ENGINEER'S SALARY IS **NOW AVAILABLE FOR USE**

Money Appropriated for Hydrographic and Topographic Surveys Can Be Drawn.

(Special Dispatch to The Journal.) Salem, Or., May 25. Attorney Gen-eral Crawford today rendered an opinion in which he holds that the experi-ment station at Union must turn over to the state treasurer the proceeds of the farm, including rents, etc., in ac-cordance with the Carter law, passed at the last legislature. He holds that the law applies to all state institutions and law applies to all state institutions and repeals the 1801 law, which gives the experiment station power to retain this money and apply it as the trustees saw fit. The referendum of the appropriation bill brought up the question. In another opinion, in answer to questions from State Engineer Lewis, it is held that the \$5,000 apportioned for the salary and office expenses of the state engineer would be available during the present year ending December 30, and the \$5,000 appropriated annually for hydrographic and topographical surveys is available in the same time, provided the United States government expends a like amount.

The attorney general also held that the expenses for furnishing the engi-neer's office could be taken from the general appropriation for expenses at the capitol, but should be taken from the appropriation for salary and ex-

Through the accidental discharge of his revolver this morning, M. E. Gruber, police patrol driver, had a narrow ea-cape from death. The bullet passed cape from death. The bullet passed through his trousers leg in four places and pierced the fleshy part of his thigh. Serious consequences are not expect blood poisoning should develop The accident occurred at his home 1566 East Taylor street.

Gruber carries one of the late model revolvers recommended for the use of patrolmen. It is a very effective weapon of .38 caliber. He is in the habit of placing it, incased in a holster, under his pillow at night. For some time he left the chamber on which the firing pin rested empty, but a friend who borrowed the weapon put in an extra carrifidge, and Gruber did not remove it when the revolver was returned.

As the revolver struck the floor it was discharged. The bullet passed through his trousers at the ankle, scorched his underwear, passed out and punctured the outer garment in three more places before the ball struck the fleshy part of the thigh. It then struck a lath in the celling, which yielded sufficiently to stay its flight and cause it to fall to the floor. When the ball was examined thread of cloth was found in one of

ROOSEVELT FAVORS **EQUITABLE INQUIRY**

(Journal Special Service.) Washington, May 25.—As a result of the Equitable Life Assurance society scandal President Roosevelt is consider-ing the recommendation to congress that government supervision of insurance companies be exercised by the bureau of insurance in the department of com-merce and labor. A recommendation insurance in the department of com-merce and labor. A recommendation has already been prepared, but whether it will be sent depends upon the report of Commissioner of Corporations Gar-field, who is making an exhaustive in-

quiry into the government's right to assume control of insurance companies. The question as to whether the busi-ness of insurance companies constitutes interstate commerce is regarded as seriinterstate commerce is regarded as serious. Decisions of the supreme court in aimost similar cases seem to conflict. If it is found that the assumption of government control is supported by the law hild down by the supreme court, the president's strongly-worded recommendation will go into a message and Garfield will draft a bill to be introduced soon after congress meets.
