OVER 23 YEARS

John Gales Sentenced to Hang Two Decades Ago is Forgotten by the Authorities.

CLAIMED THAT PRISONER IS NOW LEGALLY DEAD

Condemned Man Afraid to Call Attention to His Case Lest the Sentence Be Carried Out—Relatives Seek to Secure His Freedom.

(Journal Special Service.)
Chicago, July 22.—Twenty three years ago John Gales was sentenced to be hanged on a certain day. Now he is found practically buried alive in the Joliet penitentiary, the oldest prisoner in point of servitude that that institution shelters. Long since has the law lost its power to enforce the original mandate, so his release is asked by his sister on habeas corpus proceedings.

SMART SET MARRIAGE IN HUNTING COSTUME

(Journal Special Service.)
Newport, R. I., July 22.—Newport witnessed the most novel wedding of the present season today when Miss Gretta R. Pomeroy, daughter of Mrs. C. C. Pomeroy, became the wife of Philip A. Clark of New York. The ceremony, which took place at the Pomeroy residence in Ocean drive, was termed a "hunt" affair, and all the guests came in their riding costumes.

DR. N. J. FULTON, Naturopath

I Can Cure Disease

Without using medicine, I have practiced for a good many years and have cured hundreds of people, and during all my years of practice I have never used any medicine.

After 12 Long Years

"Dear Doctor: I had been sick 12 years with asthma, heart and stomach troubles. I also had a large tumor in my side. Had an unusually severe attack and was not at first able to go to your office for treatment. Was in bed sick for four weeks before beginning treatment at your sanitarium. During this time I was nursing myself under your directions. I was finally able to visit you regularly, and after seven weeks treatment am restored to perfect health."

MRS. MARIE HENDRIKSEN, 47 Beech Street, Portland, Oregon.

California Engineer Suggests Care in Constructing the Big Machines.

SUCCESS AT ONE PLACE CANNOT BE RELIED UPON

Every District's Peculiarities Must Be Studied and Overcome and No Reason Why Oregon Should Not Be Good Field.

R. L. Griscom, who makes a specialty of hydraulic and dredge mining engineering, with headquarters in California, said while discussing the future of Oregon as a dredge district that many conditions had to be studied. He did not doubt that there would be large areas of dredge ground proved in this state, but warned operators to proceed with care, and to adapt their machines to local conditions of the auriferous ground.

"You cannot take Feather river and Folsom as absolute types," said Mr. Griscom, while examining the California mineral exhibit at the fair. "There is not a district in the world but has its peculiarities. What is a success at one point may not be effective at another. It is necessary for the dredge engineer to overcome local conditions, and to do this, he must study them carefully, and have the ingenious adaptiveness to master new difficulties."

"This is not intended as a discouraging statement, but to suggest care. There are few better dredge propositions in the world than that found at Oroville, on the Feather river. The alluvium there is a loose gravel with few serious bowlders, the gold is fine and amalgamates perfectly, and the bedrock is soft and so even that it is cleaned with a high degree of success. There is also just sufficient depth of gravel on the average for a dredge to handle conveniently. Folsom, on the American river, seems to have almost as many favorable conditions."

"There are many other places in California where dredges are operated or have been built, which offer greater difficulties. The bedrock is often a serious and peculiar proposition. A dredge that cleans bedrock at Oroville, and operates with perfect success, may prove incapable of doing the same work on another bedrock. A more compact gravel is often found than has been worked at Oroville. If so, the digging apparatus may have to be modified, all parts strengthened, and there may also have to be devices for breaking up the cemented ground after it is delivered by the digging apparatus. Bowlders are more frequent disturbing elements than the condition of bedrock. Oroville has a few bowlders, scarcely any that interfere with the work of a dredge. A dredge manager who finds considerable bowlders must devise ways and means for handling them; if he continues successful work. These often put great stress on the digging engine, injure the bucket lips and block the carrying capacity of the bucket chain. Such obstructions are not insurmountable, however, if the inventive genius of America is devoted to the work. The dredge field is broadening rapidly. I see no reason why it should not. Take your own state, for instance. You have great placer deposits, which have been mined successfully by hydraulic means. There is every reason for believing that some of the gold deposited in the beds available for hydraulic work has been washed down into deeper ground, where it is impossible to operate hydraulically except with the hydraulic elevator, and this is not always possible because of the water supply. It often occurs, also, that good gravel is to be had, but there is no water for hydraulic work. These conditions are the natural field for the dredge. In realizing on them it will be necessary to adapt the dredge to Oregon conditions."

PORTLAND BENCH RICH.

Four Seasons Secured Nearly Million in a Brief Period.
(Special Dispatch to The Journal.)
Portland, Or., July 22.—One of the best known citizens of this place, Mayor W. F. Matlock, confirms the reports from Nome about the richness of the strike on what is known as the Portland bench. This strike is pronounced the richest for its size that has ever been made in the northern country; some of the pans of earth taken from the workings opened there have been astounding. Owing to the fact that operations have been rather limited, the full scope of the new discovery is not known. Mayor Matlock says that this tract, which has been gone over by prospectors since the first rush, was not known to carry much gold. Four men secured a lease to prospect the ground, and entered the rich gravel in this work. Under the conditions of the lease, they could work only four men for a limited time, hence the production has not been nearly so great as it would have been with full latitude for development and mining. The four men have secured \$750,000 already.

Mr. Matlock and his son bonded their Nome property for \$40,000, receiving \$10,000 down, and he says that work is not being done there this year by any one. The conditions of mining in the upper districts are said to be favorable.

operating it for sometime. They have an option of another five years after the new lease expires. The mine is on the hill in the heart of the city. The tunnel goes in from the Coal creek side, and is almost through the hill to the main line of the Northern Pacific, in the north end of town. It is the intention of Miller Brothers to open the tunnel from the west and put in big bunkers on the millway, and do a general shipping business. In this way the industry will be developed on a much larger scale than ever before and a number of men will be employed.

Opening an Old Mine.

(Special Dispatch to The Journal.)
Helena, Mont., July 22.—Assurance is given that the Iron Mountain properties, which were among the most famous of the state in early days, are to be reopened. These have been developed to the 1,760 level, and produced well when worked by the former management. It is the purpose to drive a deep tunnel to unwater the mine.

REWARD IS OFFERED FOR ESCAPED PRISONER

(Special Dispatch to The Journal.)
Pendleton, Or., July 22.—It is learned that "Boston Kid," leader of the gang which broke jail here last Monday, and one of those who escaped, is a professional crook who is wanted by the police in Pocatello.

Groves Family Picnic.

(Special Dispatch to The Journal.)
Corvallis, Or., July 22.—The Groves family is holding a picnic at Oak creek. Among those taking the outing are Messrs. Groves, C. D. Thompson, Inez Wilson and Walter Wiles, Misses Edna and Lillie Groves, Gladys Horning and Edith Horning.

Penitentiary Water System.

(Journal Special Service.)
Baker City, Or., July 22.—Arrangements were completed today in this city whereby a new water system is to be put in at Pralrie City. A Tacoma concern was given the contract.

HAIR HEALTH

Assisted by HARPINA SOAP to cleanse scalp, instantly arrests dandruff, kills germs, stops hair falling, promotes growth of thick, lustrous hair of the rich color and beauty of youth. Use HARPINA with HARPINA SOAP.

Keep Your Locking Young

Large 50c bottle, drugists. Take shipping without Post Pay Specialties Co. signature.

Free Soap Offer

Send for 50c. Cash with 50c. bottle HARPINA SOAP and 50c. bottle HARPINA SOAP, both for 50c.; regular price 75c.; or send by Cash King Co., Newark, N. J., 10c. extra, for 50c. and this ad.

Free soap not given by drugist without this notice and 50c. for HARPINA.

FOLEY'S KIDNEY CURE

Will positively cure any case of Kidney or Bladder disease not beyond the reach of medicine. No medicine can do more.

FOLEY'S KIDNEY CURE

strengthens the urinary organs, builds up the kidneys and invigorates the whole system.

IT IS GUARANTEED

TWO SIZES 50c and \$1.00

SOLD AND RECOMMENDED BY
LAUE-DAVIS DRUG COMPANY AND WOODARD, CLARKE & COMPANY.

Passed Stone and Gravel With Excruciating Pains
A. H. Thurnes, Mgr. Wills Creek Coal Co., Buffalo, O., writes "I have been afflicted with kidney and bladder trouble for years, passing gravel or stones with excruciating pains. Other medicines only gave relief. After taking FOLEY'S KIDNEY CURE the result was surprising. A few doses started the brick dust, like fine stones, etc., and now I have no pain across my kidneys and I feel like a new man. FOLEY'S KIDNEY CURE has done me \$1,000 worth of good."

No Other Remedy Can Compare With It
Thos. W. Carter, of Ashboro, N. C., had Kidney Trouble and one bottle of FOLEY'S KIDNEY CURE effected a perfect cure, and he says there is no remedy that will compare with it.

SELLING OUT OUR CROCKERYWARE

AN EXCELLENT QUALITY OF PLATES AT 25c THE SET

And other wares in proportion. We are closing out a very large stock of Graniteware at remarkable reductions from ordinary prices, and selling
