

SPRINGS RIOT IN HARMONY LUTE

Verbal Fireworks Characterize Meeting of East Side Improvement Association.

BOISE AND NEWHALL TELL STRAIGHT FACTS

We Don't Want to Let Somebody With His Little Grift Get in, Says Boise and Newhall Resents the Statement.

The east side office of The Journal is in the store of J. M. C. Miller, 300 East Morrison street. Telephone East 274.

"The road that we will favor on East Third street will be the one that will do the most for us, I can tell you that. We don't want to let somebody with his little grift get in and hold the field to the detriment of the best interests of the east side."

Whitney L. Boise, president of the East Side Improvement Association, and one of the backers of the electric belt line that seeks a franchise on East Third street.

These were the concluding remarks in a display of verbal fireworks that stirred the East Side Improvement Association last night, and indications are that the organization has sprung a rift in its lute of harmony that will require time and diplomacy to mend.

The discussion started over the franchise content between the Southern Pacific and the electric belt line and Mr. Newhall cast the first stone. He was called to state the position of his company and in part said:

"We desire to lay a standard gauge road from Sellwood to St. Johns through the heart of the east side wholesale district. We wish East Third street because it is the best for our purpose and about the only through street now left in the wholesale district."

The Harriman management now has East First and East Second streets and if it is given East Third street there will be nothing left; the east side will be bottled up and will get nothing out of it.

"If the Northern Pacific is behind this electric project, let it say so and we will favor it. The Southern Pacific has agreed to fill the street, to give us a freight depot, abolish switching charges and put in necessary switches to the warehouse district."

President Boise, replying for the property owners on East Third street, who signed the Southern Pacific petition for the right of way, said:

"If the Northern Pacific is behind this electric project, let it say so and we will favor it. The Southern Pacific has agreed to fill the street, to give us a freight depot, abolish switching charges and put in necessary switches to the warehouse district."

"It seems a small thing to do for the big property owners to grant a franchise only to the corporation that will fill their streets for them," was his opening gun.

"A big price to pay for the bottling up of the entire east side is a few loads of dirt, now it is not," he challenged. "It is the new men on this side who are doing things. They build brick blocks and make business, but you never hear the Hawthorne or Ladd estates building a brick block."

His friend Boise is a magnetic talker, but I don't think the association should allow his eloquence to make it remain passive while the Southern Pacific secures the last street on this side of the river. Let the big property owners loosen up and spend a few dollars, even if they have to fill their streets without the aid of a corporation; it is time they were setting a good example."

O'Brien's Secretary Talks. At this point C. G. Sutherland, private secretary to General Manager O'Brien of the Oregon Harriman lines, defended the Southern Pacific. He asserted that the Northern Pacific had its warehouse district on the west side, but the east side was the home of the Southern Pacific in Portland; that 30 per cent of the property owners in this district favored by the proposed franchise had covered it, and that in fact the property owners had asked the company to build its tracks there and to make the fill. He said:

"The Harriman lines have spent half a million recently in the Albina houses. We will put up a freight depot in 60 days that will enable you to ship your wares anywhere in our system from your home station and the switching charge between the Southern Pacific and O. R. & N. will be abolished and the \$10 rate now charged for bringing Northern Pacific cars across the river will be cut to \$5."

Several members who had struggled with the Harriman officials in seeking to secure a freight depot wanted to know where the company discovered it desirable to maintain a through freight depot on the east side when 30 days before Mr. O'Brien had considered it impossible to make prompt shipments from the east side. The change of heart was not explained. It was then inquired why the Southern Pacific wanted East Third street all to itself and why other roads could not use the track. Mr. Sutherland said:

"Did you ever hear of a railroad that wanted to give up its right of way to another company?"

"They always want (small themselves, eh?" piped a voice in the rear of the hall.

"They certainly do," remarked Mr. Sutherland.

Other speakers charged that the franchise application was chiefly a deal between the property owners on East Third street and the Southern Pacific whereby the property owners had a deal filled without cost to them and the company secured a franchise that bottled the east side and gave the Harriman management control of the entire field.

When the discussion had been rather thorough and somewhat less than kind-

ly, President Boise fired his final volley that brought the climax. "I am sorry these personalities have crept in," said he. "I am sorry that members have found it necessary to abuse any one or any corporation, but since it has been charged that the Hawthorne estate and Mr. Ladd have not done their duty a few words will be timely. We spent \$50,000 for constant sidewalks before there was a law forcing such improvements on the east side."

Such Many Residences. "We spent \$200,000 in two years building residences and the only reason we did not build brick blocks was because business property in those days did not pay 1 per cent on the investment. Now it begins to look as though the building of such blocks would pay and we expect to make improvements this year that will probably exceed anything likely to be erected by those who speak so loudly of their achievements, in prospect. Mr. Ladd and the Hawthorne estate started the fill campaign and Mr. Ladd has stood the chief cost of the experimental fill from the river to the townlands, where the dredge will soon be at work. He also stood the chief cost of the Grand avenue fill because it was assessed to abutting property when it should have been assessed to district and would have been had he protested. Abuse doesn't help. Personal and selfish motives should be forgotten, and one thing is certain: the east side won't go ahead with new roads built across sloughs or stills because somebody with his little grift wants to edge in."

Then came Mr. Newhall's reply and shortly after Judge Seton came to the river in the townlands, where the dredge will soon be at work. He also stood the chief cost of the Grand avenue fill because it was assessed to abutting property when it should have been assessed to district and would have been had he protested. Abuse doesn't help. Personal and selfish motives should be forgotten, and one thing is certain: the east side won't go ahead with new roads built across sloughs or stills because somebody with his little grift wants to edge in."
