### WATER FAMINE HAS GRIPPED MT. TABOR

Lawns and Flower Beds Must Depend on Heavens for Nourishment.

**METER SYSTEM IS NOT POPULAR WITH PATRONS**

Freely Charged That the Machines Register Warm Air for Most Part.

The east side of the Journal is in the city of Mt. Tabor, 300 feet above Morrison street. Telephone East 274.

The prevailing tint in Mt. Tabor lawns will be brown this summer, from present indications. Mt. Tabor has been blessed with abundant verdure and every hillside is a green carpet after the recent rains, but when the sprinkling cart of nature quits, and a hot sun works week after week on the lawns and gardens, dead grass and withered plants will remain of the spring glory, for Mt. Tabor has no water. That is, Mt. Tabor has no water for irrigation purposes, and even the man with a thirst has to collect his drop by drop in the dry season, the family faucet refusing to "give down."

The Mt. Tabor water supply comes from a spring and every drop of the supply has been used this winter in meeting the modest demands of the family laundry, but when the first dry days came and water was really needed the spring did not increase its capacity, while the demand grew and grew till only a rush of warm air greeted the man who tried to extract a drop or two out of the hydrant.

The latest announcement of the water company is to the effect that no water will be supplied for irrigating purposes this year unless it is taken through a meter at the rate of 50 cents the thousand gallons. The meter system does not appeal to the patrons of the company, for it is generally charged that the meter registers air as well as it does water, and that under the low pressure at present maintained in the mains there is 800 gallons of fresh air and 100 gallons of water in every 50 cents worth. One citizen tried it and alleges that his irrigation bill for one month was \$40, and he had a lawn that covered part of one lot and in court he freely charged that the meter worked after hour when the water was shut off entirely.

Therefore the Mt. Tabor people are adverse to adding water meters to their troubles, and no meter no water, is the motto of the lawn and gardeners. The question of the laws of the cow question will be forever settled, no self-respecting bovines preferring dry grass when fertile fields lie over in Mt. Tabor.

#### ONE SIGN CAUSES MANY ARRESTS.

A small free-wood sign will probably cause the arrest of a dozen or so citizens, none of whom believed that he had violated any law in helping a benevolent owner dispose of waste lumber. J. E. Burke is trying to discover where 75,000 feet of lumber belonging to him, has gone, after another man had placed a free-wood sign over the pile. He yesterday secured judgment in the east side court against J. E. Havelly for \$5, and also filed complaint against E. Hoeman, S. D. White, J. N. W. Hensell and W. Martin, charging each with taking the 75,000 feet, his purpose being to discover just how much they did take, and if possible find where the rest of the pile went.

#### REVIVAL AND DANCING.

Mt. Tabor has a union revival this week, but worldly pleasures are not entirely forgotten. The ball team is tearing up the sod on half a dozen vacant lots in an endeavor to master the national game, and the big dance hall at the end of the car line is being refitted, in anticipation of the summer dances which will soon be commenced. Three dances each week will be held in the hall, and it is probable that next season the place will have to be enlarged.

#### THESE TEEN ONLY WORKS.

Mt. Tabor has no houses for rent, and not only are outsiders who wish to locate there disappointed, but residents of the place who are renters suddenly find themselves without a home. Professor Adams, principal of the Mt. Tabor school, was recently forced to give up his house and for weeks sought for another in the suburb, but failed. He will move to the grove on the hill overlooking the place, and try the delights of open air existence for the summer, a tent proving the only home available.

#### PROFITABLE YEAR FOR PARISH.

The year just closed by St. David's Episcopal church was a profitable one, according to annual reports presented at the yearly meeting last night. During the year \$4,500 was raised for the church, the Sunday school raising \$370. Rev. G. B. Van Waters, rector, presided at the session. The following vestrymen were elected for the coming year: E. J. Joseph, W. L. Hales, F. S. West, Dr. F. C. Sellwood, Wallis Nash, J. G. Royle, J. C. Burness, E. A. Wyld and J. W. Ganong.

#### BROKEN ARM BROKE TWICE.

Ida, the 5-year-old daughter of Mr. and Mrs. J. D. Eller of Montavilla, fell and broke her right arm Sunday while playing. The peculiar thing about the accident is that a year ago the child fell and fractured the same arm in almost the same manner. It is supposed that the old fracture had not thoroughly healed and it is feared that the recent break will resist treatment stubbornly.

#### DEATH OF MRS. BURROUGH.

Montavilla friends of Mrs. Lloyd Burrough learned of her death yesterday, her husband sending a message from Massachusetts that she had died there Saturday. Mr. and Mrs. Burrough were well known in Montavilla, and their marriage took place in the suburb. They left for the east a year or so ago, where they have since resided.

#### ATE HOT CAKES MADE FROM POWDERED ARSENIC

(Special Dispatch to The Journal.)  
Seattle, April 23.—Mrs. Edward Moore and her mother, Mrs. Breitenberg, of South Park, were poisoned yesterday, but not fatally, by eating hotcakes mixed with arsenic instead of flour. There was a small quantity of arsenic in a pan in the pantry, and Mrs. Moore, thinking it was flour, mixed it with other flour and made the cakes.

### GARBAGE PROBLEM WORRIES DOCTORS

City Reduction Plant Must Be Shut Down While Extensive Repairs Are Made.

**FURNACE WALLS HAVE BEEN BURNED THROUGH**

Effort Will Be Made to Deposit Refuse on Farm Lands Near Town.

What disposition will be made of the city garbage while the crematory is being repaired. Over 100 cubic yards of refuse must be burned daily, and it has been discovered that while the furnaces are being repaired the entire reduction plant will have to be closed down.

It is planned to repair one furnace at a time, but Robert Robinson, Sr., who has the contract for the work, made an investigation recently and found that the walls between the furnaces had burned entirely through, and that men could not put in the masonry work unless all the fires were out.

Mr. Robinson explained the situation to the city board of health yesterday, and suggested that it secure a permit from some of the farmers down the river to dump the garbage on their land for six weeks, or while the work was being done. Tranches could be dug in which to deposit refuse, which could be covered and the garbage could be used as fertilizer. He was asked to see if he could secure a location for a dumping ground and to report as soon as possible. The materials for the repairs have arrived and Mr. Robinson will begin work as soon as some disposition can be made of the garbage.

Miss Lillian B. Tingle, demonstrator at the school of domestic science at the Y. W. C. A., was appointed market inspector by the board of health, under Dr. H. R. Biersdorf, city health officer, with salary of \$65 a month.

### B. A. WORTHINGTON SEES PALOUSE COUNTRY

B. A. Worthington, vice-president and general manager of the Harriman lines in Oregon, has returned from an extended trip in Washington, including the sound cities, Spokane and the Palouse country. He was accompanied by Superintendent John P. O'Brien and W. W. Cotton.

"This was my first trip over that country," he said, "and I took in all the sights and got acquainted with commercial and physical conditions. Mr. Cotton and Mr. O'Brien went along to facilitate my work by furnishing information about various matters as we went over the territory. There was nothing done that had any particular public interest."

PANAMA HATS

at \$5 and \$6

Buffum & Pendleton

311 Morrison St.

#### NEW ENGLAND ROADS CONFIRM LOW RATES

The New England Passenger association has confirmed the rate of one fare plus \$1, recently agreed to by the trunk line associations for the Lewis and Clark exposition, and this action completes the combination of half-fare rates on all railroads between Chicago and the Atlantic. It is reported from the eastern railroad passenger departments that already a strong effect is noticeable in increased interest manifested by the public in the Lewis and Clark fair. Railroad men say that the low rates are making the people think about visiting the northwest, to see the country, as well as the exposition.

#### Ozomulsion CURES

Chills, Coughs, Croup, Bronchitis, Catarrh, Croup, Throat, Pleurisy and Consumption. A Non-toxic, Food Medicine for the Tired Mother and the Pale, Thin Child.

BELIEVES IN JOURNAL ADVERTISING

Vancouver, Wash., April 21, 1905

The Oregon Daily Journal

Gentlemen—Under the circumstances I shall have to discontinue the paper for the present, having disposed of my property through my ad in your paper, for which I am thankful.

I expect to remove to Portland soon, and when settled will then renew subscription by carrier.

I would suggest to the public generally who have anything they want the people to know, to use the columns of The Oregon Daily Journal, and they will be sure of satisfactory results. Sincerely your friend,

L. C. PORTER.

How to Dress Well At a Small Cost.

This has always been a troublesome question to the man who wants to be stylishly attired, but cannot afford to pay the custom tailor's high prices.
