

### TRUSTEES FEAR FOR UNIVERSITY

File Suit and Seek to Enjoin Forest Grove Officials From Issuing Saloon License.

WILL BE UNABLE TO OBTAIN FUTURE FUNDS

Land Originally Donated on Express Condition That No Liquor Be Sold.

(Special Dispatch to The Journal.) Hillsboro, Or., Feb. 24.—The trustees of Tualatin academy and Pacific university yesterday filed a suit in the circuit court of this county against C. N. Johnson, mayor of the city of Forest Grove, B. H. Laughlin, C. W. McNameer, John Cornelius, W. R. Harris, L. L. Hollinger and S. B. Starratt, councilmen, H. D. King, recorder, and Albert G. Watson, asking an injunction to prevent the issuing of a saloon license to Watson.

The complaint sets forth that at the time of the establishment of the university yesterday filed a suit in the circuit court of this county against C. N. Johnson, mayor of the city of Forest Grove, B. H. Laughlin, C. W. McNameer, John Cornelius, W. R. Harris, L. L. Hollinger and S. B. Starratt, councilmen, H. D. King, recorder, and Albert G. Watson, asking an injunction to prevent the issuing of a saloon license to Watson.

With this understanding many people are alleged to have purchased property and settled at Forest Grove to educate their children, and more have expressed their intention of doing so in the near future, and that if saloons are permitted in the vicinity the institutions will not only be unable to obtain future endowment funds, but the number of students will be reduced, the property of the institution will be damaged \$100,000 in value and the loss of donations and property already received will be threatened.

It is alleged that the charter does not give the mayor and council the right to grant a saloon license, and an injunction is asked to prevent the issuance of the license for Watson's saloon, which will be within 200 feet of the university gates.

Papers were served last night at Forest Grove upon the municipal officers and Watson. Answer must be made within 10 days.

### SMUGGLED ORIENTALS CAUGHT IN SEATTLE

(Special Dispatch to The Journal.) Seattle, Wash., Feb. 24.—Customs officers swooped down on the Wa Chong building yesterday afternoon and gathered in 12 alien orientals, who had been smuggled across the line within the past few weeks.

At the time of the raid a gambling game was in progress and so anxious were the players to get away that they forgot to gather up their coats.

This is the largest catch that has been made here in a year. It is known that many aliens are being landed in and about Seattle, and to the end of stopping the immigration 12 Chinese watchers have been added to the service. Their identity is not known and they work among their countrymen in the Chinese district and inform the customs inspectors. Through this medium it is the belief of the local officers that they will be able to rid the city of all unlawfully here.

### DR. PRATT IN PORTLAND.

His "Immediate Process" Accomplishes Remarkable Results.

W. Augustus Pratt, B. S., M. D., the inventor of the celebrated "immediate process" for removing deformities and facial defects, is now in Portland at Madame Vaughn's parlors, 15 Bellin-Hirsch building. Dr. Pratt is a very busy man since his arrival in Portland. He does not claim to be a "beauty doctor," but corrects any facial deformity or exaggerated expression.

The methods employed by Dr. Pratt and the results he accomplishes are remarkable. A person with a deformed nose can have it corrected within two minutes. By years of study and chemical research Dr. Pratt solved the problem of building up tissues. He has gone further than any one else in plastic-mastic science. It is such a wonderful accomplishment—such wonderful results. There is absolutely no pain in Dr. Pratt's treatment, but the most remarkable thing is that, while it represents the most advanced steps of surgery, no scars are left. By Dr. Pratt's "immediate process" a person can leave his office five minutes after entering it with a remodeled nose or an exaggerated expression removed. Dr. Pratt will be in Portland several days.

### BADGER SUES FOR STOCKTON CLAIM

Alleges That Half Interest of One Moran Has Been Purchased by Company.

INTERESTING CONTEST FOR TITLE COMES FIRST

Then Stockton Owners Speak of Suit for Stopping on Their Ground.

Monday of next week final evidence will be submitted in the suit of the Badger Mining company against the Stockton company, both owning properties in Grant county. Before a master in chancery a hearing has been in progress for several weeks, and Monday the rebuttal of the Badger company will be put in, consisting of the testimony of F. W. Bradley, Superintendent Kennedy and others. A decision is not expected for some time thereafter.

The Badger company seeks to establish its right to a half interest in the Stockton claim, the principal property of the Stockton company. This claim adjoins the side line of the Badger claim, the vein of the latter and also of the Bull of the Woods property cutting through the Stockton. The Badger company alleges that it has purchased the rights of William Moran, who several years ago bought a half interest in the Stockton on the condition that he was to do certain development work. The Stockton owners state that Moran drove a tunnel, found nothing, and abandoned his interests, which were later preserved from lapsing to the government by H. H. Ames, A. J. Simmons and associates. It is said that the affidavit of Moran has been secured by the Stockton management in defense of its title, while on the other hand, the Badger company exhibits a deed from the same individual.

The Badger, owned by an allied company to the famous Bunker Hill & Sullivan concern of Coeur d'Alene and Alaska fame, is one of the best mines of eastern Oregon. It is developed to a depth of 700 feet by a vertical shaft and exhaustive drifts, and is equipped with a 70-ton concentrator, compressor plant and mine machinery. It has produced for several years a remarkably rich grade of galena gold ore, and is said to have on the 700 level the best grade of ore yet opened in the mine.

While the workings of the Badger were only to a depth of 400 feet, the Stockton management secured an order of the federal courts for permission to examine the underground workings. At that time the surveyors found that the 500 level drift was up to the Stockton line, but there did not seem enough evidence for the beginning of a suit. The surveying party reported that a rich Badger shoot was pitching toward the Stockton. The last year the Badger management sank to the 700 level, where remarkable galena has been mined. Quickly on this development came the report that the company had bought the old interest of Moran, and would establish its title. This suit is the result.

Owners of the Stockton express their belief that the Badger has found the main shoot pitching into their ground, and that this suit is the consequence of an effort to control the adjacent property so as to permit mining therein. G. G. Ames, one of the principal owners, whose brother, H. H. Ames, the local attorney, is conducting the defense, was here and gave his testimony recently. He brought some of the ore that was said to come from the 700 level of the Badger, proving that it is exceptionally high grade. Mr. Ames also said that a rubner was current to the effect that the Badger on the 700 level had gone across the line and was taking out Stockton ore. But until the suit for title is adjusted no new order for an examination will be asked. However, when this litigation ends, it is the expressed purpose of the Stockton owners to determine if the Badger is encroaching, and if so, to demand a settlement and accounting.

### BAKER AND GRANT SEE A BAD PLACER SEASON

(Special Dispatch to The Journal.) Baker City, Or., Feb. 24.—The snows in the altitudes east and west of here where most of the early spring hydraulicizing is done, are moving off rapidly, and prediction is made that the season will be short. Outside men who own little property are warned to come to work them in the flood period. The season will unquestionably be from four to six weeks earlier this year than in 1904.

Up in the Greenhorn range where some likely placer claims were worked last summer, the snowfall this year has not been one half as great as it was the preceding season. Reports are to the effect that snow is melting rapidly already. M. N. Moriarty, one of the best known placer diggers in these parts, said he has several claims which it will be hardly worth while to even try working, because of the prospective shortage of water.

### COMMITTEE SEEKS TO BUILD ROAD TO MINES

(Special Dispatch to The Journal.) Glendale, Or., Feb. 24.—Business interests of this place continue aggressive for the improved road between Glendale and the Greenback's new road to Wolf Creek, and also for better communication between Glendale and the Mt. Reuben district. Since a committee was chosen to investigate the probable cost of this work, and report back to the citizens, interest has grown materially, and there seems every assurance that the work will be done, if the expense is not too heavy. There is assurance that the road back would do much of its banking business here if communication were direct, encouraging the establishment of a bank for that purpose. Mt. Reuben mines need better roads, and Glendale, the nearest important distributing center, is naturally looked on as the most available place to seek this help.

### SPRINGING ON SNOWSHOE

(Special Dispatch to The Journal.) Spokane, Wash., Feb. 24.—Reports from Snowshoe mine, near Libby, Mont., in which Spokane men are interested, is encouraging. The company has decided to sink 250 feet deeper. One hundred and fifty men are at work developing the group. Deeper work was started to determine the full worth of the ore body, and, if it proved to be a mine, the property is to be further equipped with machinery.

CLARK IMPROVES MINE. Spokane, Wash., Feb. 24.—Felix Clark,

# Half Past Seven Dollar Suit Sale

## The CHICAGO

THE BIG STORE IN THE MIDDLE OF THE BLOCK  
69-71-73 Third Street, Between Oak and Pine

### Seven More Selling Days

And this grand unparalleled Seven Dollars and Fifty Cents Sale of \$12, \$15 and \$18 Suits will be clothing history. It's an opportunity few men can afford to miss. Gives you choice of over 600 pairs of extra quality tailor-made Pants, in the most desirable of merchant-tailor styles; splendid \$5 to \$6 values.

the millionaire mine owner of this city, has gone on a tour of inspection to the Kootenay Belle mine, near Salmo, B. C., where he is working under bond and lease. He will also inspect the Queen group, adjoining on which he has a short option. This is Mr. Clark's first trip to these mines. His future action in regard to the Queen mine will depend on the result of his investigations, as the option has not much longer to run. The Kootenay Belle is worked steadily. A

shaft has been sunk 40 feet, the last half of which is in good ore.

#### PLACING PRESSURE PIPE.

(Special Dispatch to The Journal.) Grants Pass, Or., Feb. 24.—Manager M. C. Amert, of the Golden Drift, is placing the pressure pipe between the big centrifugal pump and the placers on the hill. Three carloads of this piping, with three giants and other equipment, arrived recently and the management proceeded immediately to place it. When the pipe is in position and the battery of giants stationed where washing is to commence, the Golden Drift will be ready to open full blast with the first big placer pumping plant of the state, and the largest equipment of this type known to the Pacific northwest.

### ROSSLAND ASKS FOR A CHANGE IN MINE TAX

(Special Dispatch to The Journal.) Rossland, B. C., Feb. 24.—Mining men of this camp are not content with recommending to the provincial legislature change of the mine tax law, but will press repeal of the 2 per cent gross tax by every means possible. At the meeting just held, the unanimous sentiment of the Rossland district was expressed in favor of a change. If one half cent gross tonnage tax cannot be had, local mine owners will accept the net profit tax suggested by the association at Nelson. The difficulty of arriving at a correct estimate of net profits is advanced as a reason why this should not prevail, and the ease with which a tonnage tax is collected is one of the government arguments for the present system.
