HART EXPECTS TO DEFEAT JOHNSON

Louisville Heavyweight and His Friends Are Confident of Winning From Negro.

(Journal Special Service.)
San Francisco, March 27. — Marvin art of Louisville and Jack Johnson, a clever heavyweight fighter, will set in a 29-round bout before the area valley club tomorrow hight, and le Hart crowd is displaying a great sal of confidence over the butcome, as has trained with Jimmy Britt as a parring partner and is in first-class endition. The same is said of Johnson, the has been doing his practice work in ompany with Jack McCormick and Denver Ed" Martin. Interest in the light is increased by the opinion that he winner will probably contest with leffries at an early date for the heavy-weight championship.

Ten thousand demone gnawing away at one's vitals couldn't be much worse than the tortures of itching piles. Yet there's a cure. Doan's Olpiment never ranged the match, states that Briggs declines to meet the Akron lightweight.

PORTLAND AT LOS ADGRESS.

(Special Dispatch to The Journal.)
Los Angeles, March 27. — Manager Walter McCredie and his Portland baseball team arrived here this morning and will commence a few days' preliminary work at Chutes Park this afternoon. The members of the Webfoot team, in addition to the manager, are catchers, Swindells and McLean; pitchers, Garvin. Essiek, Jones, French, Cates, Gilpatrick and St. Vrain; infielders, Clarke, Atz, Schlafley and Runkle, and outfielders, Van Buren and Householders.

ers. Clarke, Als. Schlassey and Runkle, and outsielders. Van Buren and Housebolders.

The new Portland team is in excellent shape and if confidence among the players is any criterion, they will be found in the first division. Every man in the club is unhesitating in asserting his belief that the Webfooters have the goods, and are going to deliver the same right off the reel.

It is plain to be seen that Jim Morley is not going to have any cinch during the latter part of this week, for a likelier looking bunch of ball tossers have not invaded this town for sundry moons than this same Portland team.

Virgil Garvin, the crack twirler of the Webfooters, is keeping himself in fine condition, and when he faces the Seraph bunch on the opening day, as he is expected to do, they will find a hard not to crack.

Manager McCredie was asked what he thought of Hank Harris' recent comment on his team, and replied:

"Watch us when we stack up against that Trisco bunch. Most of my men are exceedingly sore at Manager Harris' comparisons, and you can bank on it that they will show Harris a few pointers on doping baseball clubs. I am willing to bet that Wen French beats Joe Corbett and intend to pitch him against little brother, and Garvin will take care of any twirler Harris cares to spring. Bill Essick, whom the Frisco manager refers to as a busher, is going to pitch two games against that club, and when he gets through Harris will wish he had a few bushers like him. French is also anxious to go against the Seals twice next week. I released Coe and Gleason. They are fast youngsters, but are not yet speedy enough for this company. We are after the pennant and will give somebody a mighty run for the flag."

PERST GAME POSTPONED.

Automatic Feeders Are Charging Two Furnaces and Others Will Be Added Soon. Dan Murphy, the crack rowing coach who is to put the Portland Rowing club's caremen through their paces, arrived in this city yesterday, and the members of the local club are preparing for active practice as soon as the club's equipment is prepared.

NEW STACK AND FLUE TO SUPPLEMENT OLD ONES

Additional Furnaces Will Be in Commission by New Fiscal Year, July 1.

BROAD COPPER BELT IN BLUE MOUNTAINS

(Special Dispatch to The Journal.)

Baker City, Or., March 27.—The work of the Indiana copper mine. 20 miles from this city, has attracted the attention of mining men to the copper belts of the Blue mountains, and reminds them that there has been remarkably little real development for this metal. Copper is widely distributed over the great mineral zone, appearing in strong veins at several places, but singular as it may seem, good surface showings have been given little attention.

Immahs, the newest mining district of the state, is the scene of what seems to be a determined purpose to open the strong copper veins there. This is the most northerly district of the eastern half of the state. The Eureka, Fargo and Western Union companies, all having superior tunnel propositions, and driving to open their veins at depth, and this year will no doubt be ready to take up the treatment problem.

Oregon's extension of the Seven Devils copper district is found from the Snake river opposite the Seven Devils to North Powder, covering the Panhandie region. On the Snake are the Iron Dike and McDougal mines, which The east side team defeated the All Stars yesterday by the score of 11 to 3, and are now anxious to arrange a game for next Sunday with any team in the city. Challenges should be addressed to John King, 564 East Burnside. THE NIPPER BURGLAR

pair of fine pinchers for cutting local to North Fowder, covering the Fands and a full kit of burgiar tools. They were all cached in a barrel inside the house occupied by the couple.

It has also been learned that Goldstein was released a year ago from the prison at Sing Sing for burgiary. Since coming to Seattle, about a year ago, he has pretended to be a peddler and it is the belief of the police that he used this occupation to spot houses and to cover up his criminal career. The wife he murdered he married three weeks before the tragedy. At is believed she knew his past.

STEAMER LEWISTON TO

GO OUT OF SERVICE

have been opened near these mines, and some will in all probability be worked when transportation is given the district.

The Copper Butte district, 20 miles from Baker, had a small matting plant many years ago, and the rich siag yet there indicates that there was abundant copper in the ores it handled. Merely surface work has been done here by J. R. Glikison and the other operators who have held on for many years, hoping that heavy capital would some day take hold of their properties. The work of J. W. Messner at the Indiana, where a 500-foot shaft in being sunk is the first substantial reward of this long wait, and seems entirely satisfactory.

Goose creek district, near the Copper Butte, has several prospects on which surface work has been done for the past three or four years, and a good showing is said to be had there. Burkemont, lying nearer the Snake, is the scene of the work dose by Judge Thomas Burke, for the North American Copper company, which is now in the courts. Shallow shafts have been sunk here, showing an immense distribution of copper, but those who have taken hold do not find values sufficiently concentrated to press heavy work.

There is scarcely any copper in the main part of the country about Sumpter. The next appearance of the metal in commercial quantities to the sputh is in Quartsburg between the middle and main forks of the John Day, which Waldemar Lindgren pronounced a promising copper district. Here the Copperopolis has by adit work opened a great vein, portions of which run exceptionally high in copper, and will press operations this year. The Standard has one vein system which as a rule carries commercial copper wherever opened. No other property of the camp that has received much attention has the red metal in appreciable quantity.

Imnaha and Quartsburg, about 200 miles apart, in a direct line, yet seem to be in one great, fairly continuous mineray sone, giving to it a copper point at either end.

YUKON MEN DEMAND A CHANGE IN MINE LAWS

(Special Dispetch to The Journal.)

Dawson, N. T., March 27.—Mining men of this country are strongly backing the work of Dr. Alfred Thompson, representative of the district in the dominion parliament, in his efforts to have material modification of mineral laws made. Dr. Thompson will try hardest of, all to change the size of placer claims, so that one claim will have 500 feet width on the creek, and extend back 1,000 feet, instead of having a width on the creek of but 250 feet and extend back 1,000 to 1,500 feet. Other changes will be sought, making Yukon regulations conform as nearly as possible to the mining laws of the British Columbia province, which are regarded as high types of excellence.

RICH SILVER MINE IN

(Special Dispatch to The Journal.)
Washington, D. C., March 27.—Consul General W. R. Halloway, at Halifax. Nova Scotta, has reported that the silver mine discovered north of Massey, near North Bay, Ontario, has produced phenomenally rich ore. He says that four carloads of the ore sent to a New Jersey smelter yielded \$60,000 net, and two more carloads have been sent which assays indicate will run at least \$15,000 to the car net. The discovery is near the Bruce mines, which have been well-known for some time, but never yielded such ore as that taken from the new strike. The size of the vein or ore body is not indicated.

VINCENT ASTOR ILL. (Journal Special Service.)
London, March 17.—Vincent Astorson of Colonel Astor, is dangerously if here. The boy is heir to one of the largest fortunes in the world and is millionaire in his own right.

GO OUT OF SERVICE

THINK MURDERER WAS

(Special Dispatch to The Journal.)
Lewiston. Ids., March 27. — The steamer Lewiston will go out of commission March 20, and the trip to this city Duesday evening will be the last time the old craft will tie up at the Lewiston dock. The Lewiston will be moored at the Riparia shipyards and the boiler and cabin removed to the new boat being constructed at that point. The hull will be drawn from the river and torn to pieces and it is expected that the new boat will be ready for service as early as May 15. During the intervening period the river business will be handled by the steamer Spokane, thus giving the upper river a boat service three times a week.

SHVERE HALL STORM.

(Special Dispatch to The Journal.)
Chemawa, Or., March 27.—A severe hall storm visited this vicinity about 3 o'clock yesterday afternoon. How much damage was done to fruit it is hard to tell. The storm was local, coming out of a black cloud that, while it hung overhead and dealt destruction, was fringed on all sides with blue sky.

SCOTT'S EMULSION Scott's Emulsion

Scott's Emulsion Scott's Emulsion Scott's Emulsion Scott's Emulsion

the old story, told times without number and repeated over and over again for the last thirty years. But it's always a welcome story to those in need of strength and health. There's nothing in the world that steps wasting diseases as quickly as Scott's Emulsion.
