Despite O. A. C.'s strong eleven this year, there are many clubmen who will wager 16 to 7 and 16 to 5 that Multnomah can trounce the Farmers by a decisive score. The Multnomah men decisive state that the Corvallis players have cold feet.

### YOUNG ATHLETE HAS BUT ONE FOOT

When but a boy six years of age curiosity led young Moulien to see how certain cogwheels worked. When he got through with his investigations his toes had been ground off and the foot slashed, in the lings of the M. D.'s, up to a line drawn from the internal considers have to the inferior cal-

cauescapoid ligament.

Now with this stub, which has artificially been built up into a foot, shod with a common shoe, and his left one incased in the spike of the cinder path Moulien is able to pole 10 feet 10 inches, throw the 12-pound hammer 152 feet and toss the 16-pound shot to the 43-foot mark. On the gridiron he is the giant guard of the Lick school team and does the punting for that aggregation with his injured extremity, and with such force that his averages are about 50 yards. Place kicking for goals is his forte on the football field, and to send the ball over the bars from the 45-yard line is an easy performance.

Up to two years are this absence.

from the 45-yard line is an easy performance.

Up to two years ago this phenomenal boy athlete had been content to limit his athletic ability to the football field. Then he was urged to take to the cinder track. His first performance was in the pole vault, he being able to clear eight feet after some months' practice. By continual effort he has increased this height, until now he can almost wriggle over 11 feet.

The accedent which crippied young Moulien has had the result of retarding the muscular growth of his right leg to a noticeable degree. Its efficiency, however, is unimpaired.

Moulien weighs 175 pounds, stands is feet in height and has a chest measurement of 39 inches.

Of course, I have often wished that I was not a crippie," remarked Moulien. "I think that if my right footwas whole I would be able to smash a few records in my line, but I may be able to do so anyway. It is exceedingly hard to split your time between football and athletics, and should I enter college I would give one of them up and devote my whole time outside, of my studies to either the track or gridiron."

Tracey until the arrival of his properties of the sing the wing of the single part of the

### FLESH BUILDER

The liver of the cod fish produces oil that is a wonderful flesh builder. No fat or oil can compare with it in that respect. To get the best out of it, it must be emulsified and made like cream. In Scott's Emulsion it is prepared in the best possible form to produce the best possible results. Thirty years have proven this.

# HERE FOR BUSINESS

Tommy Burns, the crack Chicago mid-dleweight, arrived in Portland this morning. He is in fine shape after his long journey from the windy city and states that he will start active training for his bout with Barry this afternoon.

Burns is under the wing of Tommy

Tracey until the arrival of his manager. Billy Lavigne, who is expected here in a

## STUBBORN JOCKEY LOSING A FORTUNE

(Journal Special Service.)
oklyn, N. Y., Nov. 7.—Jockey Grover
land Fuller, who earned \$60,000 by
iding a year ago, is working in a
y stable in this city for \$3 a day
stable in this city for \$3 a day

the stable quarters until he was prepared to rigidly obey instructions. Fuller went away and has remained away since, though thousands of dollars have been lost to him personally and Benator T. D. Sullivan's stable deprived of his riding services. It has been a deadlock between Zimmer and Fuller, with both principles obdurate in their determination to hold out. Fuller's contract income was out off by Zimmer when the jockey refused to stand by the terms of their agreement. Fuller declares that he will continue to work in the livery stable rather than give in to Zimmer.

The new manager will begin at the work of running a 250-foot tunn tap the veins in the Taté Brothers' group is one of most promising prospects in the disand has already been developed by a 100 feet of work, showing several veint agreement. Fuller declares that he will continue to work in the livery stable rather than give in to Zimmer.

## BLUE RIVER ASSURED ANOTHER MILL SOON

(Special Dispatch to The Journal.)

Bugens, Or., Nov. 7.—A half interest in the Tate Brothers' group of mines, Blue river district, has been sold to E. A. Hamilton of San Francisco, who is an experienced mining man and millwright. Mr. Hamilton was formerly with the Union ironworks of San Francisco, and has devoted nearly all his life to mining and to the erection of mining and milling machinery. It was while employed in erecting the new mill at the Lucky Boy that he became impressed with the richness of the Blue river district. After completing his work at the Lucky Boy, Mr. Hamilton was employed by the Great Northern people in making ready for a new mill and tramway which is now being put in there.

The new manager will begin at once

# OF AN ALASKA MINE

Alaska coast is said by mining men fa-miliar with the various districts, to progress rapidly. The great mineral some seems to fringe the coast, convenient to sea traffic and where the air is never excessively cold. From Ketchican, the southern part in United States territory, to Cape York work is being done in many places, and the coming year will probably see heavy importations of mine and mill machinery.

(Special Dispatch to The Journal.)

Cottage Grove, Nov. 7.—Considerable work has been done this season on the Great Eastern company's property, in the south end of Bohemia district. Nineteen claims constitute the holdings of this company, and they are owned and controlled by Corvallis capital. They are divided into three groups. The main adit of the China creek group is in 450 feet, the breast of the tunnel being in concentrating ore.

The Sailor Guich group has three 100 feet tunnels with three feet of fine milling ore at the face of the drifts. The Twin Rocks group, at he head of Martin creek, has 125 feet of tunnel on a veln of milling ore and another tunnel running through the saddle is now in 100 feet of ore. The one opened by this season's work satisfies the company that it has a mine and machinery for the reduction of the ores is to be installed next spring.

UNCLE FRANKLIN

### **EVERYBODY SPEAKS** WELL OF PORTLAND

H. J. Stirling, newly appointed auditor of the Oregon Railroad & Nevigation company, took active charge of his office in the Worcester building today. He arrived yesterday from Omaha, accompanied by his wife and their youngest daughter, and they are quartered at the Hebart-Curlis, where they will reside. They have two daughters, who are students in an Omaha school for girls. Mr. Stirling is much pleased with the city of Portland as a place of residence. He said:

"Of the many people we talked with concerning the dity when we were considering the question of moving here, not one had a derogatory word to say. We regarded it as a fact quite remarkable that Portland had not a single detractor. Most cities, no matter how favorably situated, will always be criticised on some point by people who discuss their merits. But we think Portland a very good place to live in, aithough we were preposessed in favorably were preposessed in favorable.
