

BATTLING DANE AGAIN WINNER

Young Corbett is Disposed of by Chicago Lad in the Ninth Round.

CORBETT'S SECONDS SAVE HIM FROM KNOCKOUT

Nelson Demonstrates That He is Easily the Master of the Denverite.

(Journal Special Service.) San Francisco, March 1.—For the second time within a few months Battling Nelson of Chicago administered a decisive beating to Young Corbett of Denver, and successfully demonstrated that he is the former champion's superior.

As in the first meeting of these two little men the loser was not knocked out, but was beaten so badly that it was only a question of a punch or two when he would have been sent down for the count, and as on the previous occasion, his seconds threw up the sponge to save him unannounced.

Nelson had apparently mapped his plan of battle beforehand and adhered strictly to program and kept pounding away at the Denverite in merciless fashion, and gradually wore his opponent out, and when his seconds came to his aid, Corbett was completely exhausted.

Nine rounds were all that the Dane required in which to dispose of his two-time opponent, and in that short space of time Young Corbett received a terrific beating, which unquestionably sets at rest his ambition to regain the championship.

Corbett trained hard and for the first time in many years, faithfully, for this fight, but his career of dissipation had thoroughly undermined his staying qualities, that so distinguished him in former battles, that the terrific onslaughts of the Chicago lad gradually mastered the ex-champion's senses.

The betting element was greatly in evidence at last night's battle and more money was wagered on the outcome than on any fight pulled off here for some time. Nelson prevailed as favorite on the strength of his previous victory over Corbett and both men were backed liberally at odds of 10 to 8.

Nelson was the first to enter the ring and was greeted by thunderous applause when introduced by Announcer Jordan as "the hardest nut in the profession."

Young Corbett was introduced as "one of the most popular boys and best fighters in the profession" and was greeted by prolonged cheering. Following the introduction of the principals, James Edward Britt and Joe Gans were presented to the crowd and each made a short remark, after which a challenge was read from Eddie Hanlon.

Corbett was seconded by the finest array of talent that has assembled behind a fighter in many a day. They were Joe Gans, "Spider" Kelly, who is rated as the best second in the country; Tim McGrath and Billy McDonald. Nelson was represented by "Smiling" Metzger, Billy Nolan, "Kawhide" Kelly and Fred Landers.

Nelson started off immediately to make good his statement before the fight that he would wear Corbett out, and kept after the Denverite at all stages. As has been stated before, Nelson has been aptly named, for Battling thoroughly applies to him at all stages while in the ring with an opponent.

his seconds vociferously threw up the sponge. Jack Walsh of San Francisco refused the fight.

After the battle Corbett had no excuses to offer and appeared extremely dejected. On the other hand Nelson was jubilant, and stated that it is his intention to force another meeting with Britt.

The first and last rounds follow: Round 1—After shaking hands the men sparred for a few seconds. Corbett danced away, looking confident, while Nelson wore a more serious manner.

Corbett continued to dance around for fully a minute, trying to draw Nelson on. Then he quickly shot a straight right over the head and received a similar blow. Two lefts for the head corner, wild, and a straight right landed high on Nelson's chest. More sparring followed, and Nelson planted left to the stomach and Corbett drove his left hand to the face, bringing a thin stream of blood from Nelson's mouth.

Corbett put two lefts to the body and then drove a hay-making right to the body. Nelson then sent Corbett back to the ropes with a straight right to the forehead. Then they missed it narrowly. Corbett drove right to the face and then right to the ribs and left to the face. Corbett broke ground and received a straight left and then right straight to the jaw. Corbett sent two lefts to the face, and they shot straight to the chin, but Nelson retaliated in kind, giving blow for blow.

The champion was again buffeted about the ring, and a straight left to the jaw sent him against the ropes. Suddenly Corbett shot two straight rights to the jaw, but Nelson never budged an inch. Corbett rallied again, driving left and right to the face. They worked to the center of the ring. Corbett finally drove to the floor from a straight right, which caught him on the jaw. He took the count, got up, but was so groggy that he could scarcely stand. Nelson went at him like a tiger, but at this point seeing that their man was hopelessly defeated, the seconds threw up the sponge, and Corbett was borne to his couch. Nelson was quickly given the decision.

RACING RESULTS ON THE SEVERAL TRACKS (Journal Special Service.)

San Francisco, March 1.—Arabo won the handicap at Emeryville yesterday, defeating Letoia and Toledo. Pick'way a 10 to 1 shot, won the third race cleverly. Summary:

Six furlongs—The Volt won, Sterling Tower second, Yellowstone third; time, 1:14.

Mile and one-sixteenth—Hugh McGowan won, St. Nicholas second, Plank third; time, 1:47 1/2.

Mile and one-half furlongs—Pick'way won, Fort Wayne second, Silent Water third; time, 1:07 1/2.

Mile and one-quarter—Schoolmate won, San Nicholas second, Stilicho third; time, 2:04 1/2.

Six and one-half furlongs—Arabo won, Letoia second, Toledo third; time, 1:19 1/2.

Seven furlongs—Salable won, True Wing second, A. Muskoday third; time, 1:27 1/2.

At Los Angeles. Los Angeles, March 1.—Ascot Park summary: Mile and one-sixteenth—Lanark won, Lane second, Presto third; time, 1:48 1/2.

Five furlongs—Lindo Rose won, Sweet Kitty Bellam's second, Jerusha third; time, 2:04 1/2.

Four furlongs—Silver Wedding won, Sunfire second, Astral II. third; time, 1:48 1/2.

Mile—Sheriff Bell won, Cincinnati second, Cloverton third; time, 1:49 1/2.

Five and one-half furlongs—Latonde won, Pelham second, Forerunner third; time, 1:37 1/2.

Mile and one-sixteenth—Bronze Wing won, Golden Ivy second, Water Cure third; time, 1:48 1/2.

RETURN GAME AT CHEMAWA. (Journal Special Service.) Chemawa, Or., March 1.—The Deaf Mutes will play a return game here with the Chemawa basketball team on next Friday evening. The Chemawa manager has also arranged a game for this team to be played with the Salem Y. M. C. A. on Saturday afternoon.

The Willamette young ladies are desirous of playing the Chemawa girls on Wednesday of this week, but this was considered impossible, as the team here had not practiced since their disastrous defeat at Corvallis. A game may be arranged later, but is considered doubtful.

The manager finds hard work to arrange games for his first team. All the teams of the surrounding towns have been written to, but no favorable response has been received. The boys are now in good condition and are playing good, straight basketball.

INDIANS WILL HAVE A BASEBALL TEAM (Special Dispatch to The Journal.) Chemawa, Or., March 1.—The chances are bright for a very successful baseball season this year at the Indian school. The team has been reorganized under Teabo as captain and catcher.

Dr. John Nyman, school physician, has been elected manager, and Mr. John McMullin, assistant manager. Teabo was elected captain and Poland assistant captain. As there are over 40 applicants for the team, on Saturday they will have a tryout, and while the team will not be definitely settled at that time, it will possibly narrow the number down to about 20 possibilities.

Among the number of those who aspire to hold forth in the big game Paul Quashpaha, the grandson of Quashpaha, who was head chief of the Warm Springs Indians, Clifford Coombs, a full blood from Clatsop, and also aspirant to the same position. Today the grounds were put in first-class condition, and from this on the diamond will be occupied morning, noon and night, until an old-time Chemawa team is developed.

DATE SET FOR BOAT RACES. (Journal Special Service.) New Haven, Conn., March 1.—June 27 has been selected as the date for the holding of the Yale-Harvard boat race. C. H. Schweppe of Harvard was chosen chairman of the regatta committee.

AMPLE SPACE FOR MINERAL AT FAIR

But Mining Men Have Not Been Quick to Indicate What They Will Require.

OREGON CORNER HAS TWO THOUSAND SQUARE FEET

No Definite Plans Yet for Working Exhibits of Quartz or Placer Plants.

Applications for space in the mining building of the Lewis and Clark centennial have not been sent in with the interest that will develop later. As the time for finishing this work approaches there is more of a rush, and when it is too late of the management is crowded to the limit of endurance, it is feared many will be clamoring for positions.

That all mining men may understand what they can do in the way of exhibiting minerals, The Journal has made careful inquiries as to arrangements completed by both the state commission and Director of Exhibits Dorsch. If interested mining men will study the matter, and take prompt action, order and system will prevail in arranging the mineral exhibit. If the work is postponed until the last moment, a world of inconvenience to the fair management will result.

The mining building is 100 by 200 feet giving 20,000 square feet of space. Dedicated to the Lewis and Clark centennial for alleys or corridors through the exhibits, there will be 14,000 to 15,000 square feet of floor space for exhibits. The walls of the building may also be utilized to considerable extent, where the states making displays care to prepare cabinets.

Of this total space, what is known as the Oregon corner, has been set apart for the Oregon mineral exhibit. This space will be a minimum of about 2,000 square feet, and may be increased 2,000 square feet if needed. At the meeting to be held March 11 the state commission will choose a superintendent of the Oregon mineral exhibit, to have charge of this collection of minerals, and arrange it. This superintendent, if chosen, will remain until the state mineral exhibit superintendent is chosen. Naturally he will have to be given rather free hand in arrangement, and the commission is not disposed to take any action that will appear to bind him.

J. Couch Flinders, chairman of the mining committee of the commission, is now in Baker county conferring with mining men in regard to a representative exhibit. Shortly after his return the superintendent will be chosen. No applications have been filed with the office so far, which seems to indicate that it is not regarded as a sinecure.

The remainder of the mining building will be devoted to the various state exhibits of minerals, Montana, Wyoming, Idaho, Washington and California have already indicated a desire for space for mineral. Other western states no doubt will do likewise soon. Director of Exhibits Dorsch is making a tentative distribution of space, but will alter this as the necessities of the work develop. It is his purpose to give to every state ample power and latitude for such displays as may be desired and as will present mineral resources in proper manner.

Definite plans have not been formulated for a single working exhibit about the mines of Oregon. It has been discussed for milling plants and hydraulic equipment, but so far the men suggesting the matter have not followed up the thought with details indicating the purpose to erect such an exhibit. No doubt it is felt that one of the prominent manufacturing concerns will have a stamp mill, possibly a concentrator and a fire reduction plant.

In Oregon the collectors have sought to gather the best ore available, securing while at it such as would give the mining engineer an idea of the average product of a mine. In the placer line, the exhibit will range from the gold dust and amalgam to the largest nuggets that have been preserved in hydraulic operations. The Standard mine, of eastern Oregon, has asked for permission to furnish a great exhibit of cobalt ore, giving views of the cobalt product from the time that it is broken in the stoves until it is used in pigment purposes or as metal alloys. The Copperopolis asked for special display of a miner's cabin of copper ore. The Dixie Meadows management said it would make a notable exhibit, if permitted to do so. W. B. Dennis, owner of the big Black Butte quicksilver mine, in Lane county, will also be able to make a beautiful exhibit of his cinnabar ore if given the space. Bohemia mine owners have desired the privilege of making an exhibit of cinnabar. Secretary Giltner, of the state commission, said this morning that he felt that all desiring to make displays would be given full latitude, and thought there would be no trouble about space.

A superb collection of mineral is the desire of all. Most of this will naturally come from the northwest, but it is not the purpose to restrict on this respect, and the entire west will be given space. Assurance is had that most of the prominent camps will be represented by good collections of ores, and that the states leading in the mining industry will vie with each other to attract attention.

SUMPTER SMELTER IS NOT IN BIG COMBINE (Special Dispatch to The Journal.) Baker City, Or., March 1.—Manager Fred D. Fuller of the Sumpter smelter said today that the combine of the northwest smelters in no way affected the property of which he has charge. The exhibit of the smelter, however, are not officially cognizant that such a step has been or was to be taken. Personally he had known that such a plan was being promulgated, but he had not been asked to take any part in it.

The ore which is supplying the Sumpter enterprise is practically all new, and only very recently have any of the mines that were shipping to other points turned their ores over to the Oregon smelter. The fact that the local ore output is on the increase makes it reasonably certain that the present capacity will be taxed during the coming summer season. Mr. Fuller was not inclined to say anything

GROWING UP

There's something the matter with the child that fails to grow up. A child that grows up too much, however, without proper filling out of flesh, is almost as badly off.

Nothing will help these pale, thin "weedy" children like Scott's Emulsion. It supplies the rounding out of flesh and the rich inward nourishment of blood and vital organs which insures rapid growth a healthy and uniform development.

concerning his knowledge of the coming of the people making up its personnel.

LIFE TERM IN PRISON FOR STEALING A COAT (Special Dispatch to The Journal.) Seattle, Wash., March 1.—Life in the penitentiary at Walla Walla for stealing a \$30 overcoat states Tony Jurwich in the face. He admits the theft. He has already served two terms in prison for burglary — one at Walla Walla and the other at Salem.

An information has been filed charging him with his third crime, which, on conviction, means that he must go up for life, under the habitual criminal act.

ADVANCE IN LEATHER. (Journal Special Service.) Philadelphia, March 1.—The Morocco Manufacturers' National Association, representing 75 per cent of the producers of upper leather in the world, today put into effect a flat advance of 10 per cent in the price of their product. As reasons for the increase the manufacturers cite failure to reduce the tariff on hides, the constant increase in cost of raw material, and high wages. The advance will mean an increase in receipts of about \$2,000,000.

A household necessity—Dr. Thomas' Electric Oil. Heals burns, cuts, wounds of any sort; cures sore throat, cough, catarrh, asthma; never fails.
