DIRECT SUPPLEVISION OF BOAD SUPERVISOR ARE GIVING BET-THE SATISFACTION THAN OLD METHOD OF PARMERS' WORK.

(Special Dispatch to The Journal.) Oregon City, June 23 .- Probably at no other time in the history of the county has work been done on the county ds to such an extent as is being done at the present time. This work is being paid for out of the county funds and is der the direct supervision of the road supervisor, and is giving better satisfaction than the old method of having the farmers work out the taxes on the roads. The effort of the county is to get a through road from Marion county to the Multnomah county line.

Following out this idea, the most of the work is being done on the New Era as to occupy the entire day, both fore-and Canby road, and the Clackamas noon and afternoon, as follows: er and Milwaukie road. Other roads the county are receiving attention, and County Judge T. F. Ryan said yes-terday that there were about 600 men employed in the county on road work. Part of these men are bridgemen, who are repairing bridges. The roads in Clackamas county have a bad name for being about the worst that can be found in the state in the winter time, but people, when they say this, forget that this county is very mountainous and it is hard to put in a good road at little ex-

One matter instituted by the county court that has come into disfavor among the farmers is the using of trac-tion engines for grading purposes. These ines, of which there are two, cost county about \$7 a day, and require out two men to operate—one on the en-gine and one on the grader. When the raders were hauled with horses it re-uired at least 10 horses, and this made bout seven men to each machine, and out the county some \$20 a day. The armer at that time who had a team of orses could get \$3 a day. Now if he rants work he must use a pick and hovel and gets but \$1.50. The engines of the work quicker and cheaper, and t is why they are used.

Gladstone Tennis Club. Gladstone, one mile north of Oreon City, on the north bank of the retty Clackamas river, there is a tenits club, and this sport is played at all vallable times. The club is called the word, and a good court has been made near the Gladstone station that is enced in and suitable netting provided that the balls will not have to be d around on the prairies when d. All the work on the grounds ione by the members of the club, and they are proud of the result. While all the other enthusiasts around Oregon City are playing croquet, the Gladstone its are playing croquet, the Gladstone-ites are learning the mysteries of "fif-teen, love." The members of the club are Henry Salisbury, C. H. Williams, C. A. Nash, John Gran, Charles Childs and

Would Not Give Up Purniture. When Elizabeth Matchett went to get er snare of the furniture from the ouse of George Avery, her former hus-and met her at the door. As a conse-sence there is being heard in the jus-ce court this morning a trial in which sabeth is charging assault and butry against George Avery June 7. June 1904, Judge T. A. McBride, in the reuit court for Clackamas county, diroed George and Elizabeth Avery and olded that Elizabeth Avery was rightowner of half of the furniture in

EXHIBIT OF OREGON ORES AT ST. LOUIS

(Special Dispatch to The Journal.) Baker City, Or., June 23.—A traveling man who has just come from St. Louis states that Oregon should be proud of the magnificent exhibit of ores of every St. Louis by Fred Mellis of Baker City. He says that while the exhibit covers very largely only samples from eastern Oregon mines, yet it is sufficient in its general scope to give the stranger an adequate idea of the class of minerals produced in eastern and southern Ore-

gon, Washington and Alaska. Eastern Oregon is the best represented sociable for the benefit of the Canemah state at the fair in minerals, and Mr. Mellis has by his hard work accomplished the exhibit that has thrown all the other states in the shade, including southern Oregon.

Mr. Mellis, as will be remembered, got out a special map and descriptive folder of Baker county and its mineral resources, of which about 50,000 copies were distributed last fall. Only a few of these ever found their way to the St. Moscow, Idaho, June 23.—It is esti-mated that over \$200,000 will be ex- demand for them, Mr. Mellis is making pended in Moscow this summer in new an effort to issue another 25,000 copies buildings and in construction of the of the maps and circulate them at the

WOOD INDUSTRY AT KAMELA AND MEACHAM

(Special Dispatch to The Journal.) Kamela, Or., June 23 .- T. J. Stubblefield and his brother George have put ion which is composed of men who have several teams at work hauling wood withdrawn from the Spokane Trades from the timber to the railroad station here. Prices paid for hauling range from \$1 to \$1.75 per cord, according to the distance.

day at this distance, bringing in a cord and a quarter each trip, making a total of \$5 per day per team. The expenses of keeping a team there amount to about \$1 a day.

A large amount of wood will be hauled this season, and many teams are now employed in the camps at Meacham and Kamela.

PACIFIC COLLEGE **CLOSING EXERCISES**

(Special Dispatch to The Journal.)

Newberg, Or., June 3.—The Pacific college closed its commencement exercises June 22. The class consisted of seven members, many of them being residents of Newberg. The annual address was delivered by Rev. F. Cliffe of Salem, and the class address by Marvin Blair. The past year has been a very successful one for the college, with a bright outlook for the coming year.

ENORMOUS GRAIN YIELD PREDICTED

O. B. & N. OPPICIAL AFTER TRAVEL-ING MORE THAN 1,500 MILES OVER OREGON, WASHINGTON AND IDAHO, ISSUES FLATTERING CROP

(Special Dispatch to The Journal.) Rosalia, Wash., June 23.—Oregon, Washington and Idaho will produce 69. 000,000 bushels of wheat this year, according to R. M. Hall of the O. R. & N. company. Mr. Hall, who is on his way to St. Louis, has just made a 1,500mile trip over the three states with a view to investigating and reporting upon the industrial conditions.

"Without exception," he declares, "the Pacific was never so prosperous and the outlook never so bright for an enormous tonnage for the railroads. Last year the total yield of wheat was a little over \$5,000,000 bushels, which at 70 cents per bushel represented a value of \$25,000,000.

The railroads and oriental steamship companies are making preparations to move a big crop this year, which will be largely handled through the Port of "Plans have been completed whereby

10-day service will be inaugurated this fall between Portland and the far east by the Portland & Asiatic Steamship company and the China Commercial combe exported. It also means that there will be few, if any, empty cars hauled wheat crop begins to move."
