# When Your Cold Catches You Just There There

is No Wait.

It is not a "little thing." It's a deadly thing. It will not "get well by itself" if you let it alone. Whiskey and quinine and such things brace you up for the time, but

they don't cure you.

Ask any intelligent doctor why you catch cold so easily. He will say, "Because you are a bit run down."

He means that the force which nature placed in your body to keep out disease germs—the resistive force—is weakened. The door is open a little way toward disease.

There is not a gravestone in any cemetery in the world caused by consumption or pneamonia or any lung trouble whatever, which did not start with what you call "Nothing but a cold."

A cold should not be beaten back or drugged over—it should be cured, and the general health should be built up.

# ENGLISH REMEDY

should be taken at the first symptoms of cold. It is a tonic for the whole body, a specific for sudden colds, coughs or sore throats. It doesn't matter where the cold is or how it got there, we know that Acker's English Remedy will reach it and cure it. It is sold on a positive guarantee.

NO OURE NO PAY. If you have a cold—no matter how slight—it means something. Take Acker's English Remedy at once. Keep it in the house. If it does not relive you almost instantly, we will refund you

"Acres's Excuse Remedy saved my life. A cough, slight at first, grew constantly worse and I finally had to give up my work in the Knife Factory at Walden. I had frequent bleeding spells. Was examined by local doctors, prominent physicians in New York and at a Medical College. They all pronounced my case hopeless. I began using Acres's English Remedy and a few bottles cured me. I am today a periodity well man."

(Signed) A. H. SIMPSON Watter, N. Y.
