

TOWN TOPICS

The members of the John Burroughs society and the Massama society will enjoy an early morning outing tomorrow morning. The Massama will camp out over night on Inspiration Knoll, with Mrs. Trevett as chaperon. The members of the club and their friends will meet this evening at 8 o'clock at Twenty-third and Washington streets. Each member of the party will have a picnic basket and food enough for two meals, blankets and other accessories. A wagon will convey the luggage from this point to the camping ground. The party will have supper at 6 o'clock, after which it will enjoy the sunset. The members of the Burroughs society and their friends will meet at 8:30 tomorrow morning at Tenth and Washington. Each will be provided with a lunch, a tin cup and field glasses. The party will set up a camp on Inspiration Knoll, where they will enjoy the sunrise and listen to the morning chorus of songbirds, ending their excursion with breakfast eaten around a camp fire. Some will return by the first car, others will enjoy a sleep until 10 o'clock, when a wagon will come for the luggage.

The Oregon Water Power Townsite company has bought the entire unincorporated portion of City View park, one of the most beautiful tracts of land in the state. This was formerly the race track, so popular in early days. It is located on the bank of the Willamette between two lines of electric cars, 15 minutes' ride from the business center, and is so high and slightly that it would be most difficult to think of a more charming place for a home. This property will be offered for sale within a day or two, and will not doubt be picked up without much effort in the way of pushing sales. The Oregon Water Power Townsite company is one of the sober, substantial, reliable real estate concerns of Portland, never stooping to unmanly methods in its business. It handles only first class property, and all its transactions are on a lofty plane that gives character to its enterprises. City View park already has many desirable residences, and is provided with electric lights, telephone service and city water. It will not be long before steamboats will make that a landing point, also.

One could not spend Sunday to a better advantage than on a trip up the Columbia to the Cascades. If it is taken on the handsome, steamer "The Oregon," the trip will be the most to be enjoyed. The steamer is the most scenic and beautiful in America and offers Oregonians and eastern visitors a rare chance to see scenery the equal of which many thousands of people traveling abroad but do not see. The steamer is the most comfortable and extends all the comforts one might find at home. Nothing has been left undone that would improve the trend toward absolute perfection. Excellent meals are served on board, and tomorrow a restaurant will hold forth on the lower deck that those who wish may purchase edibles as their wants dictate. Steamer leaves Alder street wharf at 8:30 and returns to Portland about 6:30 p. m. Round trip \$1.00. Puller electric sign, Main 914.

"The Oregon Coast, from Portland to a Summer Paradise in Four Hours," is the title of a beautifully illustrated pamphlet just issued by the Astoria and Columbia River railroad. It is a profusely illustrated and contains a well-written and interesting story of the attractions of the coast of Oregon. The book is especially useful to portray the attractive features of Seaside, "where ocean breezes invigorate." A number of other beach resorts are also described in detail. The book will be of great value to anyone who is undecided as to where he will spend his vacation.

The smartest boat on the river is the Charles R. Spencer, and it runs through from Portland to the Dalles without change. The Spencer has never lost a trip on account of high water. It is not the kind that is disconcerted by a little extra flow of melting snow. Her berth is at the foot of Washington street, from whence she departs every Monday, Wednesday and Thursday morning at 7 o'clock. Take the best boat, the fastest boat and the newest boat that sails from Portland.

It was mistakenly said in Paul Strain's great advertisement yesterday that the Colorado Clothing company did a business of \$5,000,000 per year. Mr. Strain wrote \$500,000 per year, which is a whole lot of business in itself, anyway. The Hub today was the liveliest spot on earth, all because of the Colorado company's stock being sold off by Mr. Strain at a quarter to a half of its original cost.

A special excursion rate of 50 cents for round trip will be given over the O. W. F. R. Co.'s line on Tuesday, June 21, on account of auction sale of

Bread and butter served with every course. Tuesday's menu published Monday.

THE CASINO GARDEN

A New Resort That Will Be Opened by the Royal Italian Band.

This Evening.

The Casino Garden, Yamhill street, between Third and Fourth, next to Wells-Fargo & Co., will be opened to the public this evening by the Royal Italian Band. It is said of this garden that it will be conducted as a first-class family resort, no improprieties at all being tolerated at any time. The interior of the place is beautifully fitted up, splendidly lighted by large electric lights, and has a stage suitable for a really first-class theatre. The entrance is on Yamhill street, where the pretty front has attracted great attention since it began to assume the neat appearance it now presents.

Stage performance of high character will be presented each night so that attractions at the Casino will not be lacking at any time. Its doors will be opened at 7:30 o'clock tonight.

In case of rain the garden will not be opened until Sunday evening.

Officers on the river boat Sarah Dixon report that the logging camps in the vicinity of Clatskanie are now busier than they have been for many months, and that the new season is starting nearly every week. For a long time during the past few months the camps presented a somewhat deserted appearance. It was feared by many of the timbermen that the trouble between the sawmill companies and the lumber mills would have an effect of closing down many of the camps for the summer. But owing to the unusual activity that has been displayed in the schooner coasting trade, but causing only a temporary interruption, the camps have been open with renewed energy. On the last trip of the Sarah Dixon out of Portland

The United States hydrographic office has issued the following bulletins that are of interest to Pacific coast mariners:

California—San Diego—Middle-Ground Shoal—Dredged Channel—Commander V. L. Cottman, United States navy, commanding the United States steamer Wyoming, reports under date of May 20, 1904, that on May 14, on entering San Diego harbor, his vessel passed over the tail of the middle-ground shoal between beacon No. 2 and the buoy marking the northern end of the shoal. The least water obtained was 4 1/2 fathoms.

The commander was informed by the harbor-master that it is the intention to dredge a 500-foot channel through the tail of the middle ground with a least depth of 24 feet at mean low water. Two hundred feet of the west side of the channel have been completed. Work will be expected to be completed by the end of the month of 1904.

Mexico—West Coast—Topolobampo Entrance—Buoyage—The Mexican government has given notice, under date of May 9, 1904, that four buoys have been established at Topolobampo, west coast of Mexico, to mark the entrance and channel, as follows:

A fairway buoy, painted black and white in vertical stripes, six fathoms of water, to mark the middle of the channel.

Buoy No. 1, black, on the southern edge of Guadalupe bank, in five fathoms of water.

Buoy No. 2, red, near Copas bank, in seven fathoms of water.

Buoy No. 3, black, near Marvin bank, in five fathoms of water.

Directions: After picking up the fairway buoy, steer for buoy No. 2, which leaves to port, and from there steer for buoy No. 3, which also leaves to port; from there on follow the channel.

LOGGERS ARE BUSY.
