No transfer between Portland and the Dalles if the trip is made on the Charles R. Spencer. This fleet steamer—fastest on the river—makes through trips, leaving Portland on Mondays, Wednesdays and Fridays at 7 a. m., from foot of Washington street. From the decks of the Spencer may be viewed the magnificent scenery that has made the Columbia famous throughout the world—the towering snow-capped mountains, cataracts as high as 800 feet, the celebrated Cascade locks, 18 years in building, most wonderful canyons, delightful valleys and charming groves. The beauty of the landscape are indeed beyond compare. Persons who have traveled the wide world over declare that the Columbia river surpasses that of any other section of the globe. The Spencer is the newest of all the river palaces, and her furnishings are not equaled on western waters. Her table service is unsurpassed.

Had it not been for several women who were present, George H. Richardson, a traveling salesman in the employ of the John Clark Baddley company, would have lost his life Sunday. He was looking about the place when he fell through a hole between two platforms. Three ribs were fractured in the fall, and there seems no doubt that he would have drowned but for the heroic work of the women who saw his peril and rescued him. After the rescue the women declined to give their names. Mr. Richardson was removed in a carriage to his home, 34 East Fifth street, where he was attended by a physician.

The mental and physical condition of Mrs. G. H. Gross, a poor woman who lives on the mountain above the city, was investigated yesterday afternoon by County Physician E. C. Geary and Health Officer Dudley Evans, and the woman will this afternoon be sent to the county hospital. It was found that she is afflicted with a disease of the kidneys, and will undergo an operation. Mrs. Gross was found to be sane, although she has "frightful" spells, doubtless the result of ill health and misfortune. The family is very poor. There are three children and the husband is a one-armed man who has difficulty in making a living.

Mrs. Margaret Magruder Wall, who came to Oregon City with her parents in 1844, and who removed to California in 1851, in which state she was married to Gen. Joseph H. Wall, in 1854. She recalls many of the families of those early days. Mrs. Wall, who lives in Alameda, Cal., is completing a two-months' tour of the east, in company with her son-in-law.

Conner O'Kelly, a member of the British parliament from Ireland, will be in the city in about a fortnight. At a meeting held last evening at the office of Dr. A. C. Smith, the following were appointed to arrange for the entertainment of Mr. O'Kelly: W. R. McHenry, J. W. Sweeney, Ed. J. Sharkey, G. M. Munir, A. C. Smith, T. Murphy, Dr. Govey, Wallace McManis, Dan McAllen and Joseph O'Connor. Mr. O'Kelly is touring the United States in the interests of the Irish Land League, an organization in favor of home rule in Ireland.

Let the boys enjoy their noisy fireworks, and you, to escape the racket, take a trip up the Columbia for a day's outing. The "Balley Gatzert" will, on July 4, run an excursion to Cascade Locks, offering a grand opportunity for a quiet and enjoyable day's outing. Boat leaves Alder street wharf at 8:30 a. m. Monday, July 4. Monday excursions. Round trip \$1.00. Fine meals aboard. Steamer "Balley Gatzert" will on Sunday make connections with steamer "Regulator" for points above the locks.

For the accommodation of the state troops and the militia, who will spend their annual encampment at American Lake, near Tacoma, the government will maintain a postal station for the distribution of mails. The station will be established at Murray, on the Northern Pacific, between Lakewood and Sherlock, Washington. Mail to the soldiers should be addressed to the Military Station, Tacoma, Camp Murray, American Lake Camp. The station will be installed at once.

At yesterday's session of the Norwegian Lutheran Evangelical Synod of the Pacific coast, held at First church, East Tenth and Grant streets, several congregations in Oregon, Washington and British Columbia were admitted to membership in the synod. The afternoon session was taken up by a discussion of the subject, "Confession." The declaration of the First church will take place on Sunday, when several prominent Norwegian ministers will deliver addresses.

The newboys of the city were entertained by the Portland Railway company at its park on Portland Heights last evening. A special car took them to the park, where seats for the band concert had been reserved for them. Ice cream was served. The boys will give a moonlight excursion July 16 on the steamer Charles R. Spencer, which has been donated for the occasion. The proceeds will go to the Newboys' association fund.

Better than breakfast foods—try a Coacchella "cantaloupe" or watermelon. "Mermaid brand" cantaloupes are finer than any and sweeter than honey. Paper rind and full of delicious meat. Car lots constantly on track. For sale by your grocer, Pearson-Pace company, distributors for Coacchella Valley Producers' association.

For hitting and striking Patrolman Croxford while under arrest Tuesday night, Henry Blaise, formerly of the French ship Du Quene, was this morning sentenced to serve a term of 20

days in the city jail by order of Municipal Judge Rogers. As previously notified, Blaise was cursing people on lower Third street, and Croxford was sent to arrest him. He ran, but was pursued and captured. He showed fight at Third and Ash streets and the officer was obliged to club him before he would submit.

A concert is to be given this evening on board the monitor Wyoming, under the auspices of the Seaman's Institute. An excellent program has been arranged in which the men of the squadron will participate. A limited number of tickets can be had on application to Mr. Powell at 150 Front street, or at the Seaman's Institute.

The closing session of the Willamette Baptist association was held last evening in Gresham, where Rev. Ray Palmer delivered a sermon on "The Seven Golden Aims of Local Option." The next meeting of the association will be held in June, 1905, at Hillsboro, when Rev. L. A. Nutley will act as moderator and Rev. M. M. Bledsoe as clerk.

By a mistake on the part of the officials of the Sellwood public school, Charles Larson and Liza Richards were arrested in connection with the breaking up of the graduation exercises of the school Monday night. Their cases were dismissed by Deputy City Attorney Fitzgerald.

A gallon of white Bay State paint weighs 14 1/2 pounds and contains 231 cubic inches of paint. The biggest gallon of paint that can be made. The shades are every bit as good as the white. Fisher, Thorsen & Co., corner Front and Morrison.

Going to get married? The best way to answer is by bringing your invitations to us for execution. We'll do them, leaving nothing to be desired. Egan's Bros. company, Sherlock building.

Summer school. Holmes Business college. Four teachers. For public school children. Commences July 5.

Oh, ho, for Mount Adams, ice caves, lava caves and Trout lake. Round trip tickets, steamer and stage, for sale. Regularly on the Alder street dock. Phone Main 214.

Baseball. Paul Jones vs. Behnke-Walker, tomorrow 1:30. National grounds, Eighth and Hawthorne.

Salt rising bread at the A. B. C. Delicatessen, 336 Morrison street. Wheat bread, 8 and 10 cent loaves.

Take launches for warships at boat-house, foot of Stark street, until warships are gone.

To warships—Boats leave foot of Salmon and East Burnside street.

Dr. L. M. Thornton, dentist, Marquam. Wise Bros., dentists, the Falling blade.

STATE PAYS TWO PRICES

(Continued from Page One.)

It is impossible for an outsider to give an accurate idea of the amendments of the secretary of state, though a great part of his direct salary may be ascertained from the code and from the appropriation bills. The items most readily discovered are: Salary, commission, a year, \$1,600; public buildings, \$100; commission, \$50; asylum trustee, \$100; reform school, \$250 and expenses; deaf mute and blind school, \$250 and expenses; domestic animal commission, \$250; total, \$2,850.

In the general appropriation bill of 1903 there is an item of \$16,750 for clerk hire in that office and another for \$5,000 for additional clerk hire on account of the corporation law. These sums cover two years. In the office there are six clerks: S. A. Koser, deputy secretary of state; F. K. Lovell, in the insurance department; two lady stenographers and two young men. In the corporation department there is a chief clerk, F. T. Wrightman, and a stenographer.

In addition to these direct charges, section 2925, page 988, of code, allows fees as follows: certifying and affixing state seal to any document, \$2; making copies of any record, 25 cents per 100 words; filing articles of incorporation, \$2.50; recording any paper or document, 25 cents per 100 words.

Section 3597, page 1219, of code, allows a charge of 50 cents for each certificate of registration for Indiana, with fees. Section 3707, page 1224, allows fees as insurance commissioner, and section 3724, page 1253, provides a fee of \$5 for insurance statements; also section 3747, page 1261, a fee of \$10 for filing annual statements of insurance companies; also section 3752, page 1263, a fee of \$3 for each annual license issued; also section 3756, page 1264, allows per diem and expenses for examination of insurance companies.

In the foregoing category may be included notary public commissions, pardons, appointments and other official documents and to know just exactly the amount of the fees allowed is almost impossible except by aid from the secretary himself. Of course, it is well known that the present secretary, like his predecessors, does not collect for or nearly all of the fees allowed by the law for notarial commissions and other personal documents—indeed, Mr. Dunbar has the reputation of being very liberal in that way—but, notwithstanding that fact, the emoluments of the office are credited, with being enormous, netting the secretary from \$15,000 to \$20,000 a year. It may be estimated too high, but the refusal of the present officer and his predecessors to let the public the exact amount leaves good ground for a play of imagination.

3. Chambers, Optician. Wholesale and retail, 129 Seventh St. Preferred Stock Owned Goods Allen & Lewis' Best Brand.

RAILROADS WORK

TRAFFIC DIRECTOR OF SOUTHERN PACIFIC TELLS OF GENERAL IMPROVEMENT IN THE EAST IN OREGON AND THE LEWIS AND CLARK FAIR.

Charles E. Fee, general passenger agent and traffic director of the Southern Pacific, is at the Portland today after a month spent in the east, and is enthusiastic over present passenger conditions in the west and conditions there are likely to prevail during the coming year.

Said he today: "I found that the railroad men attending the Chicago conference last month were much interested in the forthcoming Lewis and Clark fair and the business it is likely to bring to western railroads. All were agreed that the industrial era here is heavy and that travel, the railroads are going to do what they can to further interest in the fair."

"Since the close of the Chicago conference I have spent most of my time visiting my old haunts and places of interest in the east, and I found a remarkable acquaintance with the plans for the forthcoming Lewis and Clark fair. People are also becoming aware that there is no finer-summer climate anywhere than that which prevails in Portland. Those who have been here since the coming again for summer vacation and those who are coming to enjoy the delights of a summer's jaunt in the west—pleasures that have been described to them by their friends who have made the trip."

"As far as the present season's passenger business is concerned, it is first class. The travel from California to the St. Louis exposition has already been larger than was anticipated by the Southern Pacific company, and that company now believes the travel will be almost unprecedented in October and the early fall—at the time of year when the regular season is in its prime. Despite the excessive heat of July in the Mississippi valley, all western railroads did an excellent business to the fair."

"Prosperous conditions in the west also contribute to the fact which indicate a good travel for the coming year. I look for many people having in mind the establishment of new homes in new localities to make the trip to the Pacific coast a permanent one."

Mr. Fee will spend today and tomorrow visiting railroad friends in the city and in viewing the places of interest. Mr. Fee and the children have been here two days, but expect to return home together and will enjoy the beauties of a daylight trip over the Shasta route.

CRIMINAL PERSONAL.

Mrs. P. A. Worthington with her children, is visiting her parents at Weston. From that place they will go to the mountains of eastern Oregon for a month.

R. L. McCormick and George S. Long, both of Tacoma, identified with the Weyerhaeuser Lumber company, are at the Portland hotel, and will return to their homes in the mountains of eastern Oregon for a month.

Mr. C. W. Fulton, wife of the United States senator, and Alan C. Fulton of Astoria, are among the people at the Portland today.

W. H. Ewin, a physician of Union, Oregon, is at the Hotel Imperial.

Phil Metachan, one of the managers of the Imperial hotel, and wife, returned this morning from a month's trip to Yosemite Park and southern California.

J. W. Baker, state game warden, is at the Imperial from Cottage Grove.

Rev. G. L. Tuffs has gone to Idaho to organize anti-saloon leagues in the leading cities of that state.

Mrs. Charles S. Fee and children are at the Portland, en route from St. Paul to San Francisco, where they will join Mr. Fee, passenger traffic manager of the Southern Pacific, with headquarters in San Francisco, having for 27 years, until recently, served the Northern Pacific as general passenger agent.

LEWISTON BANQUETS GOVERNOR MORRISON

(Special Dispatch to The Journal.)

Lewiston, Idaho, July 1.—The Raymond hotel was the scene of the last evening of a large and brilliant reception, the guest of honor being Governor Morrison, who arrived in the morning from the eastern part of the state. During the day he was driven about the city and at 6 o'clock a dinner was given in his honor by Mr. and Mrs. G. W. Thompson. At 8 o'clock a public reception was given at the Raymond. The reception committee included a large number of the people of this section. Dr. C. W. Shaft was master of ceremonies. An orchestra was in attendance and refreshments were served.

Today the governor left for Boise via Spokane, having completed his campaigning tour of the northern counties.

SUSPEND OPERATIONS AT SMUGGLER UNION

(Journal Special Service.)

Telluride, Colo., July 1.—With the closing of the Smuggler Union mine that took place yesterday, it is said that several other mines will suspend operations within a short time. It is understood that the Smuggler Union mill will close down also, as soon as the supply of ore on hand is cared for.

The only reason so far given to the public for closing down is contained in a statement made by Buckley Wells, manager of the mine, in which he says that the Smuggler Union was closed by order of the directors, owing to the inability of the management to procure a sufficient number of thorough competent miners to properly work the property.

LEADERS ARE IT

Chickering, Weber, Kimball, Hazelton, Lester, Hobart M. Cable, Crown, Haddorff, and Schumann.

Plenty of Highest Grade Pianos at Lowest Prices, but Time for Getting Them is Short.

A few more days and the greatest piano sale of record will be over. Hundreds of piano purchasers are proud of their new possession, will gladly testify to the beauty in tone and finish of the pieces we are selling during the past few weeks. Nothing in the way of splendid values at small prices anything like this has ever been seen. It is a certainty pianos like these will not again be offered at such prices, being the best in the world for the money. Our warehouses, when completed, will be large enough to house all our stock.

The Pianos

Only for a short time can pianos that are no superior in the world be secured at such prices. Remember, there is the Chickering, that for 45 years has maintained the highest standard of piano excellence, and the no-less artistic instruments, the Weber of New York, and the Kimball of Chicago, the very choice Hazelton, the Lester, Philadelphia's pride, the wonderfully excellent Hobart M. Cable, the many-toned Chickering, the elegant and reliable Schumann, the dainty, sweet-toned Blyden, and in fact our entire line, comprising makes of strictly representative pianos.

Merchandise price-cutting has been resorted to in order to expedite the sale of pianos in a short time, and the further coupon privilege has been granted. This is a great advantage to the purchaser in regard to advertising, which will be valuable to us in the future, as well as at the present time.

Reductions

Range all the way from \$100 to \$150 and below. The sooner you get them, the better. At time of purchase, helps just that much more, so bring it along. Louis is enjoying the best of health. Despite the excessive heat of July in the Mississippi valley, all western railroads did an excellent business to the fair.

SHORTAGE OF WATER

(Continued from Page One.)

(100,000 gallons) to the same height as the Highland tank, so that they may be used and furnish improved pressure on the peninsula.

The two Albina pumps, each having a capacity of three and one-quarter million gallons in 24 hours, are kept running constantly, but they are unable to supply enough water to make up for that wasted during the warm weather. Respectfully, FRANK T. DODGE, "Supt. City Waterworks."

Not Water Enough to Drink.

This communication from Superintendent Dodge was acknowledged by Mr. Paget, who wrote as follows: "I thank you for your prompt reply, which you handed me this evening. It does not, however, afford or indicate any immediate relief or change of fact that at dinner time this evening my wife had to canvass the neighborhood for fifteen minutes before she could procure a drink of water for us, which had to be done in order to remain before it could be used."

"Neither does your letter prevent some feeling of resentment that your office should not have seen fit to issue a sprinkling permit right close to the home that you have just learned could not procure water in an emergency caused by sickness. Cannot the issuing of such a permit be discontinued until relief comes? Cannot, indeed, some such existing permits be withdrawn? I suggest this, as no other method for immediate benefit is intimated by you."

Inquire of North Albina, the fact that a large number of the residents are suffering much inconvenience because of their inability to get water enough for their daily needs. It frequently happens that no water at all can be obtained from the pipes and families are at times obliged to resort to a grocery on the line of the St. Johns cars, which is supplied with water which is filled during the rainy season. "I couldn't get water enough for dinner last night," said one woman. "We never have enough for our bathtub on the second floor, and if we want to water the lawn we can do it only after midnight." Similar statements are made by numerous other residents of the district. Most of them have written to me about the quality of the water, but all agree that the quantity is far short of the requirements.

Water is in Sight.

The two large tanks at North Albina are being refilled and it is expected that this work will be finished within a week or ten days. Considerable relief should then be afforded, as the pressure will be increased over a large area, so that water can be obtained from the pipes and families are at times obliged to resort to a grocery on the line of the St. Johns cars, which is supplied with water which is filled during the rainy season. "I couldn't get water enough for dinner last night," said one woman. "We never have enough for our bathtub on the second floor, and if we want to water the lawn we can do it only after midnight." Similar statements are made by numerous other residents of the district. Most of them have written to me about the quality of the water, but all agree that the quantity is far short of the requirements.
