THE OREGON SUNDAY JOURNAL, PORTLAND, SUNDAY MORNING, JULY 3, 1904.

"THE DEMOCRATIC OUTLOOK" --- TOWNE

(Continued from Page One.)

ts will find no trouble in subscribing when appended that dissension arises." Doubliess under ordinary circum-stances this would be true; but, as con-ditions have framed the issues of the impending campaign, no serious dif-ference, as it seems to me, ought to be found among men of sincers Democratic sympathles in-making practical applica-tion of these ancient and honored formulas of party faith. The question that chiefly divided the organization in 1886 and 1960 is not now an issue in the chiefly divided the organization in 1886 and 1960 is not now an issue in the context before us. The supply of metallic money has increased from matural sources to an extent practically equal to the expectations of those who winhed to augment an insufficient mone-tary volume by returning to the bi-metallic system. Since, therefore, that question is not involved in this cam-paign, why ought a previous difference about it cause any present inharmony among men of squally sincers demo-cratic persuasion and devoid with equal earnestness and honesty to the duty that now is? My knowledge as to this particular situation is not amall, and I have no hesitation in a spressing the opinion that little difficulty respect-ing it is likely to be experienced at St. Louis.

a Fage One.) thousands of brave lives sacrificedi and the process is not yet, nor likely soon to be, complete. The reaction on our gov-ernment at home of an absolutism er-ercised by the officers of that govern-which is already apparent, must in time fundamentally alter the very spirit, if not indeed the form and character, of our institutions. All the analogies of history emphasize this danger as the gravest, that republics can encounter, Coloninitism is unjust to the colony, and

CHARLES A. TOWNE ruinous to the mother country. We counsel justice to the Filiphos indeed, but chiefly because justice to them is safety to ourselves. This course does not involve any sac-rifice of national interest. It will, on the contrary, advantage our legitimate commerce. Any action taken can be accompanied by full and adequate guar-intees as to all necessary neval and trading ports and commercial privileges while so conspicuous an exhibition of magnanimity and justice would restore our moral prestige, and do more to fur-ther an honest diplomady than the abuilty of our complement of battle-ships. The Democratic party has added to our original boundaries 72 per cent of our original boundaries 72 per cent of our original boundaries 72 per cent of our constitution has followed the first over every foot of it. That party can never rest until once again our national massing permanently floats over no peo-ple within our jurisdiction to whom the dear-bought rights of freedom eff

Awaitons that will move the ent of the country to demand ison of the tariff, provided the d on of the Democratic convention subject is of a sort to beget ince that such revision will be by and fairly made under Democratic pices. That declaration should ik and specific "HOUSE OF HOO HOO"

World's Fair Fire Fails to Dampen Lumbermen's Enterprise-New Building Will Not Be So Pretentious as One Destrnyed.

RISING FROM ASHES

(Special Dispatch to The Journal.) World's Fair Grounds, St. Louis, July And the Oregon building had a marrow escape last week when the House of Hoo foo went up in flames within a hundred feet away. Lucklij there was but little wind blowing, and ne harm resulted, though Commissioner Williams and Col Harry E. Dozeh of the Lewis and Clark exposition, took the precautions of wei-ting the roof and protecting the windows with wet blankets. The fire which destroyed the lumber-men's home was discovered at 4 o'clock in the morning, and before aid could be unale morning. It was a light building, with many windows, and it building the whole structure out of busi-ments of the shore state out of busi-tions.

Most of the club property was saved and taken to a place of safety in the Oregon building right across the street, which was thrown open to the fire suf-ferers. With characteristic energy, the managers called for bids the same day, and already workmen are engaged in

ferers. With characteristic energy, the managers called for, bids the same day, and already workmen are engaged in putting up a new structure, which, though not as complete as the first house, will nevertheless be a credit to Hoo Hoo or Hoo Doo, as the organization is now called around the fair grounds. Piertoy of Oregon literature is now ar-riving from all soutces. The Lewis and Clark Centennial, the Commission, the various counties in the state and the rallroads are forwarding excellent ad-vertising material which is being used to awaken interest in the western country. **Demonstrate Oregon Pranes.** Demonstrations of Oregon pranes are being held daily in the Agricultura building, where Oregon has an excellent location on the main aisle in the middle of the jiges, and many pounds are dis-tributed every day. Supt Charles V. Galloway of Yamhill county is in charge of the prune business, and always has a big crowd watching his cultury opera-tions.

It is wholly probable that the plat- Can it be wondered at that thoughtful

. The Agricultural palace is the big-gest building in the fair, and has over eight miles of aisles. It contains some of the most interesting exhibits on the grounds, and is generally filled with visitors.

visitors. **For Independence Day.** Special and definits preparations are now being made to meet all of the re-quirements of the visitors who will visit the exposition on the Fourth of July. Particular efforts' are being made for providing picale grounds, public tollets, free ice water and plenty of chairs and tables. Over 300 acress of woodland and lawn back of the Palace of Fine Arts will be thrown open on that day, and

iawn back of the Palace of Fine Arts will be thrown open on that day, and will be in condition for use of picnic parties of all sizes. It is believed that hundreds of St. Louisians will avail themselves of this opportunity of spending their Fourth of July on the grounds, taking in the ex-hibits during the day, and the illumi-nations and the Pike at night. Much State Bivalry.

It is wholly probable that the plat-form, while treating the occupant of the chief magistracy with proper re-spect, will nevertheless arraign certain of his characteristics as fraught with danger to the peace of the country. As the candidate of his party for a four years' term in the office he now occupies, he is legitimately subject to oriticism based upon his past official conduct and his well-known peculiarities of temper and endowment. Many of his qualities are admirable. Others are not so because of the opportunities of dan-gerous exercise their normal activity in the absolute system necessarily pur-sued in the government of dependencies are sure to receive emphasis at the hands of a man to whom the sense of

The annual class recital by the pu-pils of Oregon Conservatory of Music, Friday evening, at Unitarian chapel presented some pleasing features. Purple sweet peas and marigolds were employed in carrying out the colors of the school, purple and gold. The whole program was well rendered and some of the performers showed marked talent. Miss Florence Fryer, who played in a duct, was the most brilliant performer of the evening. She has studied only
