Some men spend more money on their wives than they do on their wives.

TOO LATE TO CLASSIFY: FOR RENT—A pleasant furnished room for rent; bath and phone; close in; \$3.00 per week. 336 Sixth st.

FRONT STREET HERE

AVAILANCE OF RECEIPTS IN THE EARLY PART OF THE WEEK NOT DISPOSED OF UNTIL THE MARKET FOR FLOUR HAD DECLINED SHARPLY.

Front Street, July 30.—6 p. m.—The principal features of the Portland wholesale markets during the past week were:

Availability of poultry arrives. Heavy demand for veal and hogs. Dressed beef found poor sale.

Salmon catch good and then bad. Halibut and other large fish receipts. Vegetables are generally low.

Peaches come to close this week. Many cars of watermelons arrive. Flour is generally firmer.

Much speculation on chittim bark. Old potatoes arrive in bad shape.

New potatoes slow in arriving. Egg market holds good tone.

Butter is feeling slightly better.

An Availance of Poultry Arrives. An availance of poultry struck Front street during the early part of the week and it was not until the price had fallen several cents that the market settled.

Some of the dealers along the street at any figure. It is a fact that poultry this year sold at much higher prices than during the previous year.

This reduced the demand to a large extent. As before, the arrivals consisted mostly of springs but all grades, even hens, were weak at the prices maintained before the drop.

There is still a limited demand for turkeys and large young ducks. Small ducks of general size are a drug on the market and in order to sell, the dealers have to shade the printed quotations considerably.

Much Demand for Veal and Hogs. For dressed veal and hogs the demand this week was very large and the receipts were small.

The cooler weather was the principal cause of the increased inquiry while the former slump in the market was responsible for the smallness of the receipts.

Generally expected by the commission merchants during the coming week. Prices during the last six days showed a gain.

Dressed Beef Hard to Sell. What small shipments of bull beef arrived on the street during the week found a very poor demand and the best of that received sold at lower figures.

There is a limited call for mutton and some for lamb.

Salmon Catch Showed Changes. For one or two days this week there was every indication that the run of salmon would be large, when all at once the catch fell off and the packers are again lamenting the paucity of the season when the catch is not up to standard.

Halibut came in larger supply from the sound and prices were cut twice 1/4 a pound.

Vegetables Are Generally Lower. As a result of the market in general from local points and the fact that several declines. It is expected that the bottom of the market will soon be reached.

Tomatoes from The Dalles and the Willamette valley as well as from California were in larger supply and prices moved down several notches.

A large shipment of tomatoes came from Sacramento today but the vegetables in good shape. Some fine quality Gray.

Prices moved down several notches. A large shipment of tomatoes came from Sacramento today but the vegetables in good shape. Some fine quality Gray.

Prices moved down several notches. A large shipment of tomatoes came from Sacramento today but the vegetables in good shape. Some fine quality Gray.

Peaches Come at Close of Week. All through the week with the exception of today there was a great shortage in the supply of peaches and prices were up 25c during the week.

Today peaches came from every direction, every house having a supply larger than the demand. Lower figures are anticipated during the coming week.

Nearly a dozen carloads of watermelons came in this week and on account of the over supply and the cool weather the price is a fraction down.

The flour market is fast awakening and this week the inquiries from the orient for flour were larger. Most of the calls came from China but it is believed that most of the stocks will be absorbed by the government of that country.

The seizure of the Portland-oriental liner Arabia the first of the week has somewhat frightened the exporters, but they have not yet determined any order for flour at the quoted figures.

New Wheat Is Coming. There is not much activity in the wheat market, the only item of interest being that the new crop has begun to appear in the warehouses.

Small purchases of old wheat are still being made to fill in. Prices show no change.

Much Speculation in Chittim Bark. Although generally speaking there has been but little movement in the market for chittim bark for the dealers to become excited and bid up prices, it is nevertheless a fact that during the past week as high as \$4 a pound has been bid by local points in the country while the highest figure they could receive for the stocks was 3 1/2, with the easterners not very anxious to purchase.

Many carloads of chittim or cascara bark are annually sent to the eastern states and to Germany. The bark is found in large quantities in the state of Oregon and in Washington. The present ruling prices on chittim are 3c and 3 1/2 a pound.

Old Potatoes Arrive in Bad Shape. The potatoes which arrived during the week were not of good quality and prices were few even at the lower prices. New potatoes from local points are not coming in so fast, as farmers are giving them a chance to mature.

Several cars from California, among them being a car of new gammas, arrived this week. Prices are generally down and are ruling from \$1.75 to \$1.85.

Tone of Egg Market Good. The egg market this week was but a repetition of that of the former six days; that is, strong. The receipts this week were slightly larger but a better demand prevailed.

A carload of eastern eggs which arrived two weeks ago has been cleaned up. Cooler weather has caused the arrivals to come in better shape.

Butter is Feeling Slightly Better. There is a slight improvement in the demand for creamery butter and a small increase in the price is expected within the coming week if the receipts do not show too large an amount. Some of the dealers along the street this week were asking and receiving in a few cases, a slight advance over the printed prices, but this was only on

CHICKENS? WHEW!

Meats, Fish and Provisions. FRESH MEATS—Inspected—Beef, steers, 6c per lb; lamb, dressed, 6 1/2c per lb; mutton, dressed, 4 1/2c per lb; pork, 5c per lb.

SEVERE SAND STORM

ALONG THE SANTA FE. San Francisco, July 30.—Considerable trouble was experienced by the Santa Fe railway today and last night on account of a severe sand storm, and because of private wires being unable to receive their full market reports today.

A considerable force of linemen has been sent to the seat of the trouble.

RECEIPTS OF HOGS

DECREASE GREATLY. Portland Union Stockyards, July 30, 6 p. m.—The feature of the local livestock situation has been the receipt of a large quantity of hogs, which has caused a sharp decline in prices.

The receipts of hogs today were 1,200 head, a decrease of 500 head from the previous day.

The market for hogs is now very weak, and prices are expected to continue to decline.
