KENO DECISION

JUSTICE SETON DELAYS PINAL AC-

Contrary to expectation, Justice Seton did not give his decision this morning on whether or not the proprietors of the Portland Club are guilty of violating the law by playing keno. It is announced that the attorneys representing the club men and the district attorney desire to submit a number of author-

the question.

It is commonly believed that an appeal will be taken in case the decision is against the club men. This is an error, as Justice Seton is not sitting as a trial but as a committing magistrate. If he finds the prisoners guilty, they are simply bound over for trial by jury in the circuit court.

A rumor was current last night and this morning that the Warwick Turf ex-

closed by the municipal authorities on account of the disturbance it created three months ago. It is probable that if the place opened its first clash would be with the municipal authorities. Frank Allen was found guilty of smoking opium at 48 Fourth street by Justice Seton this morning and fined

UMATILLA IS NO DESERT NOW

OSTMASTER LIVERMORE OF PER-DISTON TELLS OF THE CHANGE THE COUNTY HAS SEEN IN PORTY TEARS—A MAIL CONTRACT THAT MEANT A PORTUNE.

Postmaster Lot Livermore of Pendle-ton, who has been for several days a guest at the Imperial, departed today for home. He is one of the pioneer business men of eastern Oregon, and has a wide acquaintance with its people and

resources. He says:

"If, in 1856, when I went to Umatilla county, men had attempted to plant wheat where they are now raising 40 bushels of it to the acre, they would have been taken in charge as mentally unbalanced. It was at that time thought to be a country of very little value.
Why, I can remember that, as I traveled through the country for the first time and saw farmers here and there planting little patches of produce, I looked at them with pity and imagined that they had been banished from their former places of residence and had been forced by untoward circumstances

to come here to live. The same land is now commanding \$50 to \$75 per acre. "In those days the town of Umatilis had a population of 1,500, which has now decreased to about 100. The oldtime prosperity of the town was due to the stage lines. When I went there John Halley had just started the saddle train to Boise to accommodate prospectors and others. Then came the Northwestern stage line. The company had a contract for \$225,000 to carry the mails, and I have always understood that the other business of the line paid all the running expenses. It was a good business in those days. I went into that country as the representative of the Wells-Fargo Express company. John Halley now lives at Halley, Idaho. He has since been a member of congress. In those days the trip from Portland to Pendleton took two and a half days, and now we board the cars here at night and get out there next morning. The crops up there are very good this year— I understand the wheat crop is one of the largest in the history of the coun-try."

WIDESPREAD PLOT

(Journal Special Service.)

Rome, July 29.—The Russian government has asked the Italian police and, more especially, the Rome contingent, to keep a close watch on all Russian exiles known to be in Italy. It is understood that a widespread plot, looking to the assassination of many of the crowned heads of Europe, is suspected, and that information of this character is now in the hands of the Russian authorities.

thorities.

From what can be learned, it is said that for some time prior to the death of Minister Plehye, the Russian secret service was taking active steps to apprehend numerous suspects, who, from the information in the hands of the authorities, were contemplating the death of the minister. It is also stated that Plahye was in possession of this (Special Dispatch to The Journal.)

Among various rumors afloat in connection with the report from St. Petersburg that a widespread plot is suspected, is the announcement that from Paterson, N. J., the hotbed of American anarchism, a contingent is supposed to have lately left for Europe, and the supposition advanced is that a conference of a national character is to be held at some European city, having for its object the furtherance of plans looking to the dealing of simultaneous blows to many rulers.
