Woodard, Clarke & Co. Fourth and Washington

This Juneday, Noonday Sale is the Magic Hour in which the money in your purse buys double the usual number of things-its purchasing power increased twofold.

Trained salespeople to serve you quickly and carefully. Every department has its specialists—men and women who know their lines thoroughly , know the whys and wherefores - can answer questions and serve you intelligently.

By precept and above all by example, our managers and department heads endeavor to instill into the minds of every employe that courtesy to the public must be the invariable (and the pleasurable) practice. Whether or not a visitor makes a purchase, he or she is welcome to ask any and all questions about any article for sale, or ask for any information in our power to give. No Portland home can be more hospitable during this exposition season than the Woodard, Clarke & Co. store will aim to be.

The secret of Dr. Wiley's formula is the scientific fact that complete sterilization of a fruit juice makes it possible to keep it aweet indefinitely if it is sealed in bottles that are also sterils. The slightest impurity in juice or ressel—the tiplest particle of dust
would cause the liquid to ferment.

OREGON-MINERAL

Beveral Magnificent Features Are in the Foreground-Rich Specimens I nere

TWO SMELTER MODELS OF GREAT BEAUTY MADE

Dre Collection Comes From All Parts of the State and Is Well Arranged.

Oregon's mineral exhibit, the largest ever brought together from mines of this state, has become a center of attraction even in the early rush days of the ex-position. Mineral Superintendent Mellis position. Mineral Superintendent Melis has had the major portion of it ready since June 1, and is giving the finishing touches to special features. The ore collection is worthy of the closest study, which it is assured from the throng of

of the blast, roasting and drying zones, method of dumping ore charges from one sone to another, and all features will be fully understood from this will be fully understood from this model, which is about eight feet high and has all the proportions of an operating plant. This plant is assured close study of engineers, as it has been widely heraided among the fraternity as a distinct advance in mercury metal-

Superintendent Mellis is just completing what is destined to be one of the most striking exhibits in the fair grounds—a pyramid structure surmounted by a beautiful gilded cabinet containing rich gold ores of the eastern Oregon district. This exhibit is being made by the Geiser-Hendryx Investment company of Sumpter and will cost something like \$1,000.

The Greenback mine's collection of

county exhibit building, devoted to county exhibit building, devoted to ag-riculture. Other eastern Oregon mines have been given full space and the en-tire exhibit is one of great beauty and will prove a strong attraction.

BIG PREPARATIONS FOR COMMENCEMENT

Superintendent Mellis is just complet- Rev. A. A. Morrison of Portland to Deliver Baccalaureate at Eugene.

(Special Dispatch to The Journal.)
Eugene, Or., June 6.—Preparations for something like \$1,000.

The Greenback mine's collection of rare specimen gold ores, which is presented in a beautiful cabinet, is the prettiest quartz jewelry ever brought to the city of Portland. The pure white gangue rock with a remarkably pure gold filling, which has wire and sheet form, could not be improved by any design of man.

University of Oregon are well under way and from the present outlook the commencement week will be one of the commencement week will be one of the institution. The examinations will gangue rock with a remarkably pure be over by Saturday and, commencing Sunday, the program will continue until form, could not be improved by any design of man. the twenty-ninth commencement of the The Standard mine's large exhibit of livered by the Rev. A. A. Morrison of cobait ores and the product therefrom, Trinity Episcopal church, Portland which is in the foreground as one en- Monday will be class field day, and on which is in the foreground as one exters is one of the prettiest displays at the fair. Large pieces of cobait gold ore, the various oxides and final pigments are presented to best advantage.

Numerous pieces of rich specimen rock are found in the cabinets, some of which have large quantities of free gold visible to the naked eye. Conspicuous among these are quarts from the Virtue, North Pole and Columbia. The North Pole and Columbia have separate cabinets, with many pieces from each, free gold being yellow in each.

There is about \$1,000 worth of nuggets and coarse gold from the new Belmont strike in Grant county, which Superintendent Mellis secured just before Namerous pieces of rich specimen rock are found in the cabinets, some of which have large quantities of free sumpter smelter; the second is the new type of smelting plant being patented by N. B. Dennis for the Black Butte cinnacharging and tapping floors, settling basin and slag pots, blast pipe, downstake and other features are as precise as if at the original plant. The ore is being charged in with coke, and electric light effects give the exact appearance of molen slag alcoharging from the bottom of the furnace. Pictures are being arranged at the rear so as to give a better idea of the plant and its location. The samples are also precise about \$1,000 and is proving one of the most attractive on the grounds for mining people and even the unimitated.

Manager Dennis' Black Butte furnace, which he has recently perfected, has been reproduced in detail also, the model being with all due proportions for the furnace, and the condenser. Mercury will trickle from the discharge floor for while has recently perfected, has been reproduced in detail also, the model being with all due proportions for the furnace, and the condenser. Mercury will trickle from the discharge pipes of the condenser, the charging floor for the more southern part of the state and the condenser. Mercury will trickle from the discharge pipes of the condenser, the charging floor for the model and the condenser is a fact of the superintendent is panced with all due proportions for the furnace, and the condenser. Mercury will trickle from the discharge pipes of all grades.

The more southern part of the state and southern part of the state is attractive, and the university dinner will be which and the university dinner will be within the dinner of the summing head the university dinner will be discharge pipes of the plant and its location. The is about \$1,000\$ and is proving one of the most attractive on the grounds for minimal part of the strength perfected, has been reproduced in detail also, the model being with all due proportions for the furnace

ON AT GREAT FALLS

Great Falls, Mont., June 6.—The third trial of J. S. Kerl, for the murder of Thomas Crystal in Helena, has com-menced in the district court here, having been transferred from Helena. Kerl while in his cups killed Crystal. He was convicted of murder in the second degree and given a life sentence, but the jury disagreed in a new trial which was granted by the supreme court. Judge Leslie overruled many technicalities advanced by the defense and ordered the securing of a jury to proceed, which is being done. Kerl is one of the best known civil engineers in this section and prominently connected socially.

Legend by Believers in

LADY DURAND TO CARRY TEDDY'S GOSPEL ABROAD

Wife of British Ambassador an Enthusiastic Convert of President's Race Theories

(Washington Bureau of The Journal.) (Washington Buresu of The Journal.)
Washington, June 6.—William Loeb,
Jr.. has found among his multiplied
letters and telegrams a request from the
small but growing hamlet of Wanatah,
Indiana, that the president select an appropriate motto for the Stork society of
that center. It seems that the inhabitants of Wanatah, who are not graves
and southers as the name suggests, hav-

Mr. Loeb is not a brilliant exponent of the Rooseveltian doctrine but nobody holds that against him when there are such intimate friends of the president as the German ambassador, the surgeongeneral of the navy and others equally distinguished, who have not taken this propaganda to heart.

Lady Durand a Convers. Sir Mortimer Durand did not tarry long in London, as he intended to spend but six weeks there, and has returned almost on the stroke of the hour. Sir Mortimer has never become intimate, asthough he occasionally drops in on the

Lady Durand admires President Roosevelt very much. She has all his books on her center table and takes great delight in talking over his theories on the race question. She has all the zeal of the convert on this question and the smart hundred in London may prethe smart hundred in London may pre-pare themselves for the worst, for she means to start a propaganda on her re-turn to England. It is hinted that Lady Durand has prepared a brochure dealing with this subject which is intensely in-teresting and quite eloquent.

The ambassador will spend only a few days in Washington and will then join Lady Durand and Miss Durand at Deepdene in the Berkshires

s head on the eight courses. The crimson table decorations sur-passed anything seen here recently. A bright red silk cloth with a deep valence covered the generous table and in the center a ballet dancing lamp all Trilled center a bailet dancing lamp all trilled with lace and ribbons cast a ruddy glow on the deceptive corn pones, catness, hash and grape juice drinks. There, were rows of green candles and rows of red candles, and scientifie gentlemen for guests, with not a scrap of meat to eat.

The nourishing value of each dish was set forth on the menu. Think how satisfying to know just how many "food units" or "calories" each dish supplied. A subsequent experiment should have been for each guest to ascertain at exactly what moment he became hungry

PREDICTED FOR NORWAY

(Journal Special Service.)
London, June 6.—The establishment London, June 6.—The establishment of a republic is one of the many predicted outcomes of the troubles between Sweden and Norway. The Copenhagen correspondent of the Telegraph reports that the belief is this will be accomplished within the next few days, the republic being modeled after the Swiss confederation. Norway has been preparing for war for many months and the sentiment in favor of separation from Sweden has gained ground rapidly in the last few months. in the last few months,
