OAK STS.

By a decision of Judge Frazer mailed yesterday to Klamath county, the irri-gation of at least 100,000 agres of arid land is made possible. It also enables the construction of a canst large enough for navigation 60 miles from Klamath lake. In the event the original plans are cerried out by the Klamath Canal company, one of the parties in interest, the irrigated area may be as large as 200,000 acres. to the newcomer. Some years ago Mr. Angus was a street car conductor on the lines of the Portland Street Railway company, but owing to some difficulty with the super-intendent he retired. It happened at a time when he was extremely short of funds. He never had been able to get shead financially, and owned nothing more than the usual limited amount of personal chaftels that men cannot well pet along without. Seeing no opening ally decided against dation by referring secretary, C. H. Mcl. McIssac is the irrigated area may be as large as 200,000 acres. Judge Frazer last summer went to Klamath Falls to hold court for Judge H L. Benson and hear a case involving principally right of way for irrigating canals of the Klamath Fally Irrigation company, whidh-has been operating for 20 years, and the Klamath Canal comset along without. Seeing no opening for work in this city, he resolved to go for work in this city, he resolved to go east. He whs loath to part with the few pieces of silver left in his pocket after he had discharged his small debts. He took passage on the blind baggage over the Oragon Ballroad & Navigation com-pany's line. At Hood River a brakeman put him off of the train. Wandering about in the little town, without a friend within its precincts or any hope of securing work there, he saw an ad-vertisement for berry -pickers: He promptly sought out the berry patch owner and accepted a job. Mr. Angus the other day refused \$15.-006 for his apple orchard in Hood River valley, about three miles from the town, where, nine years ago, the brakeman compelied him to seek and find the for-tune waiting there for him.

HOUSE SUGGESTED

Gates Sende Up, Wheat. The American Woelen Co. controls the output of woolen and worsted cloths of the United States. The price of wool recently advanced and the price of woolen goods was rapidly increased by the American Woolen Co. from 10 to 15 per cent on all wool goods; also as much as 25 per cent on certain weaves of fine quality worsteds. The above are facts known to every man, woman and child in the world that has wakched the capers of the market. The Chicago, the big store in the middle of the block. 65, 71, 73 Third street, between Oak and Pine, did not have any tip of the coming advance, but foreseeing that the Lewis and Clark fair crowds would cause a big demand for goods months ago, they placed orders for the year's supply in clothing, etc. getting advantage of low prices before the rise in woolens began. The great half for choice of over 500 all-wool and worsted tailor-made suits, worth \$12, \$15, \$18, is the grandest op-portunity ever seen in this city for the people to dreas well and do it at a price within the reach of every man.

practically decided against the proposed consolidation by referring the question to its secretary, C. H. Melsaac, for final decision. Mr. Melsaac is absent from the city, and is known to be opposed to combining the association with any other body. The board of trade has not shown any indication of favoring the consolidation plan suggested by the chamber. Officials of the board say they are working in their own way for the advancement of the city's intersets, and are occupying a field that is pecul-iarly their own. They have inaugurated a campaign for additional membership, and have established an official board of trade organ. The Oregon information bureau in the union depot is not responding favor-ably to the chamber's invitation to come in with its exhibit. George G. Birrel, assistant secretary in charge of the ex-hibit, said: "This bureau meets a special need, by reason of its location as welt as by its methods. Here at the union depot not a day passes that travelers stopping off between trains, or for a few hours, do not come into our rooms and examines the exhibit. They invariably become deeply interested in Oregon's resources, and carry away favorable impressions and literature that is bound to accom-plish much good for the state. During the last year 32,600 guich visitors regis-tored. I do not believe one-half would have attempted to find an exhibit in the chamber of commerce up town. We sent out during the year 37,000 places of liter-ature, wrote 944 letters, and received 495 lettgrs. The larger number of poople whom we have assisted to locate have bought farms or settled on government land are well gatisfied with Ore gon."

AT THE THEATRES. "Don Caesar de Basan."

The eminent actor, Charles B. apported by Marie Dreinah and an ompany of players, will begin an e nting the ro "Don Caesar de Bazan," which will al the bill for the special-price matines fom Saturday sight Bakaspare's great tr "Othello." will be the bill. It is to p fancy that the character of Don Caesar powerfully appeals, and Charles R. Has selection of this play as the subject to latest spectacular reviral is sate to with enthusiastic and universal approval. Hanford will again be accompanied by Meric. Drofnak, who will have the re Maritana. Seats are now selling for th gagement.
