

SEA FIGHT IMMINENT

(Continued from Page One.)

burning of every building in the city of Odessa. Again and again the incendiaries have attempted to set fire to the buildings in various parts of the city, and only by the use of machine guns were the infuriated rioters repulsed.

Firing During Night

During the night firing continued in all directions in the city, soldiers shooting indiscriminately, and the killed and wounded numbered hundreds. Words received from Sevastopol said that the Black Sea squadron, comprising the battleships Tria Svistella, Snopce and Roislaw, with a cruiser and several torpedo boats, started last night for Odessa. The ships were ordered to sail two days ago, but the reason for their departure is not known, but it is presumed that trouble with sailors was responsible for the delay.

A second mutinous warship is reported to be at Cape Fontask, ten miles from Odessa.

MUTINY AT KRONSTADT.

Eight Thousand Sailors Refuse to Work—Strike Extends to Vladimir.

St. Petersburg, June 30.—News of the revolt in southern Russia has caused a spreading of strikes throughout the empire. The terrible events of Odessa, the mutiny at Libau, the massacre at Loda, the civil war raging in the Caucasus, the agrarian disorders have all served to fan the flames of revolution. The delay in fulfilling the promises for a popular government made by the czar has aroused the intelligent classes against the czar, and the whole country is a seething mass of discontent, requiring but a leader to precipitate an open rebellion.

The news today is of a most alarming character. Eight thousand Russian sailors at Kronstadt, together with the workmen in the naval yards, suddenly refused to work, and a state of mutiny exists. Officers are being seized, and one of them was killed.

The strike at Voznesensk in the province of Vladimir, continues, and martial law has been proclaimed. Infantry and cavalry are patrolling the streets and scores of people shot and hundreds of arrests made. The governor of the province has arrived from Vladimir, and the military council has declared that it will abolish the Pinskiy military district and reincorporate it in the St. Petersburg district.

A dispatch from Kishinev says that a general strike has been declared and that practically all the workmen of the city are out. The city resembles an armed camp, martial law has been proclaimed and Cossacks are patrolling the streets to prevent outrages by the strikers. General Carnolick, chief of the gendarmerie, was assassinated at his home yesterday.

TO APPEASE PEOPLE.

Government Hastens National Assembly—Mutineers in Libau Surrounded.

St. Petersburg, June 30.—It is announced today that the council of ministers will adopt the plan of the Bouligand commission for a national assembly. A draft will be submitted to the czar for approval. Hurred action is taken in order to appease the growing discontent manifested in the general outbreaks.

The government is making desperate efforts to stamp out the revolution in southern Russia. Martial law has been proclaimed in all the cities and all rioters will be dealt with unmercifully. Wholesale arrests are being made.

Strict censorship is exercised, and but little news finds its way into print. The property loss of Odessa has been enormous. Half the town is reported burned. At Libau the property loss is considerable and the workmen have gone out in sympathy with the blueshirts. Four thousand of the sailors who mutinied Wednesday at Libau wrecked the barracks and attacked the officers, have been surrounded in the woods near the fort by a large body of infantry reinforced by machine guns. A thousand mutineers have already been killed. Revolutionary agents have

sized the opportunity to distribute documents calling for a revolt. Revolutionaries and liberals are everywhere spreading the word of revolt by mouth, and although no paper in Russia contains a line regarding the events transpiring, they are rapidly being spread by the effect on the people particularly on Poland and on the armies in Manchuria, is feared.

RIOTING ON DANUBE.

Ten Thousand Farm Hands Strike and Lay Waste the Country.

Budapest, June 30.—Ten thousand farm hands in the district of the Danube have struck for an increase in wages. They are now paid 15 cents a day. In the neighborhood of Tamash thousands of strikers are marching through the country, destroying crops and burning property. In an encounter with the police 26 were killed. Nine hundred have been imprisoned for breaking contracts with employers.

Jews Can Live in Russia.

St. Petersburg, June 30.—Ambassador Meyer has informed American consuls at Russia that permission has been granted all American citizens of the Jewish faith to live anywhere in Russia. It is reported the same privileges will be granted all foreign Jews.

Three Hundred Killed.

St. Petersburg, June 30.—A code telegram received from Libau says that up to last night over 300 casualties occurred as the result of the mutiny. A large number of arrests have been made.

LARGE AMOUNTS WON BY GAMBLING ON STEAMER.

New York, June 30.—Large sums of money were lost and won on the last trip from the English channel of the steamer Kaiser Wilhelm der Grosse. Charles G. Gates, the son of John W. Gates, who was the auctioneer of goods on the ship's daily runs, raked in two pots, the profits of which were \$1,500 or more, that enough to pay his and his wife's passage home. A syndicate composed of Pembroke Jones and Henry Walters won two pots, netting \$600, and Marcus Braun, special immigration inspector, won \$300.

Mr. and Mrs. Gates sailed from New York on April 4. In their absence they took only one railway ride, from Cherbourg to Paris, but traveled 5,185 miles in a 40-horsepower motor.

SHERIFF IN BATTLE WITH GANG OF THIEVES.

Albuquerque, N. M., June 30.—Last night Claude Doane, a notorious horse thief and the head of a gang of thieves, raided outlying precincts of this city, and drove off 10 head of valuable horses. The sheriff and a deputy went in pursuit and overtook the thieves early yesterday morning at Las Padillas, 10 miles south of this city, but the men escaped. A larger posse is now in pursuit. News of a battle is expected at any moment.

FIRST PERFECT FLIGHT MADE ON AIRSHIP.

Toledo, June 30.—Navigating in the air at a height of a mile, Roy Knabenshue made his first perfect flight with an airship this morning. He went up at 9 o'clock and made a circuit of 13 miles over the city, alighting on the top of the Spitzer building. He descended and sailed back to the point from which he started. Knabenshue maneuvered the ship at perfect ease in spite of a strong wind.

Grangers Meet at London.

Cottage Grove, Or., June 30.—The grangers of this part of the county will hold a meeting on July 1 at London, 12 miles southwest of here. An open meeting will be held in the afternoon. There will be a Fourth of July celebration at the London mineral springs. A program is being arranged. As there is no celebration in Cottage Grove many will go to London or Eugene.

FIFTY MILLION GAIN IN GOTHAM'S IMPORTS

Biggest Gain Shown in Sugar, Precious Stones and Expensive Textiles.

(Journal Special Service.)

New York, June 30.—The government fiscal year which ended today has been a record-breaking one as regards the value of imports entering the port of New York. Although the complete figures have not yet been compiled it is known that the imports for the last 12 months exceeded by nearly \$50,000,000 the entries of last year.

It is regarded as significant of the general prosperity of the country that many of the most notable increases in imports at New York are in the direction of luxuries, such as diamonds, automobiles, fine lace and similar articles. Two of the lines showing phenomenal increases this year are sugar and precious stones, which in the aggregate are greater by \$30,000,000 than were the same imports one year ago. The entries of cigars at this port during the fiscal year have been far greater than was the case one year ago. Passengers' baggage has yielded an unusually large revenue to the treasury, as have liquor and wines. Textiles of every kind have been liberally imported, something like \$5,000,000 alone being invested in expensive St. Gall or Swiss, embroideries. Many other imports have made gains, with the result that the total imports at the local custom-house for this fiscal year approximate \$648,000,000, as compared with \$599,900,498 the previous year. All things considered, customs officials say the year has been the most prosperous so far as imports are concerned in the history of the port of New York.
