DAMAGE TO JETTY IS NOT SERIOUS

Early storms have not wrought such havoc at the mouth of the Columbia as first dispatches from Astoria presaged. Mal. W. C. Langitt returned from an inspection of the jetty last evening, and stated today that only about 2,000 feet of the framework, used for transportation purposes, had been washed away. This does not affect the jetty proper in any manner, as the firm filling of rock and accumulated sand that constitutes the breakwater under the framework is as fixed as a cliff. Major Langitt also stated that the trestle out at the end of the jetty, which was in use for extension purposes, remained intact.

The greatest inconvenience resulting from the break comes from the fact that two sections of the framework, in two distinct places, have been lost, leaving about 1,000 feet isolated. Major Langitt says that an examination of this 1,000 feet remaining will be made at once and that everything will be put in shape again soon. If violent weather does not become too persistent, further knowledge as to this, however, will be given definite form after the examination now in progress.

TELEPHONE GIRLS OUT.

(Continued from Page One.) Listen to reason and to remember that the company wanted to do what was right. Shouting out those whom she thought would have the most influence with the strikers, Miss Cooper talked very earnestly to them. At last it was decided to hold another meeting in the dining room, where it was proposed to talk the matter over, the telephone company's trouble.

IMPERIALISM IS NICHOLAS' THEME

YOUNG MEN'S DEMOCRATIC CLUB LISTEN TO ALEX. ADDRESS—THE SPEAKER SAYS BENEVOLENT FEATS HAVE BEEN PERFORMED ON IMPERIALISTIC TRAPPEL.

"Amazing are the acrobatic feats that have been performed by the Republican politicians and press on the imperialistic trapeze during the last four years," said H. E. Nicholas, addressing a meeting of the Young Men's Democratic Club of Portland last evening at the Chamber of Commerce building. "They have rung all the political changes on the Philippines, from benevolent assimilation to cold lead and the war of course, and all the time the commercial exploiter has been the force behind the curtain, the man behind the gun, as it were. The islands have been bought at enormous cost of blood and treasure, and the nation has paid for it, while the commercial adventurer is the only one who gains any profit from the transaction."

Mr. Nicholas spoke at length upon the various phases of imperialism, and his sentiments were enthusiastically applauded by a large audience of very wide-awake young Democrats who are helping to make the Portland campaign interesting and instructive to voters. The meeting was presided over by President G. W. Allen, who appointed a committee to confer with the state committee and similar committees from the Multnomah County Democratic club on plans for pressing the campaign with greater vigor from now until election.

RUSSIANS ATTACK

(Continued from Page One.) stand until Kurapatkin reaches the scene of his recent defeat. Our lines of communication and our supplies and ammunition could scarcely have reached perfection to any point north of Liao Yang. "It does not matter much whether Kurapatkin has assumed the offensive upon orders from St. Petersburg by his own desire. He has taken a tremendous risk, and it is not for me to say whether he was justified or not. It is all very well to say that the Russian commander leaves his communications open to attack; but only a very large force can disturb such lines as Kurapatkin possesses. I hear on good authority that he has got men standing almost shoulder to shoulder along the railway. I would not be surprised if Kurapatkin, instead of continuing a frontal attack, should launch the whole of his army against General Kuraki's flanking force. It would be a bold stroke, but precipitate a great struggle, but the Russians are not accustomed to mountain-fighting and would be handicapped, even though superior in numbers.

SYMPATHY You don't hear much about sympathy in dentistry. Do you? People usually speak of dentists as cruel and calloused to the pain they inflict. That is because our methods have not been tried. We are so confident that we can operate successfully without pain in any instance or under any conditions that we ask for a close investigation of our methods. As to the durability of our work, we invite investigation also. Dr. B. E. Wright's Dental Offices 348 1/4 Washington Street, Corner Seventh. Office Hours—9 a. m. to 5 p. m. FROM ILLUS STRONES (Special Dispatch to The Journal.) Elberton, Wash., Oct. 12.—The pruned crop, which had come to be one of the important industries in this section of the state, is a failure this year on account of the killing frosts, except in and about Elberton, where the fruit is of unusually fine quality and the crop is at least one-half heavier than ever before.
