartment shaft, which is now down below the 50-foot level. It is to be sent down another 100 feet, and be kept in condition for permanent op erations.

### Scanda Crossout.

General Manager Wade of the Scanda Tunnel company, operating near Alamo, returned from the property a few days ago, where he went with a new ventilashaft to replace the once which was broken a short time ago. He says that will be resumed as soon as the ary repairs could be made to ant. East Eighth st., North. necessary repairs could be made to the plant.

The face of the Scanda crosscut is now more than 2,700 feet from the por-tal, giving a vertical depth of about 1,000 feet. This is perhaps the longest in the district at the present time, un-less exceeded by the lower adit of the North Pole. This is a crosscut of 1.000 feet, and thence a drift, the latter being last summer more than 1,500 feet from the end of the crosscut. It may be
