Trust to Nature.

A great many Americans, both men and women, are thin, pale and puny, with poor circulation, because they have ill-treated their stomachs by hasty eating or too much eating by consuming alcoholic beverages, or by too close confinement to home, office or factory, and in consequence the stomach must be treated in a natural way before they can rectify their earlier mistakes.

BENNETT GIVEN FAIR HEARING

School Board Building Committee Investigating Contractor Who Is Behind in Work.

In an effort to reach some understanding as to the completion of the unfinished school buildings, Herman Wittenberg and I. N. Fleischner, the building committee of the board of education, are this afternoon meeting with J. E. Bennett, the district contractor, at the Sunnyside school.

Several contractors will be called upon to act as referees and give expert testimony as to the material used.

At the meeting of the directors last evening Mr. Wittenberg reported that nothing had been done. "He has several times been notified that we will accept nothing but first-class material," said he.

The directors will meet Thursday afternoon next at that time the question of a general raise in janitors' salaries will be considered.

Thomas Farley was elected janitor of the Sellwood school in place of T. J. Brown, who resigned on account of ill health.

THIRTY BUSINESS MEN GO ON SPOKANE TRIP

Before the list was closed last evening more than 30 Portland business men had reserved berths for the Spokane trip and on the opening of the Pacific Northwest conference today this city and the state of Oregon are the most strongly represented section of the northwest. The meeting will last two days.

It is believed the conference will bring important results in shaping the exploitation policy of the four states in this corner of the nation.

Large sums of money have been spent by individual organizations in advertising the resources and bringing the business opportunities to the attention of eastern investors, and the results already obtained have justified the proposition that larger sums than ever should be expended for this work during the year 1907.

It is proposed that the four states shall combine and carry on a harmonious campaign, using advertising methods that will not only apply to the individual sections but will benefit the whole region represented at the Spokane meeting.
