

BIG GRAIN DOCK IS PLANNED

Site Selected Said to Be That of Old Victoria Warehouse.

GROWING NEED FELT OF SUCH WHARFAGE

Depth of Water There as Great as Any Place in Harbor and Fire Protection is Good—Property Probably Will Be Leased to Operators.

The east side office of The Journal is in the store of J. M. C. Miller, 300 East Morrison street. Telephone East 27.

A modern grain dock located where the Victoria wharfing now stands just north of the steel bridge on the east bank of the Willamette is one of the important improvements likely soon to be started on the east side waterfront. Exporters, ship masters and interior shippers complain that there are not enough docks to handle the wheat crop and when two of the docks were burned last summer the ports' ability to furnish cargoes was seriously impaired. Even at the best no shippers say, there are not enough docks to handle the season's crop, which each year is growing larger.

Presently who is behind the plan to erect a big dock where the Victoria docks stood for years is not known further than that local capital is interested and that the docks will be built in all likelihood early next year and be in readiness to handle the 1906 crop.

Waterfront men say that one of the deepest places in the local harbor is opposite the old Victoria dock site and that 40 feet of water is to be found there in most of the shipping season. This is an advantage that probably no other vacant dock site in the harbor could offer and the only way in which the opportunity has been allowed to go unimproved so long.

What is said to have had special weight with capital has been the comparatively slight investment required to secure a good income. While a grain dock requires considerable expenditure it is not to be compared with a modern block so far as expense goes, and on its completion can be leased to an operating company at a good return, immediately becoming a productive property without further cost. Practically all the local docks are managed in this way and they all have proved profitable investments. A dock on the Victoria site would have better fire protection than any similar institution here because of its proximity to the fireboat.

IMPORTANT WORK TONIGHT

Improvement Association Has Three Big Questions to Solve at Once.

At the meeting of the East Side Improvement association tonight in the east side justice court at 7:30 o'clock two matters of great importance will be considered for the first time.

The association, at the suggestion of President Boise, will take up the water problem and will consider the advisability of urging the city board to build a new pipe line from Mount Hood to the city reservoirs. This subject was broached informally last week at the association meeting and tonight the members will express their views and action of a definite sort will be taken.

The general opinion seems to favor the construction of the pipe line just as the

general sentiment was against the purchase of 180,000 worth of water meters. The plan of Francis I. McKenna for the construction and municipal ownership of a belt line, two new high bridges across the Willamette and a boulevard and park system will be considered formally by the association. Mr. McKenna briefly outlined his plan at the last meeting and the plan was endorsed by the president. A more detailed explanation of the work proposed and its advantages to the city will be given tonight and the association will take some action.

The bill campaign being carried on by the leading property-owners of the central east side district and a special committee of the club, in conjunction with the Port of Portland commission, the city council and the executive board, will be discussed. Reports will be made as to the week's work and as to the feasibility of the commission's big dredge handling the river bed material. It is desired that a full attendance be present of those concerned in the growth of the east side to take action on these and other important matters that will be presented.

UNITE SUNDERED SUBURBS.

Grand Avenue Will Contract Cause of Joy to Business Men There.

No recent contract let by the executive board has brought greater satisfaction to the business men of the east side than that awarded the Pacific Bridge company yesterday afternoon for the fill of Grand avenue between East Oak and Pine streets. The cost of the fill will be \$1,500,000 and the value of the improvement of the east side business interests will be many times this amount each month. Work will begin at once on the contract and before many weeks pass the east side will be united again for the first time since the big fire months ago.

At present the heavy traffic of the central district, and much of the business from the west side to the suburbs, is forced to take a devious course over tottering elevated roadways and along muddy streets in order to get across the Hawthorne slough. The fill and improvement of the gulch on Grand avenue will give a broad thoroughfare from one end of the east side to the other and will enable teamsters to save time and labor. For months before the fire the property-owners endeavored to get together and raise money for the fill, but were unsuccessful, many at that time favoring the rebuilding of the elevated roadway across the slough. The disastrous fire and the ease with which on that occasion the flames followed the elevated roadways convinced the residents that this was the best plan.

NEW FERRY STARTS.

Temporary Route Are Placed in Service by the St. Johns Company.

A temporary ferry across the Willamette has been placed in operation at St. Johns by the company which will be given a franchise early in December. After the passage of the ferry ordinance the company will install a modern boat the equal of any of Portland's craft, but to meet the traffic requirements a launch and barge have been placed in operation to work until the new ferry can be completed. It is probable that the ferry will be patronized largely, as teamsters can save a mile or more by taking the Linnton road to Portland instead of following the devious course of the various boulevards that skirt the peninsula, and the teaming required to satisfy the growing needs of St. Johns is becoming more of a factor each month. J. E. Brink, manager of the St. Johns Ferry company, has started work on the two approaches to the boat landings, one of which will be at the foot of Hittsburg street in the town and the other in Linnton.

Will Wed at Ontario.

Ontario, Or., Nov. 28.—Harry E. Kres and Mrs. Mary E. Kres will be united in marriage at the home of the bride's parents in this city Wednesday evening, November 29.

WOMAN GIVEN 20 YEARS IN PRISON FOR MURDER

Miss Margaret Williamson of Los Angeles Convicted for Slaying Her Insulter.

(Journal Special Service.)
Los Angeles, Nov. 28.—Still militant and determined to say a word for herself, but quelled by her attorney, Miss Margaret H. Williamson Saturday stood before the judge and a crowd of curious people in department No. 1 of the superior court and received a sentence of 20 years in the state prison at San Quentin from Judge B. M. Smith.

The crime for which Miss Williamson was sentenced was the killing of Richard Saunders Perry at the Piedmont lodging-house on the evening of July 17. The woman claimed that the man had insulted her and even attacked her, but that the fatal shot was fired by accident after she had ordered him out of the house.

"Is there any legal reason why judgment should not be pronounced against you?" asked the judge, while a pinfall might have been heard in the court.

"Yes, yes," urged the prisoner, a wave of anger and indignation sweeping over her face. "No, there is not," admonished her attorney in a whisper. "Just stand still and say nothing. You have a chance now."

The woman took the advice like a soldier and stood like a statue while sentence was passed upon her.

NELSON AND BRITT MAY FIGHT AGAIN

(Journal Special Service.)
Cleveland, Nov. 28.—It is expected that another fight between Battling Nelson and Jimmy Britt will be arranged in this city this week. Both men have been talking of another match and both will appear here this week to give sparring exhibitions at different theatres. It is believed that their managers will get together and settle the differences and pave the way for a fight to take place soon.

The two boys arrived here Sunday and will be lavishly entertained during the week.

WHY SLAVS HATE THE HEBREWS

Russian Jews Do No Manual Labor—Always Merchants or Money Lenders.

SHYLOCK METHODS CAUSE FOR CONTEMPT OF RACE

All France Stands Aghast at Terrible Massacres and French Advocate Overthrow of Czar's Government Even Though They Lose Money.

(Journal Special Service.)
Paris, Nov. 28.—All France stands aghast at the terrible massacres of Jews in Russia, and in spite of the fact that the overthrow of the present regime in that country would probably mean a loss of several millions of francs to the French people, you hear everywhere, even among those who have invested all their savings in Russian securities, nothing but words of condemnation of the czar's government, which has done little or nothing to prevent the shedding of blood among the Jews.

It is one of the most beautiful traits in the character of the French people that, thrifty and saving though they are, money after all is a secondary consideration, which is perhaps more than can be said about the citizens of other great republics.

Should Leave Country.
Money for the relief of the suffering Jews in Russia is pouring in, but there are a good many philanthropists here who declare that money will be of no avail, as it will ultimately become booty for the assassins, and that the only remedy is to assist the whole Jewish population in Russia to leave the country where they are objects of such intense hatred.

A Russian of high standing in this city has indorsed this opinion, and while strongly condemning the massacres, and far from denouncing the murderers, has tried to explain to the French people the hatred of the Russians against the Jews.

"While it is true," he said, "that the Russian autocratic government has always considered the Jews an undesirable element because of their mental superiority over the ignorant moujik, it should be remembered that the massacres have always been committed by the lower classes and without the instigation of the clergy or the officials, as it is often said. The lower classes hate the Jews because of their shynlock methods toward them."

"The Russian Jew has the antipathy of his race against bodily labor. Always a Usurer.
"He never tills the soil, nor makes his living in the sweat of his brow. He is nearly always either a merchant or a money lender on a small or large scale.

As a merchant he is always unscrupulous and very often dishonest, but it is as a money lender that he usually arouses hatred.

"The Russian has in his character many of the traits of a child. He is careless with money, whether he possesses little or much, light living and extravagant. When the Jew comes to him and offers the loan of money, he gives as security anything demanded, and when the term of the loan expires the lender has the right to take possession of the security given.
"The Jew insists on having his pound

When Your Cold Catches You Just There

There is No Time to Wait.

It is not a "little thing." It's a deadly thing. It will not "get well by itself" if you let it alone. Whiskey and quinine and such things brace you up for the time, but they don't cure you.

Ask any intelligent doctor why you catch cold so easily. He will say, "Because you are a bit run down." He means that the force which nature placed in your body to keep out disease germs—the resistive force—is weakened. The door is open a little way toward disease.

There is not a gravestone in any cemetery in the world caused by consumption or pneumonia or any lung trouble whatever, which did not start with what you call "Nothing but a cold."

A cold should not be beaten back or drugged over—it should be cured, and the general health should be built up.

ACKER'S ENGLISH REMEDY

should be taken at the first symptoms of cold. It is a tonic for the whole body, a specific for sudden colds, coughs or sore throats. It doesn't matter where the cold is or how it got there, we know that Acker's English Remedy will reach it and cure it. It is sold on a positive guarantee.

NO CURE NO PAY. If you have a cold—no matter how slight—it means something. Take Acker's English Remedy at once. Keep it in the house. If it does not relieve you almost instantly, we will refund you the price paid.

"Acker's English Remedy saved my life. A cough, slight at first, grew constantly worse and I finally had to give up my work in the Kaife Factory at Walden. I had frequent bleeding spells. Was examined by local doctors, prominent physicians in New York and at a Medical College. They all pronounced my case hopeless. I began using Acker's English Remedy and a few bottles cured me. I am today a perfectly well man."
(Signed) A. H. SIMPSON, Walden, N. Y.

Acker's English Remedy is sold on a positive guarantee that the purchase money will be refunded in case of failure. 25c., 50c., and \$1.00 per bottle.

SOLD AND GUARANTEED BY S. G. SKIDMORE & CO.

WEST EXCEEDS EAST IN OIL PRODUCTION

(Journal Special Service.)
Chicago, Nov. 28.—The report of the United States geological survey, just published, shows that, for the first time in the history of the petroleum industry of the United States, the quantity of oil product west of the Mississippi river last year was greater than that produced in the eastern United States. New pools were discovered in 1901 in Texas, California, Kansas, Indian Territory and Oklahoma and many extensions were made to the old fields. An immense section, beginning in southeastern Texas and extending southward into northern Indian Territory and Oklahoma, now more than 180 miles long and 50 miles wide, was proved to be productive of petroleum and natural gas.

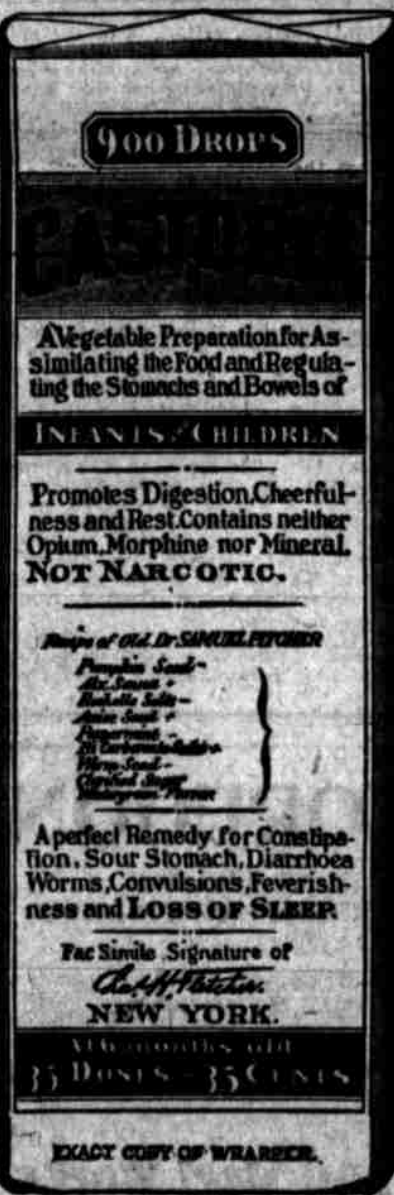

According to the statistics contained in the report referred to, the total output of crude oil last year was 117,868,421 barrels, a yield of 16,692,084 barrels less than the year before. The values of last year's product amounted to \$161,170,466, a gain of \$4,478,416 over 1902. The report says all indications point to an increase in the production of petroleum in the United States for years. The increased demand in this country is attributed in great measure to the use of that article in automobiles and as a fuel in certain industries.

MADE A FORTUNE BY BETTING UPON RACES

(Journal Special Service.)
Jersey City, N. J., Nov. 28.—It is doubtful whether there is any other man in this country who has been as lucky in betting on horse races as Frank England, up to five years ago a streetcar conductor in this city. Five years ago he worked hard for \$1.50 a day and now he takes year easy, living on the income of \$150,000, which he accumulated since he began to play the races. For several years he played the races with varying success and when the racing season began this year he was slightly the loser. On May 26 last he tried his luck again with an investment of 75 cents. He won and has continued to win ever since. He is now winner to the extent of \$150,000. He has purchased a fine residence in Brooklyn worth \$30,000 and is enjoying life, traveling with his wife and some relatives. He says that his betting is based upon reliable inside information, that there is nothing crooked about it, but that he would not state where he obtained his information.

CRAWFORD ON TRIAL FOR POSTAL FRAUDS

(Journal Special Service.)
Washington, D. C., Nov. 28.—The second trial of William G. Crawford, who was indicted jointly with A. W. Machen and George E. Lorenz on charges of conspiracy to defraud the government, was begun today before Justice Wright of the criminal court. Crawford was tried last spring, but the jury was unable to reach a verdict. He was charged with the sale of letter-carriers' bags and straps for use by the postoffice department. Machen pleaded guilty to the charge and was sentenced to two years' imprisonment. Lorenz was used by the government as a witness against Crawford at his first trial and was later sent to the penitentiary to serve a two-year sentence for conspiracy to defraud the government.
