### RATHER DIE THAN LIVE HER OLD LIFE

Beautiful Ethel Cruzans, rescued from the Owl saloon in the north end district, was this morning made to stand for five minutes and gaze into the pale, careworn cheeks and bruised, blackened eyes of Fannie Sutton.

"You see what life in the north end district is," said Judge Hogue to the prisoner. "You see what a few years leads to. Do you prefer such a life, or do you wish to mend your ways and lead a good life?"

Miss Cruzans hung her head in silence.

"Fannie Sutton, if you had your life to live over—your existence in the north end to go through—would you rather live it, or be dead?" asked Judge Hogue.

"I would prefer death," replied Fannie Sutton.

She was in a most pitiable condition.
Ed Stiles, a ruffian, who recently beat out a pet dog's brains on the sidewalk while he was angry at a woman, had attacked her and had knocked her teeth out, blackened both her eyes and bruised her hadly. For this he will have to stand trial in the circuit court.

Judge Hogue, after the object lesson, committed Miss Crusans to the home of the Boys' and Giris' Ald society.

### **NET DRAWS TIGHTER** AROUND YOUNG WEBER

Blood-Stained Trousers Added to the Evidence-Inquest Continues.

(Journal Special Service.)

Auburn, Cal., Nov. 18.—The finding of a bullet in Julius Weber's body by the undertaker after the physicians had failed to find it during an autopsy is another important link in the chain of evidence in the quadruple Weber murder. It is of the same calibre as the bullets found in the bodies of Mrs. Weber and Bertha, showing that all three were killed by the same weapon. Diligent search failed to find any revolver in the ruins, although some money and melted jewelry was found. Part of the pantaloons which young Weber threw into the window were submitted to a physician before the sheriff took them to Ban Francisco for analysis. The physician is reticent and will make no statement; but is said to have let fall a significant remark that something would probably be done soon.

Little Francis Snowden, who visited the family on the evening of the murder, says she would not stay to supper when invited because Adolph and his father were quarreling at supper. The general sentiment seems settling down to a conviction that Adolph Weber is the murdared, and his attitude and the questions of the jurors indicate that such will probably be the verdict at the inquest. It is said that blood was found on the prisoner's undergarments.

### PHYSICIANS EVERYWHERE

Know the Value of Pyramid Pile Cure,

"Gratitude alone prompts me to teatify to the efficacy of Pyramid Pile Cure. Last March I bought a dollar package at the drug store, which cured me of bleeding piles, and I was a sufferer from them for eight years; but I had not been troubled with them since, until last September, when I gave birth to a baby girl, and after that I had a very severe case of protruding piles, which a trained nurse said was the worst case she ever saw, and my doctor told me to get Pyramid Pile Cure again, which I did, and was completely cured in three days. I have not had piles of any kind since, and it is all owing to this wonderful remedy. My nurse took a box, which I was glad to be able to give her, for I know she will be able to help lots of suffering people whom I could never see or know.

"I recommend "Pyramids wherever I know of any one suffering as I did. It gives me great ploasure to be able to any I am entirely cured, which my doctor says is true. I say God bless Pyramid Pile Cure." From a former great sufferer, Mrs. F. S. Ancett. 1206 Unity street. Frankford. Philadelphis, Pa.

This remedy, which us sold by druggists generally, in fifty cent and dollar psekages, is in a suppository form, is applied directly to the parts affected and performs its work quietly and painlessly. Its value is evidenced by the testimony given above, and we urge all sufferers to buy a package now and give it a trial tonight. Accept no substitutes and remember that there is no remedy "just as good." A little book on the Cause and Cure of Piles is published by the Pyramid Drug Co., Marshall. Mich, and will be sent free to any address.

John H. Smith of Long Island, Kansas, Visits Corvallis on Two Fold Mission.

(Special Dispatch to The Journal.)

Corvallis, Or., Nov. 15.—A recent visitor in Corvallis from Long Island, Kan., was John H. Smith. While he is in the west searching for a location, his object in visiting Corvallis was for the purpose of looking over the Benton county records in the hope of finding some trace of an uncle, John H. Lefelle, who left lowa in 1852 for Montana. From Montana John Lefelle came on to Oregon by ox team, and from the Corvallis postoffice Sent a letter to his sister. Mrs. Smith, in Kansas. That was the last heard of John Lefelle by his eastern relatives. The man who was in Corvallis a few days ago was a nephew of the traveler of 1852. It now transpires, however, that John H. Lefelle (whose name was also pronounced Level and Lovell was for many years a resident of Alsea valley in Benton county. There he married Miss Maxie Hayden, from whom he was subsequently divorced. During the civil war, after the separation from his wife, Lefelle enlisted in company D of a Washington regiment and served three years. After his return he married a Miss Tyce, near Independence, and three children, two boys and a girl, were born of, this marriage. The wife died and 28 years ago John Lefelle left this section of Oregon. Where he went or what has become of him is not known here.

### STRIKE OF OIL MADE IN A MONMOUTH WELL

(Special Dispatch to The Journal.)

Monmouth, Or., Nov. 15.—Much excitisment was created here last week by the discovery of oil at the Oregon State Normal school grounds. The well at the building had gone dry and the authorities ordered it bored deeper. In carrying out the order the well diggers found that the water which they drew up was covered with oil. A match was set to it and it burned. Men who remembered their own school days smiled at people's credulence and gave the matter he further thought, taking it for granted that certain of the normal boys could account for the presence of the oil better than anyone else. However, the matter has been investigated and the authorities have given out the announcement that the discovery is not a joke.

It seems probable that this place may yet become an oil center. The oil well recently opened north of Menmouth are less than two miles away, and Professor Buckam has been unable to get water that can be used from wells at his residence here, because of the presence of a slight coating of oil on the surface of it.
