

JEW NUN CASE IS NOW TRIAL

Second Hearing of Chinese on Charge of Murder Begins in Circuit Court.

WITNESSES TESTIFY IN STATE'S BEHALF

One Is Subjected to Rigid Cross-Examination by Attorney McGinn for the Defense—Police Captain Slover Tells His Story on the Stand.

Testimony was introduced by the prosecution in the Jew Nun murder trial in the circuit court this morning. Detective J. F. Reising testified to seeing the two Chinamen run down Third street, Lee Yee Lee shooting at Lee Yee Lee, and that he arrested Jew Nun.

W. A. Bell, another witness for the state, who testified that he saw the shooting, was given an extremely uncomfortable half hour by Henry B. McGinn, counsel for Jew Nun, on cross-examination. It is contended by Attorney McGinn that Bell's testimony was bought by the Lee company, of which Lee Yee Lee was a member.

Bell was asked whom he had told that he saw the shooting. He replied that he told it first to the bartender at the Atlantic cafe, then to Bob Patterson, then to Attorney A. Swank, who is assisting in the prosecution. Bell said Mr. Swank had approached him on the corner of Third and Pine streets and asked him if he knew anything about the murder.

Former Testimony Recalled. Attorney McGinn read extracts from the stenographer's report of Bell's testimony given at the first trial, in which Bell said he had told Detective Reising that he had seen the shooting and that Reising had sent him to Swank. When on the stand Reising testified that he had not seen Bell. This morning Bell said on the next day after it occurred he told Patterson of seeing the shooting. His testimony at the former trial, as read by Mr. McGinn, was that he did not see Patterson of it until nearly a week after it occurred.

The other witnesses were Captain of Police Slover, W. A. Robinson and sergeant G. W. Taylor. The testimony of the witnesses was that Jew Nun was waiting at the foot of the stairs when Lee Yee Lee came down, and as soon as he reached the street commenced firing at him. They ran down Pine street to Third, and down Third to Ash, with Jew Nun closely pursuing Lee Yee Lee. They said it was near the corner of those streets that the fourth shot was fired and Jew Nun arrested.

The defense, it is said, will be that Jew Nun shot the other Chinaman to avenge the stealing of his wife. It is denied by the prosecution that the woman was the wife of Jew Nun.

BUILD RAILROAD TO SNAKE FROM SUMPTER

Company Plans to Run Line From Mining Camp to Tap Columbia River Also.

(Special Dispatch to The Journal.) Salem, Or., July 5.—The Eastern Oregon Railroad & Power company plans to incorporate. The articles were filed with the secretary of state today. The incorporators are: W. H. Hurd, Anthony Mohr and P. J. Bannon. It is proposed to construct a line from Sumpter to a point on the Columbia river between Umatilla and The Dalles and then from Sumpter to a point on the Snake river near Huntington on the Snake and the Harney lines. The company has the right under the articles of incorporation to run steamboats on the Snake and Columbia connecting with terminals of the railroad. The capital stock is only \$25,000.

TWENTY THOUSAND CELEBRATE IN SALEM

(Special Dispatch to The Journal.) Salem, Or., July 5.—The capital city was alive with people yesterday who had come to participate in the biggest celebration ever given here. More than 20,000 people from neighboring cities and the adjoining country districts were on hand to hurrah and to celebrate in the old-fashioned style. The joint committees did some hard work to plan for the celebration and the affair was a tremendous success. There were no serious accidents with the exception of that of Ralph Hensley, an employe in a local butcher shop, who participated in one of the pony races. The horse got off the track on Commercial street, where the races were being pulled off, and crashed into the buggy of A. G. Fisher of Independence. The pony fell to the ground, threw his rider off and Hensley was unconscious for a few minutes. He also suffered a serious sprain at the ankle. Another horse when nearing the end of the race struck the 11-year-old son of Harrison Jones of Brooks and the boy escaped without fatal injuries.

SAN FRANCISCO ONCE MORE A WET TOWN

(Journal Special Service.) San Francisco, July 5.—The saloons opened today for the first time since April 18. Contrary to expectations of the police few drunks were reported to noon. The threat to force arrests from intoxication to work cleaning away debris is credited with keeping down inebriety.

WARRANT FOR ARREST OF J. D. ROCKEFELLER

(Journal Special Service.) Toledo, O., July 5.—Prosecutor William Davis has filed information against John D. Rockefeller to end the Standard Oil company's charging violation of the anti-trust laws. Rockefeller will be tried at Findlay if service on him in Ohio can be secured.

Fairfield Suiting 10c Yard

Duck Suiting in plain navy blue, tan, red and black; or red, blue or black, polka dots on white ground; a light weight fabric for hot weather.

IMPROVEMENT OF COLUMBIA URGED BY CHAMBER OF COMMERCE

Striking Arguments in Favor of Scheme Are Presented in Committee Report.

UNCLE SAM DISLIKES TO SPEND HIS MONEY

Committee Alleges That He Is Paralytic When It Comes to Appropriations for River and Harbor Improvement Work.

Striking arguments in favor of improving the Columbia river, even at what may seem to Americans an enormous cost, are given in the report of the transportation committee of the chamber of commerce recently issued. The committee points out that Uncle Sam, in the matter of appropriations for river and harbor work, is extremely parsimonious, spending for such work much less than many nations of vastly smaller resources. The committee's report says: "We believe that when the people generally realize the comparatively small amounts appropriated for river and harbor improvements, and the great waste and loss, both direct and indirect, caused by delay, they will demand that appropriations be made in sufficient amounts to properly care for and complete all approved projects. There is no reason why this should not be done. There is no promise for which money is expended by the United States that does so much good to such a large number of people. The United States has taken jurisdiction over the navigable waters and harbors and it is in duty bound to improve them. For a number of years past the amount available for the improvement of the river and harbor work has been but about \$15,000,000, and this in many cases has been appropriated at such long intervals as to greatly increase the cost. No part of the country has a greater interest in the speedy completion of the Panama canal than has the Pacific coast, but at the same time it does seem that \$23,000,000 or thereabouts can be appropriated for the Panama canal by this congress, a river and harbor bill for home purposes might have been in order. "It would also seem if it is right and

ber of commerce, the best authority on industrial ethics, says in its journal editorially that the enormous sums expended in France, Germany, Austria and other countries on the continent in construction of canals and other waterway improvements is from the enlightened commercial policy, giving the easiest and most economical transportation of their products to market, and unless Great Britain adopts similar measures she will lose her preeminence as a producing nation. As to the benefits to come from such expenditures note what Mr. Albert Noble, president of the American Society of Civil Engineers and one of the consulting engineers of the Pennsylvania railroad, says: "The amount of saving on Lake Superior alone during the year 1902 is within \$5,000,000 of the entire amount appropriated by the United States for all harbors and waterways above Niagara falls from the enlightened commercial policy, giving the easiest and most economical transportation of their products to market, and unless Great Britain adopts similar measures she will lose her preeminence as a producing nation. As to the benefits to come from such expenditures note what Mr. Albert Noble, president of the American Society of Civil Engineers and one of the consulting engineers of the Pennsylvania railroad, says: "The amount of saving on Lake Superior alone during the year 1902 is within \$5,000,000 of the entire amount appropriated by the United States for all harbors and waterways above Niagara falls from the enlightened commercial policy, giving the easiest and most economical transportation of their products to market, and unless Great Britain adopts similar measures she will lose her preeminence as a producing nation.
