Forty Per Cent of Those Who Go Secured Option on to the Yellowstone Are Europeans.

NEW SKYROCKET GEYSER KILLS OLD CONSTANT

Government Spends, Quarter of a Million in Improvements in National Grounds.

The government has spent \$250,000 in mprovements in Yellowstone park in road and other conveniences are in good condition. There will be immense travel through the park this year, by tourists coming to the Lewis and Clark exposi-

through the park this year, by tourists coming to the Lewis and Clark exposition.

Reports received at Northern Pacific headquarters from officials of the Yellowstone Park association indicate that the new geyser in Norris basin is a permanent attraction. It has been named the Skyrocket because of the peculiar appearance it presents when it spouts. Its coming has, it is believed, proved the death of the Constant geyser, located in the same basin.

The Skyrocket plays at regular Intervals, three times a week, and spouts boiling water to an immense height. Ah odd fact in connection with its coming is that it was born on Washington's birthday, when it spouted to a height of 200 feet. The noise accompanying the discharge was teriffic and attracted the attention of troopers in the park.

President H. W. Child of the Yellowstone Park company, which operates the hotels and stage lines, discovered a curious fact in compiling figures on the travel into the park last year.

"Forty per cent of our 9,000 visitors last year," he states, "were foreigners—people of intelligence and means for the most part, from Germany, France, Austria, England, Spain, Norway and Sweden, and even Russia. Almost every government and principality of Europe was represented in the small army of people who came across the Atlantic to see the wonders of nature in the Yellowstone park.

"In foreign countries the principal features of Yellowstone park are treated in the small army of the park are treated in the principal features of Yellowstone park are treated in the principal features of Yellowstone park are treated in the principal features of Yellowstone park are treated in the principal features of Yellowstone park are treated in the principal features of Yellowstone park are treated in the small army of the propers of Yellowstone park are treated in the small army of the propers of Yellowstone park are treated in the small army of the propers of Yellowstone park are treated in the small army of the propers of Yellowstone park are treated in the

"In foreign countries the principal features of Yellowstone park are treated at length in the school text books. This accounts in a measure for the interest of foreigners in Yellowstone park. The records prove that hundreds of these visitors from afar travel three-quarters of the way across our country and back again to the Atlantic seaboard and see practically nothing but New York city and Yellowstone park. Whatever addi-tional information they glean must be obtained from the car windows en

SUED BY FATHER

Miss Cosper Settles With Parent, ZINC OPERATORS ARE Who is Excoriated By Lawyer.

E. Cosper, who sued his daughter. Orphs Cosper, for \$535.13, for money loaned her, last night agreed to settle the claim by paying his daughter \$100 and taking the furniture which she had bought with the money secured from him.

Cosper filed a complaint in the cir court, in which he alleged that he loaned his daughter \$479.80 at one time, and \$17 at another, the principal and interest amounting to \$535.13. She bought furniture to establish a rooming-house, and had not paid her father the money he advanced. Attachment proceedings were begun, and the house was closed by the sheriff, on orders from

Cosper.

E. A. Hufford was employed by Miss Cosper to defend the suit, and went to interview Cosper in the hope of effecting a settlement. Cosper was insistent on receiving the full amount claimed to be due, and then Mr. Hufford delivered a diatribe, speaking plainly his opinion of the parent. He cited the facts of his driving her into the streets without provision for her shelter on a stormy provision for her shelter on a storm; night, and otherwise excoriated him.

BARUCH COMBINE **EMBRACES COAST**

Smelter and Two at Everett and Tacoma, Washington.

NO REPORT OF ANY OTHER **NEGOTIATIONS HEARD**

Movement Believed to Be Work of New York Promoter, and Not the Smelter Trust.

Since Fred W. Bradley of the Tacoma smelter stated in this city that negotiations were being made for northwest smelting plants, nothing has cropped to indicate the trend of proceedings except the report from San Francisco that an option has been secured on the Selby, It is reported on good authority that the Selby management gave Bernard M. Baruch, the New York broker, the option at \$1,700,000 and after securing this Mr. Baruch took the train for New York. Before he departed it was said on good authority that he had secured options on both the Tacoma and the Everett smelters, the consideration for the first being \$4,000,000 and for the latter \$700,000.

Further information of the proposed smelter combine is not made public at this time. There is a general conviction that the American Smelting & Refining company is not promoting the merger, nor that Baruch represents the trust, as the Everett plant belongs to it. Mining men who have followed developments believe that the represents merger is an effective that the represents the trust as

the Everett plant belongs to it. Mining men who have followed developments believe that the proposed merger is an effort on the part of Baruch and associates to float a great concern embracing the northwest plants, independent of any existing combine. With the options he secured in his pocket, the New York promoter has returned, and if he is able to carry his plans out, will probably report soon on results.

It cannot be learned that Baruch has negotiated for other smelters. The Mountain Copper company of Shasta county, California, has a two-furnace plant at Keswick which handles custom ore and the same company is erecting another smelter at Indian Head, near San Francisco. The Northport smelter, near Rossland, handles considerable custom ores when running at capacity, as it has six stacks. The Trail plant, on the British Columbia side, handles the ores of Rossland and adjacent district, the British Columbia side, handles the ores of Rossland and adjacent district, drawing silicious products from across the line when needed. The Boundary smelters reduce ores from Washington only when silica is required to mix with the base product of that region.

Manager Fred D. Fuller of the Sumpter smelter, in this state, said no negotiations had been entered into for his plant, but as this is confining lizelf

plant, but as this is confining itself D BY FATHER

TOR MONEY LOANED

plant, but as this is confining itself largely to eastern Oregon and western idaho, it may not yet be regarded to figure prominently in the smelting situation of the northwest. It assems that options have been obtained on but three smelters and perhaps this is the extent of the consolidation proposed by the

ALARMED AT B. C. MINES

(Special Dispatch to The Journal.)

Denver, Col., March 21.—There is apparent alarm in the zinc fleids of Colorado and Missouri over the British Columbia tonnage received from the north by local smelters. This tonnage is not large yet, but seems to grow rapidly, and late reports are to the effect that the United States market has stimulated wonderfully a number of Slocan mines. The North Star has contracted to deliver 2,000 tons of high-grade ore. The American Boy has been making small liver 2,000 tons of high-grade ore. The American Boy has been making small shipments, and there are several other properties with light tomage in sight, which are getting ready to ship. Some of the Denver and Missouri mine owners thought the new Sullivan group smelter being put in commission at Marysville, B. C., would hold the British Columbia product at home, but it seems to increase, rather than diminish. Should the tonnage continue to grow for anthe tonnage continue to grow for an-other year, it seems probable that the domestic operators will be clamoring for a duty.

RAWHIDING SEASON AT SLOCAN IS OVER

(Special Dispetch to The Journal.)
Sandon, B. C., March 21.—What is known to local miners as the "rawhiding" season is past for this district. To the uninitiated, it must be explained that "rawhiding" ore means hauling it over the surface of deep snow, usually over the surface of deep snow, usually in a cowhide, placed with the hairy side down. When snow is firm, so that an animal can walk on the frozen surface, a team will draw heavy loads in this manner, the distribution of the burden over the area of a skin preventing breaking through the crust. But when the warm season comes, with soft snow in the day, "rawhiding" stops, as this system of hauling requires no roads and the cheapest of all vehicles, it is looked forward to by the isolated operator as the opportunity to do a large amount of hauling. "Rawhiding" as a rule is done where hills are steep, and the load is hauled down; nothing is taken back on the return trip.

HEAVY MATTE SEIPMENT.

Manager Fred D. Fuller, of the Sumpter smelter, with H. T. Hendryx, a mine operator of the same camp, spent Sunday here. They state that spring finds Sumpter lively. Four carloads of matte were sent from the smelter one day last week, which is the largest single shipment yet made. Receipts of ore continue satisfactory, although breaking roads have interfered with hauling by wagon to some extent. The different mines furnishing ore to the smelter this winter are in shape for even better production this summer, and some new shippers are expected. new shippers are expected.

CYANIDE FOR LINCOLN.

(Special Disputch to The Journal.) (special Dispatch to The Journal.)

Pearl, Idaho, March 21.—Three shifts are steadily on duty at the Lincoln sinking the new triple-compartment shaft, which is to be the main working shaft of the mine. Manager Edwards is rushing connections from this shaft to the main ore bodies, so that by the time the

Are You Engaged?

Engaged people should remember, that, after marriage, many quarrels can be avoided by keeping their digestions in good condition with Elecric Bitters. S. A. Brown, of Bennettsville, S. C. says: "For years my wife suffered intensely from 'dyspepsia, complicated with a torpid liver, until she lost her strength and vigor, and became a mero wreek, of her former self. Then she fried Electric Bitters, which helped her at once, and finally made her entirely well. She is now strong and healthy."

Red Cross Pharmacy, Sixth and Oak streets, on the way to the postoffice, sells and guarantees them, at 50c a bottle.

same may be delivered through the new working. The hoist to be put on this shaft has great capacity, and will handle all development work and the mill ton-nage for a long time.

MILL AWAITS ORE.

(Special Dispatch to The Journal.)
Pearl, Idaho, March 21.—The Black
Pearl management of this camp has received a milling plant and has the building material to creet the mill, but will
not commence to do so until well in the
summer. Development on the shaft levels is being rushed, and the showing
had assures the company a reserve soon
for even a larger mill than has been delivered.

GOOD STRIKE REPORTED.

Cottage Grove, Or., March 21.—Frank Jordon, a local mining man, received news from his brother at Grants Pass of a strike in a claim they own together. and no further details of the strike can

ANOTHER RECO DIVIDEND.

(Special Dispatch to The Journal.) Vancouver, B. C., March 21.—John M. Harris, president of the Reco Mining company, of Sandon, has announced that the Reco will pay a second dividend of \$20,000 soon.

ENORMOUS INCREASE OF WESTERN TRAFFIC

Railroads Cannot Handle Business-Fifty Thousand Cars Short.

(Journal Special Service.)

Chicago, March 21.—Leading railroad officials of Chicago say that the roads running east and west out of this city are 50,000 cars short of meeting the present orders. Shipments of general merchandise are breaking all records. The volume of westbound general merchandise over western roads is beyond all precedent and the equipment and capacity of the roads are taxed to the utmost.

The officials say that, large as the volume of merchandise traffic now is, it is barely sufficient to meet the necessities of the sections to which it is consigned, and the merchandise is consumed as fast as it reaches its destina-

Country merchants are accumulating no stocks, and, indeed, it is difficult to get goods delivered fast enough to supply immediate needs. Should the year ply immediate needs. Should the year bring forth average crops every road in the country will be in need of large ad-ditions to its equipment.

TONY PASTOR A STAGE MANAGER FORTY YEARS

(Journal Special Service.)

New York, March 21—in the little green room off the stage of Tony Pastor's theatre today were a few baskets of flowers and on a desk scores of letters and telegrams. "Tony" Pastor had received these and also the personal congratulations of many friends upon completing 40 years of active theatrical management. Mr. Pastor is dean of New York managers, and if it would not be giving too fine a line on his age it might be added that he was a legitimate actor, circus clown and variety performer for quite a few years before he became a theatre manager, in 1865.

Among those who sent letters or telegrams of congratulations were Nat Goodwin, who was one of Mr. Pastor's early variety performers; May Jrwin, formerly of the Irwin sisters; Daniel Frohman, Klaw & Erlanger, Hyde & Behman and Montgomery and Stone.

Mr. Pastor became the manager of a road company on March 21, 1865. He opened his Bowery opera house in August of the same year. In 1875 he moved to Broadway, and on October 24, 1881, took possession of his present house, next door to Tammany hall.

ATTRACTING

nvalids Arrive on Every Train Seeking the Aid of the California Healer Who Is Caring All Manner of Sickness Without Any Medicine Whatever, at 23-24 Selling-Hirsch Building.

Esalers, doctors, physicians and min-isters are calling on Er. C. W. Earris to obtain relief from their suffering. The halt, the lame and the blind, tender youth showing ravages of disease; scalle-old age, bent and broken—they all come to Esaler Earris for relief and ours.

Diseases of every nature and kind apply for treatment. Every disease known to man can be and is cured by this treatment, but there are some persons who cannot be cured. Every day surprises come to people who apply for treatment when Healer Harris informs them he can do nothing for them. It is well that all persons should take advantage of the offer that is being made to sick people at this time, relative to securing a consultation and treatment for nothing by bringing the advertisement to the office, for this is not going to last much longer; not that Mr. Harris is not willing to consult with you free, but he cannot take the time away from some other person who is waiting and ready to take the treatment. The time is limited on all free work, for it consumes just as much time to talk with one as it does to give him a treatment. Therefore, those who cannot afford to pay for consultation, had best take advantage of the offers that he is making today, tomorrow may be too late.

Lectures Three Times a Week It is the intention of Dr. Harris to start this course of instruction not later than next week, and arrangements should be made in the next few days, for as soon as this class commences the price will be advanced to twenty-five dollars or more. Remember these tectures bring out all the good there is in a man or woman, and teach them not only how to take care of self, but you have a profession by which money can be earned if one so desires. C. W. Harris, 3864 Washington street.

PROPOSED ASSESSMENT TOR IMPROVEMENT OF EAST ALDER STREET.

Notice is hereby given that the Auditor of the City of Portland has prepared a proposed assessment for the improvement of East Alder street from the cast line of East Thirty-eight street from the cast line of East Thirty-eight street to the west line of East Thirty-ninth atreet, and has ascertained what he deems a just apportionment of cost of the improvement in accordance with the special and peculiar benefits derived by each parcel of land and lot or part thereof within the assessment district, and has apportioned the cost for said improvement in the amounts set opposite each parcel of land and lot or part thereof as its share of such proposed assessment.

Any objections to the apportionment of cost for said improvement must be made in writing to the Council and filed with the Auditor within 15 days from the date of the first publication of this notice, and said objections will be heard and determined by the Council before the passage of the ordinance assessing the cost of said improvement.
