

FREE MILLING ORES ARE SHOWING GREAT VALUES

Blue River District Has Been Developed Almost Entirely by Local Investors.

FREE MILLING ORES ARE SHOWING GREAT VALUES

Ledges Opened Up Promise to Astonish the World With the Enormous Output of Gold When Properties Are Worked.

(Special Dispatch to the Journal.) Blue River, July 24.—The Blue River district, which has been justly named "the free milling district of the west," is also the home of the western investor, for with but two or three exceptions the development thus far has been done with western and that principally Oregon capital. The cooperation of capital and labor in the Blue River district will, in the near future, surprise the outside world with an enormous output of gold when a few several mines in operation, working full crews day and night, which yield large profits for their owners, and many others under course of development, while it is the matter of only a short time until they, too, will be classed among the producers.

The Lucky Boy, which is the pioneer mine of the district, needs no comment, since its past record has proven it to be a very rich mine. The Great Northern, also a producer, located on the Calapooia side of Gold Hill, about three miles distant from the Lucky Boy, last month, with but four stamps in commission, took out 23 pounds of bullion. These are some of the facts which go to prove the vast mineral wealth of our state.

The Treasure mine, which is now employing 30 men, will soon put on a full crew. On this property has been done some of the most systematic and substantial development work of the state. This property has extensive buildings and an up-to-date mill with monster machinery, which is owned and operated by English capital. Dr. Candiani is working full crews, and is now opening up the Allright Dollar claim by a crosscut to reach the main ledge on the Doctor, which claim joins the Lucky Boy on the west.

A 25-horsepower sawmill is in operation on property. The Blue River Consolidated, incorporated, owned by Colonel Dodge, C. Runyard and others, which joins the Candiani group, will soon be a scene of activity, as they expect to begin extensive work in a short time. A small fortune was taken from this property prior to its present ownership. The Union mine is another property of the district which is taking out good values, as is also the Wood & Diamond mine on Quartz creek.

The Princess group, which is located on the southwest side of Gold Hill, near the head of Simmons creek, is owned by W. L. Becker and Martin Matson. About 400 feet of work which has been done on this property has opened up ledges which carry values from \$3.35 to \$10 per ton, which are being incorporated, another property on the southwest side of Gold Hill, on Simmons creek, has had sufficient development work done to prove it a good property. The ledges on this property give values from \$3 to \$10 per ton, and average assays give them \$5 per ton.

Monster Ledges. The Western Oregon Mining & Milling company's mine is located on top of Gold Hill, and on this property has been opened up some good ledges, which carry values from the surface and promise a great future for the owners. J. E. McCauley will soon begin operations on his property, which 800 feet of development work has been done, which opened up ledges 40 feet in width which average \$1 per ton.

William Robe has very recently opened up a ledge on his property on the north side of Gold Hill which is proving to be very rich. The Great Western Mining & Milling company's property is located on East Quartz creek, through which runs the enormous ledge of the Lucky Boy mine. This property has a great future promised through its good values, fine water power and enormous growth of timber. Ore from this property assays from \$3.50 up into the hundreds per ton.

Opening Rich District. The Cinderella, Tate Bros., the Christian & Fisher group, the Rowan and Ruby, owned by John Liens of Seattle; the Dexter Sparks group, owned by Roberts & Sons; the Cuba, the Alpha, the Chubb creek group, the Wright Bros. mine on Jaybird creek, Kyo & Hankinson property, and others, the development of which has shown the vast mineral wealth of the Blue River mining district, prove without doubt of the most desirable districts being opened up today from the fact of its economic opportunities for development. The cost of handling the ore in this district is 75 cents per ton, while the transportation cannot be beaten the world over. With free milling ore carrying good values, plenty of water and timber; with capital and labor united, what greater opportunities could anyone ask for? The storehouse of mother earth awaits the efforts of the energy of man when she will yield bountiful rewards for their labor.

Representatives of eastern capital have been looking over the district recently with the view of building a railroad to Blue River, which event will only be a matter of very short delay, since capital has come to realize the time is now ripe for such investment. The day is not distant when the state of Oregon will be one of, if not the greatest, mineral producing states in America.

HEINZE GETS RICH COEUR D'ALENE MINE

(Special Dispatch to the Journal.) Spokane, Wash., July 24.—The Stewart mine in the Coeur d'Alene has been purchased by F. Augustus Heinze of Butte, the deal being closed Saturday night. It is said that the new owner intends going into that district on a much larger scale. It is understood that Mr. Heinze secured more than 900,000 of the 1,000,000 shares for something like \$400,000.

Relatives Planning to Contest Will and Secure Slice of Financier's Wealth.

FUNERAL HELD TODAY INTERMENT AT TROY

Clever Provision in Testament May Defeat Efforts of Will-Breakers—Charities Are Remembered Only Through Widow.

(Journal Special Service.) New York, July 24.—The funeral of Russell Sage, who died Sunday at Lawrence, Long Island, will be held this afternoon in the First Presbyterian church. Rev. Robert G. Leitch, pastor. The burial will be in Oakland cemetery, Troy.

The following have been selected as pallbearers: William F. Dixon of Cedarhurst; Elbert A. Brinkerhoff of Far Rockaway; George C. Rand of Lawrence; Newbold L. Lawrence of Lawrence; Albro J. Newton of Far Rockaway; J. L. Lawrence of Lawrence; Franklin Lord of Lawrence, and Dr. J. Carl Schmuck.

Needs Of Litigation.

The World says: "Unless there has been a final codicil added to the will of Russell Sage, executed five years ago, the 'surprise' which was promised in the disposition of his personal property will be the shrewd manner in which he has headed off all litigation over the estate. 'To one of his closest personal friends he confided his plan, which was to execute a testament, which in its intent and purpose would make him die intestate in one half of the estate. In other words, he observed the law by making three or four specific legacies in which the widow was not mentioned at all, and the rest of his property to be divided according to the statute of distribution. 'As he is childless, this would leave his widow one half instead of one third, her dower right, and cause the partition of the remainder among his next of kin, according to the degree of consanguinity, thus cutting off any chance of contest.'"

Prepares to Contest.

The Herald says: "Preparations for contesting the will of Russell Sage in the event of the provision is not satisfactory, has already been made by relatives of the financier. Nephews, grand-nephews and others more remote are said to be considering steps for legal proceedings. 'Each of several brothers and sisters, none of whom are living so far as is ascertained, but various kinsmen who bear the name and who are scattered about the country are looking to see if the family tree might not bear apples of gold. There is a report current that a nephew who had resided in this city will be among the first to take action in the case if he is not adequately remembered.'"

Most of the relatives were not on especially good terms with Sage. Rumors that the bulk of the great fortune of Russell Sage, estimated at between \$30,000,000 and \$100,000,000, will go to charity were so persistently circulated in Wall street today that they were looked on as having a basis. In fact they were fettered by men who were associated in business with Mr. Sage for many years.

Widow Is Charitable.

So far as could be ascertained, however, the idea of charity would be overtly remembered in the distribution of the Sage millions rests absolutely upon the well-known charitable disposition of the widow. Mrs. Sage's charities while unostentatious, have been wide and beneficial. It is believed that she interested her husband in many of the projects which she and Miss Helen Gould have helped.

The generally accepted forecast of the Sage will was that Mrs. Sage will have the handling of the great sum to be expended in charitable donations, while other executors will be empowered to carry on the business and attend to other bequests.

Labor Day Pageant.

(Journal Special Service.) Washington, July 24.—Of Oyster Bay on Labor day the president will review the largest American fleet ever assembled. It will be in command of Admiral Evans, with Admiral Brownson second in command.

Do You Want to Know What You Swallow?

There is a growing sentiment in this country in favor of medicines of known composition. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. E. V. Pierce, of Buffalo, N. Y., has taken time by the forelock, as it were, and is publishing a broadsheet list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery," the popular liver invigorator, stomach tonic, blood purifier, and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and invalid women.

This bold and outspoken movement on the part of Dr. Pierce, has by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities of all the leading schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

\$50,000 GIVEN AWAY, in copies of Dr. Pierce's Pleasant Pellets are being distributed.

Dr. Pierce's Pleasant Pellets are tiny, sugar-coated, non-bitter granules. They cleanse and invigorate stomach, liver and bowels. Do not hurt the delicate stomach or cause constipation. One or two each day for a laxative and regulator, three or four for an active cathartic. Once tried always in favor.

Medical Advice, a book that sold to the extent of 500,000 copies a few years ago, at \$1.50 per copy, is now being given away.

It contains 100,000 words of these invaluable books. This year we shall give away 100,000 more of them. Will you share in this benefit? If so send only 25 cents for a copy of this book in full payment for your copy of the book. It is mailed only for book in full payment for your copy of the book. It is mailed only for book in full payment for your copy of the book.

For Sick Women To Consider

First.—That almost every operation in our hospitals performed upon women becomes necessary through neglect of such symptoms as backache, irregular and painful periods, displacements of the female organs, pain in the side, burning sensation in the stomach, bearing-down pains, nervousness, dizziness and sleeplessness.

Second.—The medicine that holds the record for the largest number of absolute cures of female ills is Lydia E. Pinkham's Vegetable Compound. It regulates, strengthens and cures diseases of the female organism as nothing else can.

For thirty years it has been helping women to be strong, curing backache, nervousness, kidney troubles, inflammation of the female organs, weakness and displacements, regulating the periods perfectly and overcoming their pains. It has also proved itself invaluable in preparing women for childbirth and the change of life.

Third.—The great volume of unsolicited and grateful testimonials on file at the Pinkham Laboratory at Lynn, Mass., many of which are from time to time published by permission, give absolute evidence of the value of Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's advice.

Mrs. Pinkham's Standing invitation to Women.—Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only. From symptoms given, your trouble may be located and the quickest and surest way of recovery advised. Mrs. Pinkham is daughter-in-law of Lydia E. Pinkham and for twenty-five years under her direction and since her decease she has been advising sick women free of charge. Out of the vast volume of experience in treating female ills Mrs. Pinkham probably has the very knowledge that will help your case. Surely, any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.

THE MALM-LENE

BY HELEN HANCOCK

ABSURD EMBROIDERY.

The woman who goes in for embroidery should remember to be moderate in all things. Nowadays we see the absurdly "aesthetic" painted chopping trays and fire shovels, or the callings in the umbrella stand and sunflowers in the butter crock that raged a quarter of a century ago. But we are yet to see the absurdity of the costume which is made up of hand-embroidered parasol, hat, stock jacket, shirtwaist, mitt, card-case, bag, belt, skirt, stockings and slippers.

CURED NAIL BITING.

A mother, whose little daughter had the habit of biting her nails, had tried numerous unsuccessful devices for curing her before she hit upon one which proved eminently effective. The secret is less than the gift of a mannaure sent, with permission to use it all she wanted to. As the child learned to polish and trim her nails her joy in them grew apace until pride quite put to rout the ugly habit which no amount of coaxing or scolding had been able to break up.

LEADERS IN ENGLAND.

Lady Henry Somerset says that in the women's trade unions in England the leaders are no longer women who are philanthropists and lecturers, but members of the class they support and conversant with actual conditions as they exist. Mrs. Mary Elvery is such a one. She began to work as a waistcoat-maker at the age of 14, at 3 shillings a week. In 1904 she formed a branch of the tailors' union and since then has been found on all the women's labor platforms in two or three of all demonstrations of women's rights.

CARE OF THE MATTRESS.

The daily turning over is not the only necessary attention for the proper treatment of a mattress. This operation itself is liable to strain the back and pull the stuffing out of shape in course of time. To avoid this, handles may be sewn to the sides, so that the unyielding surface of the mattress itself need not be grasped. These handles, from webbing or a crosspiece of ticking and sewn as firmly as possible to the sides.

CORN FRITTERS.

Take one dozen ears of young corn, cut the grains down the center and scrape all the corn off the cob. Stir in gradually two tablespoonfuls of flour, three eggs beaten light, salt and pepper to taste. Mix all well together. Allow one tablespoonful of each fritter. Fry in boiling lard and send to the table hot. These are also breakfast dish and may be prepared the night before.

DAINTY WOMEN.

The most expressive word that can be applied to a woman is dainty. A woman may be stylish, well dressed, good looking and lots of other things, without any considerable expense, but to live up to the requirements of dainty means something more. It means absolute freshness of necktie, light gloves, etc., and can be achieved by the woman of any average means if she will have a weekly wash of muslins, laces, gloves, etc., herself and not grudge the extra time spent in getting up these dainty articles. It means soap, starch and water in abundance.

Women who would be shocked at the idea that a stranger should see them in dishabille, or with hair in curling operators at this place: J. B. Taylor has been transferred to Eugene, where he will succeed A. J. Gillett in the passenger department; C. A. Pengra will
