SMELTER MANAGER IS. PLEASED WITH PLANT

Manager Fred D. Fuller of the Ore-gon Smelting & Refining company re-turned home last evening after a day's sojourn in Portland. ations.

turned home last evening after a day's sojourn in Portland. "Our plant is progressing very satis-factorily." said Mr. Fuller. "Receipts of ore increase, and we are able to draw from a larger number of proper-ties. A large proportion of the ore re-ceived is shipped over rail lines, which renders the management immune from local weather conditions." New contracts entered into by the sumpter smelter management and the stimulus given production broaden the scope of operation, and further insure steady patron for concentrates, and the Baisley-Elkhorn is reported to con-template material increase of its prod-uct after getting the additional equip-ment in operation. Manager Fuller does not care to go into details of his ore supply, but says that general results are highly satisfactory. 18 10
