MAY CALL AT MANILA.

(Special Dispatch by Leased Wire to The Journal)

Manila, April 22.—Narito Garro, the Japanese consular agent, was notified by telegram that Admiral Togo's squadron will assemble south of Formosa. He has also received a cablegram addressed to Vice-Admiral Kamimura. It is inferred from this that Vice-Admiral Kamimura is about to make a call at this port.

These telegrams, following the imperative instructions recently forwarded to Admiral Togo from Tokyo, following an extraordinary session of the elder statesmen of Japan that had been called to prepare at once for action, are construed to mean that the great sea fight is at hand, and that it will take place either in the open China sea in that stretch of water lying between Hainan and Formosa islands, or when Togo bars the passage of the Russian fleet through the Formosa straits of Beashee channel. The Straits of Formosa and Beashee channel form the two north-eastern exits from the China sea. The straits lie between the island of Formosa and the Chinese mainland, while the channel lies between Formosa and the northern extremity of the island of Luzon.

CRASH AT ST. LOUIS.

Bull Contingent Utterly Routed and Speculator Buffeted Heavily.

(Special Dispatch by Leased Wire to The Journal)

St. Louis, April 22.—Though much stronger than in Chicago, the May wheat option was under selling pressure in the St. Louis market today. At the close of the day's session it was generally believed by the traders that the bull contingent which was said to have been under the leadership of Corwin H. Spencer, had suffered heavy losses.

At one time the May option was six cents a bushel below the closing at the previous session, but a portion of this loss was neutralized in the last hour and the net loss for the day was 5 1/2 cents a bushel, the closing price being 91 1/2 cents a bushel. It was a matter of current gossip on exchange that Spencer's position in this market was about the same as Gates in the Chicago.
