DUKE FINDS HIDDEN RIVER IN DARKEST AFRICA

D'Abrussi Makes Public Discoveries Interesting to the Scientists.

(Journal Special Service.)

Marseilles, Sept. 17.—The Duke D'Abrussi, who arrived Friday night, made the first announcement of the scientific results achieved in his latest explorations in the interior of Africa. One of the most important of these was the discovery of a river never before described in any geography. He marked its course and measured its volume of flow.

In further explorations of Ruwenzari, the great mountain of Lake Nyanza region, the duke marked five hitherto unmeasured peaks of a height of 5,600 meters. He reports that the glaciers of Ruwenzari are extensive.

Of more novel interest is the explorer's account of the fauna and flora of the region, which he says are very strange, being like nothing known in Europe or other parts of Africa.
