

# MILITARY BRIDGE BUILT

**FOUNDERS SPAN A FORD IN  
NEW AND ONE HALF HOURS IN  
OF SKILL IN QUICK, STRONG  
CONSTRUCTION—NEWS NOTES OF  
COUNTRY.**

(Special Dispatch to The Journal.)  
Wash., Oct. 2.—The new  
bridge, at Fort Linn, has been  
built. The actual time required to  
work with 10 men engaged was  
and one half hours. This included  
measurements and traveling over a  
the north from the bridge, cut-  
a timber hauling to the loca-  
erecting the bridge. Three  
were erected equidistant in the  
of the bridge and connected with  
rings. The height of the bridge  
highest place 19 feet. While  
is over one end of the pond  
Columbia river, the construc-  
same was made on the same  
as though it crossed a wide  
and required a larger number  
men.

(Special Dispatch to The Journal.)  
Salem, Or., Oct. 2.—There are still  
one or two dryers running in the  
district it is said but they will likely be  
done in a day or two.

The crop is coming very rapidly,  
according to N. G. O. of the Willamette  
Valley association, but is not moving  
off very fast. The crop when it is all  
will be just about as estimated hereto-  
fore, about 25 or 30 per cent of the  
crop of last year, which for the entire  
northwest amounted to about 20,000,000  
pounds. Thus there will be from 7,500,  
999 to 8,000,000 pounds this year in the  
northwest.

In Europe especially are the German  
and French crops reported as being very  
heavy.

The one thing that saves the prunes  
growers of the Pacific northwest is the  
fact that they have at least 75 per cent  
of 30-40s and 40-50s in their crop of  
this year. They will, of course, realize  
the best prices that are going under the  
circumstances.

The pool prunes are being shipped as  
fast as they can be gotten ready and it  
is expected that the last of these prunes  
will be gone before long. The main diffi-  
culty is said to be the lack of cars for  
shipping purposes.

Until the pool prunes are out of the  
way there will be no movement of the  
other prunes of this district.

The Willamette Valley association is  
making a number of innovations in its  
prune shipping this year. The principal  
of these is the smaller sizes of packages.  
They have arranged to ship about 4,000  
or 5,000 10-pound boxes, and are also  
now putting prunes up in a very tasty  
and attractive pound package, which has  
not yet been introduced.

A great number of the prunes growers  
have put up their prunes this year with  
out "tying" them as has been the uni-  
versal custom heretofore, and the result  
is they have the best quality of prunes  
that have ever been turned out here.  
The difference between the "tied" prunes  
and the prunes treated in its natural  
state is that the latter shows up  
plump and fresh and juicy, while the  
prunes put up in ties has that shriveled  
appearance so well known. It would  
seem that the matter of curing without  
ties will have to be adopted some of  
these days by all growers, or they will  
have to receive less money for their  
fruit than the growers who are more  
lucky in the mode of handling.

There is no change reported in the  
prices from last week, and very little  
demand is reported.

**Barber Board Files Report.**  
J. C. Weir, H. G. Meyer and F. T.  
Rogers of the state barbers' examining  
board filed their report for the year  
October 1, 1904, to the state board of  
barbers. Their report was due March 1, but  
owing to Judge M. C. George's decision  
in the "barber" case, they waited until  
the supreme court had passed on this  
decision.

Their financial report shows the fol-  
lowing receipts and disbursements: Cash  
on hand October 1, 1903, \$300.05; re-  
ceipts for permits, renewal cards and  
apprentice cards, \$1,725; total, \$2,025.05;  
disbursements for the year, \$1,761.35;  
balance on hand, \$173.70. Of the dis-  
bursements \$1,428.55 was for salaries  
and traveling expenses of the commis-  
sion, and \$336.80 for general expendi-  
tures of the commission.

The board reports that it has recently  
inspected all the shops in Portland and  
vicinity and will soon visit those in  
other parts of the state.

Roy Conklin, who relieved his compa-  
nion, Williams, of a watch during fall  
week was today sentenced to serve six  
months in the county jail for larceny  
of a person. Conklin is about 25  
years of age.

# OREGON PRUNE CROP VERY SHORT

**PRACTICALLY ALL FRUIT IS NOW  
GARDED FOR AND WILL BE FROM  
7,500,000 TO 8,000,000 POUNDS AS  
AGAINST 20,000,000 POUNDS LAST  
YEAR.**

(Special Dispatch to The Journal.)  
Salem, Or., Oct. 2.—There are still  
one or two dryers running in the  
district it is said but they will likely be  
done in a day or two.

The crop is coming very rapidly,  
according to N. G. O. of the Willamette  
Valley association, but is not moving

**COLORED MAN TRIED**  
(Journal Special Service.)  
Boston, Oct. 2.—The board of naval  
officers appointed to conduct the govern-  
ment trial of the new cruiser Colorado  
gathered in Boston today in preparation  
for the trial trip of the vessel. The  
trial will take place over the Cape Ann  
course next Wednesday. The Colorado  
will be commanded by Captain Duncan  
Kennedy, U. S. N.

# MUSICIAN FINDS HOME UNDESANT

**ALTHOUGH HIS WIFE CALLED IN THE  
NEIGHBORS AND BEAT AND  
CROCKED HIM UNTIL HE HAD TO  
FLEE TO HAVE HIS LIFE—REPU-  
BLICAN PARTY.**

(Special Dispatch to The Journal.)  
Oregon City, Oct. 2.—John Kabouré,  
a well-known resident and musician of  
Macksburg, in the south end of this  
county, filed a suit yesterday asking  
for a divorce from his wife, Gertrude  
Kabouré, on the grounds of cruel and  
inhuman treatment. Kabouré and his  
wife were married in Wisconsin in 1877,  
and have lived at Macksburg for 25  
years, where they own considerable  
property.

The complaint alleges that on October  
17, 1904, as plaintiff was preparing to  
retire for the evening, two neighbors,  
Peter Hornung and Walter Hornack,  
came to his home, and, assisted by his  
wife, assaulted, beat and choked him  
until he was compelled to flee from his  
home for his life. He says that his wife  
has often expressed the wish that he  
would die, and has repeatedly threatened  
to kill him. George C. Brownell appears  
for the plaintiff.

**Republican Rally in Clackamas.**  
A Republican rally will be held at Es-  
coda, in Clackamas county, today, and  
prominent speakers from over the state  
will be present. A party of the faithful,  
consisting of Hon. George C. Brownell,  
Sheriff J. R. Shaver and Deputy County  
Recorder C. E. Hamby, accompanied by  
a number of other party leaders of Oregon City,  
left early this morning to take part in  
the meeting.

Hon. John H. Mitchell, Hon. George C.  
Brownell, Hon. E. B. Tongue of Hills-  
boro, David M. Dunne and Frank C.  
Baker of Portland are among the speak-  
ers who will address the meeting. Little  
interest is being taken in politics in  
this county, but it is expected that a  
large crowd will be present at this meet-  
ing, and the committee in charge has  
not yet been organized.

A great number of the prunes growers  
have put up their prunes this year with  
out "tying" them as has been the uni-  
versal custom heretofore, and the result  
is they have the best quality of prunes  
that have ever been turned out here.  
The difference between the "tied" prunes  
and the prunes treated in its natural  
state is that the latter shows up  
plump and fresh and juicy, while the  
prunes put up in ties has that shriveled  
appearance so well known. It would  
seem that the matter of curing without  
ties will have to be adopted some of  
these days by all growers, or they will  
have to receive less money for their  
fruit than the growers who are more  
lucky in the mode of handling.

There is no change reported in the  
prices from last week, and very little  
demand is reported.

**Barber Board Files Report.**

**INSPECTOR FINDS NO ILLEGAL WORK**  
(Special Dispatch to The Journal.)  
Vancouver, B. C., Oct. 2.—Timber  
Inspector John Murray has returned from  
a 10 days' trip to the headquarters of  
the Skagit river which lies in British Co-  
lumbia, although the river has its mouth  
in the state of Washington. Murray  
went up to the source of the Skagit on  
account of rumors which had reached  
this city that certain provincial govern-  
ment timber in that locality was being  
marked by parties who had succeeded in  
advising the department of the fact of  
their operations. He, however, found  
everything all right and did not find that  
any illegal work was being carried on.

While on the lower Skagit Inspector  
Murray was taken by the natives to be  
a Canadian Pacific detective looking for  
train robbers and as a result he had  
several amusing experiences.

**GRANTS PASS REGISTRATION.**  
(Special Dispatch to The Journal.)  
Grants Pass, Or., Oct. 2.—The total  
of the late registration of the three  
Grants Pass precincts is 28. The regis-  
tration of the out of town precincts  
is not yet in. It will probably total  
about the same number. The registra-  
tion in the county was 1,878.

# If You Knew

**Dr. Miles' Anti-Pain Pills**

you could be relieved of that periodic  
or chronic, nervous or sick headache in  
a few minutes, would you continue to  
suffer?  
Especially when you are assured of the  
fact that the remedy is perfectly  
harmless, and will be absolutely no  
other effect, except to relieve and cure  
the pain.

will bring such relief, quick and sure.  
That is not all. They will prevent and  
cure all kinds of pain—Neuralgia, Head-  
ache, Rheumatism, Menstrual Pains,  
Stomach ache, etc.  
Gen. A. Jacobs, merchant, Lima, Ohio,  
recommends Dr. Miles' Anti-Pain Pills  
as follows:  
"I am anxious that all should know  
the virtue of these pills. I have used  
them for years, and consider them mar-  
velous in their instantaneous relief of  
headache and pain, while they leave  
no disagreeable after effects."  
Sold under a guarantee that first  
package will benefit, or druggist will  
return your money.  
25 doses, 25 cents. Never sold in bulk.

**CLUB IS OPPOSED TO PROHIBITION**  
**COMMITTEE OF PROMINENT CITI-  
ZENS AT YUGENE APPOINTED TO  
DRAFT RESOLUTIONS ON QUES-  
TIONS AND PRESENT THEM AT  
SPECIAL MEETING.**

(Special Dispatch to The Journal.)  
Eugene, Or., Oct. 2.—At a special  
meeting of the Commercial club last  
night it was declared to be the sense  
of the meeting that the club was op-  
posed to prohibition and this commit-  
tee of prominent citizens was appointed  
to draft resolutions on the questions to  
be presented at a special meeting of the  
club: J. H. McClung, Dr. D. A. Paine,  
and Attorney Charles A. Hardy.

Roy Peters, a deserter from the  
United States army, was arrested at  
Coburg yesterday by Constable G. O.  
Bassett. He will be turned over to the  
officers at Bremerton. Peters, who has  
lived at Coburg nearly all his life, en-  
dured about four months ago. Not find-  
ing army life to his liking he came home  
without leave.

George Leslie was held for trial  
under \$300 bonds yesterday on the  
charge of stealing a quantity of canned  
fruit from Allen & Co's cannery in  
this city. Allen hid in the building and  
caught Leslie with a sack full of fruit.  
Leslie had been peddling the fruit about  
town. He was a former employe of  
the cannery.

One of the Japanese section hands on  
the Southern Pacific railway at Irving  
is under arrest for assaulting the sec-  
tion foreman, John O'Brien.

**TERRIFIED WOMEN BY HUGS AND KISSES**  
(Special Dispatch to The Journal.)  
Seattle, Wash., Oct. 2.—Ballard  
women were terrified out of their wits  
yesterday and the cause is now on his  
way to the state insane asylum. For  
several hours the town rang with cries  
and stories were told of a man who  
rang front door bells, entered houses,  
hugged and kissed the women he  
could lay his hands on and then de-  
parted. The police were called out and  
after an hour's hunt arrested Jacob Wer-  
denbreck, a muscular fellow fit to crush  
in the ribs of the average woman.

After his arrest Werdenbreck talked  
but little and a commission of physicians  
concluded that he was insane and Judge  
Bell ordered him committed to the Asy-  
lum. A year ago Werdenbreck's wife  
died. Shortly afterward he became pos-  
sessed of a megalomaniacal delusion, and  
was living and hiding from him. This is re-  
sponsible for his conduct, although he  
developed his hugging and kissing mania  
within about 24 hours.

**Good Fishing on the Clackamas.**  
Fine strings are now being taken be-  
tween Eagle creek and Estacada. Sea-  
son closes November 1. Last Sunday of  
low rates on the O. W. P.

**AMERICAN ARMY TO BE SHARPSHOOTERS**  
(Journal Special Service.)  
Washington, Oct. 2.—A meeting of  
the national board for the promotion of  
rifle practice was held today at the war  
department. In addition to approving  
the award made at the recent shoot  
for the national trophy at Fort Riley,  
the meeting discussed several matters  
which it intends to bring before the  
coming session of congress.

These matters relate to the plans of  
the board for the formation of a national  
marksmen's reserve, including the en-  
couragement of rifle practice in the  
state militia, in military and other  
schools, and among individuals. As a  
first step in this direction the board de-  
sires an appropriation of \$1,000,000 per  
annum for five years to be expended  
under the direction of the secretary of  
war for the providing of ranges, their  
equipment and maintenance.

**Teas Record Breaking Values**  
Our Top Quality 60c Teas are regular 80c qualities Extra Premiums Free with each purchase Premiums must be seen to be appreciated New Teas 25, 30, 35, 40, 50c Come early just to look. Grant American Importing Tea Co. Money Saving Store. 251 Washington Street. Portland, Oregon.

# PELVIC DISEASES OF MEN

**The St. Louis Medical and Surgical Dispensary**

Ever since 1878, but with the last year new discoveries, the sole propriety of this great  
institution, has placed it in a HUNDRED YEARS IN ADVANCE OF ITS RIVAL-  
LIES. It is believed that about 100,000,000 men in the world are afflicted with  
the Pelvic case, and admirably prepared to treat

ESTABLISHED 1878.  
**St. Louis Medical and Surgical Dispensary**

Day and night, with diligence and patience, earnest, conscientious, progressive  
physicians are studying the cause and peculiarities, as well as the cure of the various  
ailments that affect the human system and sicken and darken the heart of man.

**POISONED BLOOD**  
Primary, secondary, tertiary, hereditary. We can positively cure any case of blood  
poisoning so that it will never recur. How many are there who are downcast, with no hope of living but a  
short, miserable life, on account of their blood being contaminated with poison, which  
has been handed down from their parents or acquired? How many are fast decaying and  
are gradually being lowered into their grave, evinced by such symptoms of destruction  
as, first, a characteristic sore, then pimples and sores over the body, skin eruptions,  
fainting, hair, dizziness in morning and throat, discharge spots on skin, nose bleed  
and many other typical indications.  
Do not take mercury, potash or vegetable compounds, for they only assist the disease  
in securing you more and bring about the end much earlier, and it is so unfortunate  
for humanity that physicians, almost without exception, are still giving people this  
kind of treatment when they know it is harmful.

**STRICTURE**  
AND ITS SCIENTIFIC, CERTAIN, SAFE CURE  
Stricture is the most frequent and dreadful disease of the Pelvic system, and is not  
at all cured by the common use of cathartics, and during this period, the  
grave kidneys of its intimate relation through the sympathetic nervous system with  
the kidneys, bladder and prostate gland. Every man affected with stricture for any  
length of time is bound to have dangerous complications with the kidneys and bladder,  
and when these vital organs are encroached upon by disease the results are so serious  
as to forebode more danger than consumption.

**SEXUAL POWER RESTORED**  
There is not a man in existence who is suffering from weakness, if he feels so  
from unnatural causes, that we cannot rebuild and strengthen so as to accomplish the  
greatest desire, and after we have cured a case of this kind there will never again  
be a sign of weakness, except as by impotence.

**VARICOCELE**  
Is a pelvic disease, and is simply veins filled with curdled or stagnant blood similar to  
varicose veins occurring in any other part of the body. This overflow and clotting ac-  
cumulation are caused by undue excitement and weakness of the sympathetic or gan-  
glionic nerves that regulate the supply of blood in the organism.

**HYDROCELE**  
Is one of the frequent chronic diseases. It consists of an accumulation of serum  
fluid and always involves the entire pelvic system, depriving the organs and the  
pelvic system of all vitality. Hydrocele is commonly caused by injury to the scrotum,  
or may result from continued inflammation produced by stricture, piles and any  
chronic trouble in the pelvic system. No one but a physician who has devoted his  
attention to this class of disease is able to distinguish a case of hydrocele from  
either rupture or varicocele.

**RUPTURE**  
Properly termed Hernia, is an affection in the region of the pelvic system, and is an  
escape or protrusion of the bowel from the lower part of the abdominal cavity. The  
tendency of rupture is always progressive, and the symptoms are usually so slight  
as not to be noticed until it has become so large that it is impossible to reduce it  
without great pain and suffering. It is not a dangerous disease until it has become  
so large that it is impossible to reduce it without great pain and suffering. It is not a  
dangerous disease until it has become so large that it is impossible to reduce it without  
great pain and suffering. It is not a dangerous disease until it has become so large  
that it is impossible to reduce it without great pain and suffering. It is not a danger-  
ous disease until it has become so large that it is impossible to reduce it without great  
pain and suffering. It is not a dangerous disease until it has become so large that it  
is impossible to reduce it without great pain and suffering. It is not a dangerous
