

HUNDREDS OF BUCK'S STOVES and RANGES

Are giving perfect satisfaction in Portland and suburban homes, all of which are fully proving their superiority and demonstrating their excellent qualities in baking and fuel economy. In their construction is embraced the many splendid features which have made this line of stoves and ranges famous—the result of sixty years of science and thorough test under all conditions. The material, the workmanship, the design and the finish of a Buck's stove or range combine to make up a perfect product—the work of the world's best stove and range builders, who from one year's end to another is the building of scientific stoves and ranges. We guarantee a Buck's stove or range to be free from defects, and we are backed up by "America's foremost stove concern," the Buck's Stove and Range Company of St. Louis. There are many exclusive and splendid features of the Buck's line, among which we particularly mention the superior weight of the different styles and sizes in both cook stoves and ranges, showing that in each is solid construction. The oven, with its white enameled rack and door; the firebox with its duplex grate—operates equally well with wood or coal—and the scientific arrangement of drafts and flues. These and many other features have brought to a high standard the "GREAT WHITE ENAMEL LINE."

We are the Portland agents for the Buck's—we show the complete line, and sell them on the liberal terms of

AID OF CHILDREN IS NEEDED

Initiative One Hundred's Work
Fails Unless They Are Al-
lowed to Help.

COMMITTEE WILL ASK
FOR HALF HOLIDAY

Another Plea Will Be Made to School
Board to Allow Children to Partic-
ipate in General Cleaning Cru-
sade Throughout City.

Upon the action of the school board
in deciding to grant or refuse to give
the school children a half holiday for
the purpose of engaging in the clean
city work will depend the success or
failure of the work that has been under-
taken by the Initiative One Hundred, ac-
cording to Francis J. McKenna, chair-
man of the committee.

The members of the committee are
depending upon the aid of the school
children to a large measure, and they
say that if they fail to secure their help
the cleaning up that is planned for the
city will not be the success that it must
be to make the city presentable.

Members of the subcommittees ap-
pointed to organize clean city commit-
tees in the various districts of the mu-
nicipality have succeeded in arousing
deep interest among the school children,
all of whom are anxious to spend a half
day removing the rubbish and unsightly
accumulations of trash that mar the
beauty of the city. The school board
was asked some time ago to give the

children a half holiday, but there seems
to be some hesitancy on the part of
the members to grant the request. As
a result, a special committee from the
Initiative One Hundred will attend the
board meeting Monday night and make
a special plea.

Children's Help Needed.
"Especially in the outlying districts,"
said Mr. McKenna, "the school children
must be depended upon almost entirely
to accomplish the work desired. If they
fail to get the necessary holiday the
movement will not be a complete suc-
cess at all. The very fact of the chil-
dren working would arouse an interest
in the movement among the parents.
They, too, could be induced to work,
whereas they probably could not if the
children did not enter into the spirit of
the movement. Besides this, it will
be valuable education to the little folk
in the principles of civic cleanliness and
teach them to be more careful not to
throw litter and trash upon the streets
and public grounds. In fact, I believe
there should be an annual half holiday
for city cleaning purposes. In this way
old and young might be taught to keep
the city clean and beautiful at all times.
Soon there would be no necessity for
any special cleaning-up crusades."

Meeting Monday Night.
Mr. McKenna announces that there
will be a meeting of the Initiative One
Hundred Monday night, at which time
the subcommittees will report progress
in the various lines of work assigned
them. The committee on the First street
franchise will probably report, recom-
mending that the people resort to the
referendum law to defeat the proposed
First street franchise should it be
passed by the city council.

BODY OF W. E. COLE FOUND IN THE RIVER

(Special Dispatch to the Journal.)
Spokane, Wash., May 12.—The body of
W. E. Cole was found in the Spokane
river yesterday. Cole was well known
and it is believed he was murdered and
thrown in the river. He had been miss-
ing since March 28. His team missed
at that time was recovered at Couer
d'Alene, where it had been sold by a
stranger. The body was in the river
20 miles from Spokane and has not been
examined yet for marks.

LUMBERMEN RUSH TO PORTLAND

Eastern Firms Hasten to Pur-
chase Timber Tracts in
Oregon.

BELIEVE 'FRISCO WILL
DEMAND LARGE SUPPLY

Settlers Are Holding Timber for
Higher Prices in Some Localities—
Over One Hundred Lumbermen
Registered in Local Hotels.

Eastern lumbermen are crowding into
Oregon in their rush to buy timber
tracts. Many eastern firms are con-
vinced that the enormous demands of
San Francisco during the next few years,
will cause a scarcity in their markets,
and they are resolved to provide against
this condition by having tracts of tim-
ber land from which they can get their
own supply of lumber exclusive of local
dealers. They are offering \$1 a thou-
sand feet for this timber everywhere,
and in many districts where the bidding
has been sharp this price has been re-
fused. The eastern lumbermen are find-
ing it a hard matter to get suitable
tracts because of the fact that settlers
are hanging on to them in the firm con-
viction that they will get a much higher
price.

Charles B. McCormick, a lumberman
from San Francisco, arrived in Portland
Friday to purchase lumber for retail
trade in that city. He does not believe
that the Oregon dealers will raise the
price of lumber in the face of conditions
at San Francisco.

Ysidro Reyes, a wealthy sugar and rice
plantation owner of Mexico, arrived in
Portland yesterday. He will seek to pur-
chase a timber tract in eastern Oregon.
Fred D. Smith of Elmira, New York, is
in the city for the same purpose. Near-
ly 100 lumbermen are registered at the
hotels about town.

TWO MILLION FOR STREET WORK

This Sum, It is Estimated, Will
Be Spent in Next Two
Years.

TWO HUNDRED STREETS
WILL BE IMPROVED

Work Will Be Let by Contract and
Thousands of Dollars Will Go Into
Wages—Much Important Work
Now Under Way.

Fifty-one streets, involving an ex-
penditure of nearly \$2,000,000, now under
improvement, and 168 streets under con-
sideration for improvement and which
may receive favorable action from the
street committee and council are a few
of the things that are helping Portland
out this year.

Assistant City Engineer J. R. Hanson
has compiled a report which shows that
within the next year a sum aggregating
more than \$2,000,000 will be spent in
the paving of streets in the residence
and business districts. As in the past,
the work will be let by contract and a
fair share of the \$2,000,000 will go into
wages.

The most expensive piece of work
that is under way at present is the im-
provement of Holladay avenue. In this
work the estimate of the city engineer
was \$46,725. The contract was taken
for a few dollars less. Other important
improvements that are being carried on
are those on Eighteenth street between
Marshall and Vaughn, Everett street and
Grand avenue.

A Mountain of Gold
could not bring as much happiness to
Mrs. Lucia Wilks of Caroline, Wis., as
did one 25c box of Bucklen's Arnica
Salve, when it completely cured a run-
ning sore on her leg, which had tor-
tured her 23 long years. Greatest anti-
septic, healer of Piles, Wounds and Sores.
25c at Skidmore Drug Co.

CORRECT CLOTHES

Perhaps ours are not the only clothes in evi-
dence at the moment.

We believe, however, that the Alfred Benja-
min Correct Clothes, for which we are sole
Portland agents, are the most stylish.

The New York sack suit without vents in the
back is the correct thing now.

A visit of inspection might profitably precede
a visit of selection.

AS TO VALUE NONE DO OR CAN GIVE BETTER

The heaviest payroll that the city has
now is connected with the construction
of the Brooklyn district sewer. The
regular payroll that is disbursed at
the city hall goes to men who are em-
ployed in the street cleaning depart-
ment. On an average there are about
30 men engaged in this work and the
wages range from \$2.25 to \$5 per day.

The latter figure going to the man at
the head of the department. Sewer
work is also carried on under the direc-
tion of the city.

electric wires so that they may be aimed like
a shot at a specific point. Hitherto the waves
have radiated indiscriminately in various direc-
tions and could be intercepted at any number
of stations equipped with the Marconi ap-
paratus. This will heretofore be impossible and
wireless messages can be directed to a single
ship sailing the high seas or the particular
land station desired.
