MURDERER'S TRACKS ARE THOSE OF A MAN

Youth Declares Sister Wore His ioes Over Her Own So That Blame Might Rest Upon Him-She Refuses to Talk of Case.

(Special Dispatch to The Journal.)

Pranta Pass, Or., Oct. 28.—A feature the recent investigation made into a Jennings murder mystery of Grantill mining camp, to solve the questo of who murdered N. M. Jennings, aged wood contractor, is damaging Jasper Jennings, son of the murdered in. The boy has said that his sister mmitted the crime, but it has been und that the blood-stained tracks over a floor of the room in which the old

found that the blood-stained tracks over the floor of the room in which the old man, was killed, and which led over the doorstep and across the yard, were tracks of a man. They could not have been made by Dora Jennings, whom Janper says killed her father because she hated him.

To account for the tracks the boy icclares his sister were his shoes over ter own, that the blame for the crime night be laid at Jasper's door. But he girl denies all knowledge of this, asper says his sister stole into the blin where he and a companion alept te at night, stealing both his rifte and shoes. But the door of the boy's hin opens with difficulty, and its rusty uses screech loudly. It seems impable that the door could have been med without one or both of the boys tring it.

The foundation of the fracks over the door in the could have been med without one or both of the boys tring it.

The foundation of the fracks over the door in the could have been med without one or both of the boys tring it.

The foundation of the father because she hated him.

To account for the tracks the boy in the door of the crime night be laid at Jasper's door. But he girl denies all knowledge of this, happer says his sister stole into the bin where he and a companion alept te at night, stealing both his rifte and shows the store of the boy's bin opens with difficulty, and its rusty uses screech loudly. It seems important the door could have been med without one or both of the boys tring it.

The floor of the realing have been med without one or both of the boys tring it.

interest in the case is growing, and are is a change in the feeling of the meral public toward the girl. Sie II, say absolutely nothing concerning a crime, while the boy talks freely, ough his confession tends toward ifting the blame upon his sister.

OSCAR*ROGOWAY FOUND **NOT GUILTY BY JURY**

(Special Dispatch to The Journal.)
Albany, Or., Oct. 28.—The Jury in the se of Occar Rogoway yesterday afteron, after being out less than a half ur returned a verdict of acquittal, d the defendant was promptly turned see by the court. The trial lasted four il days and the mass of evidence was t discussed by the jurors after they tired owing to their satisfaction with verdict without a detailed discussion the case. On the first ballot only e man voted for conviction and in 30 mutes he too voted to acquit. Rogony was accused of burning his other's store in Lebanon in December, 23, for the insurance. The policy on a store has not been paid and it is pected that suit will be brought now collect the 1500 insurance on the sek of goods, burned at the time of

reception for Head Consul Boak when he arrives next Tuesday. All neighbor ing camps have been invited to partici pate and a large crowd is expe An open meeting will be held, after which light refreshments will be served and followed by a business meeting.

There are ginger worms and red-pepper bugs queer boarders-that have to be looked for, not in Schilling's Best, but in making it. There are eggs of these queer boarders, too small to be killed by grinding. Don't keep spices warm, or they'll hatch.

ELECTRICITY

IN THE HOUSEHOLD where ELECTRICITY is used for LIGHTING, there are numerous electrical appliances which may be attached to any lighting fixture. These conveniences multiply the value of our service to every member of the family.

DOMESTIC NECESSITIES such as sewing machines, flat irons, water heaters, heating pads, chafing dishes, curling irons, tea and coffee pots, stew pans and kettles, may all be operated by the SAME CURRENT which supplies LIGHT. For afternoon teas, luncheons, or late suppers, electric appliances are eminently satisfactory, are easy to operate, are absolutely safe and are ECONOMICAL.

THERE CAN BE no explosion, as with alcohol, no flame to cause mischief. The ELECTRIC HEAT is instantly concentrated within the utensil, just where it is wanted, without waste. There is no dirt, no odor, no soot, no smoke, and so little current is required to operate these devices that the cost is really INAPPRECIABLE.

ELECTRIC CURRENT is there wheny ou need it-off when you don't-by a turn of the switch. It is not burning up money when not wanted—it is not CONSUMING or poisoning the air.
