Occasion may be the bugle call summoning an army to battle, but the blast of a bugle can never make soldiers nor win victories,-Garfield.

THE LOGICAL CONCLUSION.

THEN young Senator Bev eridge and Senator Lodge make an appeal to Republicans, saying the Democratic party should not be trusted with government itself, they are oblivious to logic in a way quite discreditable to senntors. There can be no valuable opsition to a good thing, so if the Republican party is all right all opposi-tion to it is bad. If it is not all right and the Democratic party points out its errors and the remedies, then the mocratic party is the one that should be trusted to correct these errors and apply the remedies.

The fact is the Republican party has been the party in power for nearly half a century. It is responsible for litical party is responsible. It is appealing to popular feeling today on what they please, these achievements have been along Democratic lines, with Democratic aid and against the real feeling and real creed of the Re- year's gold.

Every man knows in his heart that the Republican leaders had to be dent. Everyone knows that the Reand in the organization would knife Roosevelt to the heart if they dared.

as an opposition, it is more valuable as a party to be entrusted with power to kill the evils it opposes. That is

PROTECTION.

E X-GOVERNOR DOUGLAS of in Portland, though a manufacturer on a very large scale, is not a protectionist, and says that only the trusts receive the benefit of protection. Shoes, he says, and he knows is fond of intervening can find a what he is talking about, can be sold In large quantities abroad in competition with foreign manufacturers, and a far greater amount of them could be sold abroad except for the duty on hides and sole leather-a duty that Boes the farmer and cattle-raiser on a small scale no good whatever, but only benefits the beef trust. Amer-Ican manufacturers of shoes pay higher wages than are paid abroad. but they need no protection in order to do so. The reasons for this have been often stated, and need no repetition. That the duty on many arsimply a means of enabling the manufacturers to extort unreasonable profits from American consumers is demonstrated in many instances. The case of steel is a luminous one. Amerlean steel is sold in many foreign countries at the American price less the duty, the manufacturers paying of the country to the other as the freight abroad besides. The duty of \$8 per ton or more is simply a legal holdup of American consumers in order that the trust may make profits amounting to tens of millions year. This is only one example of many that might be mentioned, all of thich show that high duties have for neir sole object the enrichment of frusts or combinations of manufacurers, and monopolists of necessaries. he plea that the high duties protect the American laborer is wholly deusive and meretricious. Employers buy their labor as cheaply as they can for labor is still loud, continuous and who divide profits with their em- the Pacific coast. ployes are very rare. The high duty enables them to amass millions, to take trips to Europe and play high stakes at Monte Carlo, to divorce heir wives and squander fortunes on radora girls, to marry their daughers to foreign titles, to buy Ameran congressmen, to corrupt elecons and to consider the common unger and oysters.

MILD CLIMATE.

THE Manufacturers' Record published in Baltimore, speaking of the advantage of a mild limate for building operations, says: There is no day in the year in which some crop cannot be grown in some one of the 14 southern states or in which stress of heat or cold may compel a suspension of manufacturing. n no part of the south are the win ers so severe as to limit for many days at a time any kind of work upon ouildings, and in most of it there need be, on account of weather, no interruption of work into which reenforced

Almost the same could be said of the Pacific coast states, whose winter climate is scarcely more severe than that of the central south. Rains, if somewhat continuous at times, are scarcely ever severe, frost in the lower altitudes makes but brief visits, and many kinds of work go on with but little interference or interruption.

The Record has building and manu-

facturing operations only in view, but to the agriculturalist, the dairyman and the stockman the mild winters of a great portion of the Pacific coast are of even greater value than to mechanics. As compared with northern states east of the big divide stock needs but little feeding and along the is a good party of opposition but coast almost none; farm operations can often be carried on extensively in one or more of the winter months, and outdoor labor, with rain-proof apparel is not only possible without great discomfort, but there is always plenty of work to be done to advantage, as is not the case in a frozen-up region. Then the fact that this region is free from blizzards, cyclones, tornadoes and very destructive floods is another big item in its favor,

Take it year in and year out, one year with another, the Oregonian has no good reason to complain of the climate. If after living here a few present conditions, so far as any po- years he goes back to Minnesota or New England or Kansas or even down south, he is likely to have the the strength of President Roosevelt's Oregon fever until he comes back or achievements. And they may say dies, hoping that heaven is as good a place as Oregon,

Smile at the rain. We need lots of it. It is beginning now to rain next

THINGS PRINTED TO READ WHILE YOU WAIT.

Good American Business.

Practically every industry in the country (except where strikes prevail or are threatened), led by iron and steel, is crowded to its utmost limit with orders, several of them having booked to their capacity for the first half of 1907. Iceland has decided to buy American goods direct instead of through Denmark. Arizona ranks third among the state

and territories producing copper ore. Its manufacturing capital (census of 1905) are better paid than those of any other state or territory in the union; it has nearly \$12,000,000 on deposit in its financial institutions; only 25 women and is children are included in its 4,703 wage earners, or 48.5 per cent less than in 1900; of its 130,000 population 98,000 are white; it is in good shape for separate statehood.

In five years, 1900-05, the larger American factories increased their invested capital to \$12,685,000. is \$14,395,000, an increase of \$4,575,000 in five years, and its yearly manufacturing output is \$28,082,000, an increase of \$7,644,000. Its female school teachers are better paid than those of any other

American factories increased their invested capital to \$12,635,000, a gain of 41.3 per cent; their yearly product to \$14,500,000, a gain of 25.7 per cent, and their yearly wage-earners' payrolls to \$2,611,000,000, a gain or 29.8 per cent. The number of wage-earners increased 15.3 per cent. Good American business is now caus-

Good American business is now causing the output in our country of 1,600,000,000 pounds of copper yearly, worth probably \$180,000,000, to sell, with a profit on the operation of \$80,000,000 a year. After supplying home needs we exported in the past 12 months 450,000,000 pounds of copper and 15,000,000 pounds of brass. In this we got not only a profit on the metal but also a profit on its manufacture into bars, ingots, etc., from countries abroad. ots, etc., from countries abroad. Before the fires had cooled in Valpe

Labor Question in China.

The almost universal use of fans in many parts of China gives rise to an important industry. In Nanking some 60,000 or 70,000 people are employed in the work of making paper fans. Hardly any machinery, except that of the simplest kind, is used at present but enerprising foreigners are investigating the possibility of supplanting handwork by machinery. Doubtless machines could be devised which would reduce the demand for fanmakers to less hundreds demand for fanmakers to less hundred than there are now thousands employed in Nanking, but what would happen the displaced thousands?

Disappointing Hospitality.

When the guests had gathered and were ready to go out, the host, with his politest bow, said:
"Mr. Blank, will you please take Miss Dash out to discount.

Here below the lovers mourn Friendships dead and hearts forlorn; I dream of the ties that shall never

torn.—Charles Houston Goudiss.

The Useful Walnut.

In some parts of France walnuts form a regular article of diet. The peasants eat them with bread that has oftentimes been rubbed with garlic. The hygienic effects are considered good, replacing meat to a large extent. These nuts are also used to make oil. It is much cheaper and similar in taste to that pressed from olives, and is employed to adulterate the latter. The prisoners in certain prisons are engaged prisoners in certain prisons are engaged in cracking walnuts and picking out the kernels, which are pressed into oil.

Telephones in Theatre Boxes.

To enable young married women. It they become anxious, to telephone home and inquire as to the condition of their children, telephones are fitted in every private box of the Collseum.

private box of the Collseum.

The "Interests" in Mexico

BUELL BUTTERFIELD, IN THE PUBLIC.

It may seem venturesome even to assume the possibility of war between the United States and Mexico. But forewarned is forearmed. Nothing will be lost and something for international peace and national independence may be gained, if the people on both sides of the line are watchful and thoughtful.

The plutocrats of the United States, in 1845, provoked an unjust war for the double purpose of despoiling Mexico of a great slave-holding territory, while diverting public atention from the slavery question then being agitated. So in 1895, did the newer interests of monopoly foment the Cuban revolution against the wasts spain, providing the Cubans with money If General Funston is not needed spain, providing the Cubans with money and weapons, while the plutocratic newsto prevent the Cubans from looking papers fairly breathed the spirit of inpapers lairly created the spirit of in-tervention. We do not seen know who it was that destroyed the battleship Maine at Havana, and thus brought on a war which all efforts until then had falled to precipitate, and which brought subject colonies into the control of the Interests, besides, most important, help-ing to tide over the election of 1900.

> The habit of sacrificing nations to themselves is nearly universal among privileged classes threatened with equal-ity. The war in South Africa was fought to acquire a rich subject territory, and save the Jingo power in England. The war in Asia had two objects: To con-quer new subject territory, and to save the autooracy of Russia. These wars falled of their greatest objects—the killing of the discontented, and the diverting of public atention from the nation's real enemies. Yet such wars are re-peated again and again, and even how the plutocrats of the United States in-tend that their nation shall go to war. For years they have visibly been cast ing about for some suitable country wit which to war. Germany offered, but such a nation cannot be despoiled, even if vanquished; Morrocco, Venezuela Santo Domingo, China and Colombia

have all been looked over with war in view within three years. But no nation

of great refinement. A girl well known in certain hunting circles told me that after dinner in the billiard-room a man came up and said: Do let me weigh came up and said: Do let me weigh you, Miss X. I will carry you across the room. There were weighing scales in the room, but when I quits good-naturedly refused, he then actually said: Well, look here, if you don't let me carry you I shall empty my whiskey and sods down the back of your freek."

Every natural human right is as well guaranteed in Mexico as in the United States, and the vast riches of Mexico are open to all the world. The man in New York has only to ask for what he wants and when he appeared on the scene it was to meet the disapproving watchfulness of an alert government. At every turn the great monopolist, elsewhere always victorious, was quietly checkmated by the man who has never made \$1,000,000, but has made a nation prosperous and happy. But the interests never give up; they will not relinquish their intention of dominating Mexico. There also must they resort to war, if they are to accomplish their purpose.

complish their purpose.

They have stirred up rumors of revolution, a thing that for 30 years has been of the past. Probably the riote at the copper camp of Cananca last June were of their making; for the lives of their countrymen are nothing to then and the copper trust is fully capabl of having committed that double tres of having committed that double trea-son. Very likely the present insurrec-tion in Cuba, like those fomented in Venezuela by the asphalt trust, comes about through their machinations. How quickly comes the talk of intervention Did not just such a revolution once take

wiew within three years. But no nation answers the requirements so well as Mexico.

Mexico is contiguous territory. Its government is antiplutocratic. Above all, while not able to withstand the United States, it can put up a real fight, one that will keep the United States busy until after 1906. Meanwhile, the interests could run things as they please; could buy high per cent bonds and could sell embaimed beef to both sides. Afterward, two exhausted nations would be at their mercy—one to be despoiled of Sonora and the other of its public rights.

In a long contest Mr. Rockefeller has been fairly beaten by President Dias. Rockefeller's efforts to dominate Mexico have always been met by mansuvers which left him where he begam—with the same powers as others have. When Mr. Rockefeller's railroad (the Central) tried to buy the national system the government bought in abead of him; when he spoke of acquiring the Mexican oil wells President Dais advocated, in a published interview, that they be nationalized. When Mr. Rockefeller contracted to buy the whole oil output the government proposed to buy his junk line, the Central, At different times, corners and trusts have been established, each time to cold lepse at the prompt removal of the tariff. In spite of all of the rumore, there

of Ohio Wesleyan university. His work in obtaining money for the university attracted the attention of the newly formed Church Extension society, which enlisted him as assistant secretary. In 1884, at a critical period in the existence of the Methodist Missionary society, he undertook the secretaryship of that important organization. During his long connection with these two societies Dr. McCabe's work has made him famous throughout the Christian world. famous throughout the Christian world.
Millions of dollars have been raised and expended under his auspices. His voice has been heard in more hamlets, villages, towns and cities than that of any other living Methodist.

The Play

ing the Washington street theatre. The curtain arcse on almost schedule time and disclosed to view some grimy scenery and some grimy contumes upon some girls whose forms were alapely

Then there passed before the audience the usual comic opera characters, all of mediocre ability, and at last Fred Warren, as Bolivar the Mummy, dropped before the footlights. From that time until the last curtain fell Fred Warren worked his mightlest and what credit goes to the show goes to Fred Warren. He made the most of his role, he labored incessantly to provoke a laugh, and he won. He is a comedian, is Warren, worth the price of admission. But and he won. He is a comedian, is Warren, worth the price of admission. But
the crowd of chorus girls that at
tempted to back him up, though they
worked hard enough, falled to evoke any
great amount of enthusiasm. The audience kept its eye on the wings waiting
for the entrance of Warren.

As a show "The Maid and the Mum-

As a show "The Maid and the Mummy" is superior to "The Boyal Chef."
There are several strong hits in it, the most popular ones being "Sad Experiences." by Warren, Earle Dewey and Joe Edmonds; "Gee! It's Great to Bo Crany." by Edmonds; "I Fell in Love With Polly." by Dewey and chorus; "The Little Village Cut-Up," by Selma Harris, and "Peculiar Julia." by Dewey and chorus.

and chorus.

In this last number the chorus really made a hit. But it was the only place here the chorus did.

There was an abundance of characters

There was an abundance of characters in the show, and it was characterized, as are all of Carle's productions, by a dash and go that keeps an audience guessing. But 'The Maid and the Mummy' fails to hold together consistently, and one is inclined to think the real good of the show is smothered in the number of characters and the effort of the producers to give each one a chance to make a hit. There wasn't an excellent voice in the entire aggregation. Earle Dewey comes the nearest antistying in that line. Nong of the female members of the company could sing. Costumes were changed frequently, but they all bore stains of an eastern season and a trip across the continent. Fred Warren, with a droll milmiery, and Earle Dewey with his songs and his natural stage walk, constitute 'The Maid and the Mummy.' It is a case of a than and a mummy, because the maid wasn't there last night situte "The Maid and the Mummy." It is a case of a man and a mummy, because the maid wasn't there last night and isn't the play at all. The maid is entirely secondary; and it would have been more consistent to have called the show "The Mummy." But that would never have done, of course. There has to be a maid in a comic opera.

"The Maid and the Mummy" was here

She must be sober and eminently superatitious. I am 50 years old, would be taken for man of 45. I am sound, have a good appetite—I love little children. I am working at Hurd's mil, am an old democrat and believe in that good old democratic principle, "The hair of the dog is good for the bits." I have a ranch on north Ten Mile.

The Latest News From Rabbitville

REPORTED BY A. BENNETT, OF THE DALLES OPTIMIST.

I went up to the fair at Pendlaton and seen the whole show from a to insard, and it was a hummer. There has been bigger shows and better shows mebbe, but at Pendlaton a feller could take it all in and have a bully good time, and not get robbed or tromped on by the mob. And I tell you they had a lot of fine things to show us, all raised in them two counties of Umattilis and Morror. I seen seme horses there that sure was daisies, and cows, too, and pigs and chickens, and lots of all kinds of grain, and fruit that would make a feller think he was in God's own country for sure. And I seen a watermillion that would break up the biggest nigger campmeeting that ever camped in this or any other country. It was bigger nor a barrel, and wayed over fifty 5 pound by the watch, and the foller what brung it from Irrigon said liew it was took to the fair before it was near done growing. I gess mebbe it would way at least a hundred pound if it was left to get its full early so not to disturb the services. A

I went out to Tom Halley's ranch to see his pigs and cows, and too Jeff Myers and Mike Wisdom and Fred Locksley along, me and Tom did. I say "Tom," and he is jest "Tom" up there in his old home, where people know him and love him. When he gets down to Salem he is "Judge Halley," and when he sets on the bench in the sooprame court he is every inch a judge. As we drove along I heard lots of rich men holler out in joyous tones, "Hello Tom," and lots of poorfolks in the same joyfull way say. "Hello Tom," and I though mebbe it was better to be so loved than to be a judge.

This has been a big weak in Rabbi ville, and if ennybody evver doubt about us getting to the front let him no longer doubt. Everything is her no longer doubt. Everything is on the move. Hank Stifel sot a new poit for his gate carry in the weak, and rite on the hears of that Old Man Bunco whitewashed his hen house, and then al-most before the whitewash was dry Major Fairply cleaned his winders, and not to be outdone Simm Dipp put a new ridgepole into his tent. I tell you the coming of Jeff Myers into our midst to be one of us has put us all on our mettal, and there is nothing now that can keep us back, but a famine or a pestilence or mebbe a raise in the price of perscriptions.

Language of Umbrellas.

There is a language of umbrellas as of flowers. For instance, place your umbrells in a rack, and it will often indicate that it will change owners.

To open it quickly in the street means that somebody's eye is going to be in

To shut it quickly signifies that hat or two will probably be knocked

An umbrells carried over a woman the man getting nothing but the drippings of the rain, signifies courtship.

When a man has the umbrella, and the woman the drippings, it indicates marriage.

no robbery."

To purchase an umbrella means "I am not smart, but honest."

To lend an umbrella indicates "I am a feel."

early so not to disturb the services. A duett will be sung by Lina Butterbottom during the lifting of the collection, the

The city drug stere has just received a fine stock of hose and hose, the former for lady's ware and the latter for sprinkling purposes. Also some eggs, which are offered cheap for cash as some of them are not evry fresh. And some butter that is warranted to please. And a few more of them number 3 mackerrel and a hamm. Also some gimblets and wire neles and a few seeder-fence posts. Also dry goods of every description, and a cupple of large sized coffins which will be cut down to fit any purchaser, and do not forget we serve perscriptions at any hour day or nite.

Hank Stifel is trying to induce the dominie to run a protracted meeting next weak as Hank says he would like to get some religion, not having converted now for most a year. M the dominie will do it.

We don't think of anything more ridgepole into his tent. I tell you the coming of Jeff Myers into our midst to be one of us has put us all on our mettal, and there is nothing now that can keep us back, but a famine or a pestilence or mebbe a raise in the price of perscriptions.

Everybody is talking about the site for the new haul for the new order of old promise when he is sober.

To give a friend half your umbrella means that both of you will get wet.

To carry it from home in the morning means. "It will very likely be a fine day."

Oldest Ship Afloat?

The De Tvende Brodre is her name, and if she is not she ought to be the oldest ship at present in commission on the four oceans. Only a few weeks ago this old sailing ship, whose keel was laid at Mazatsi, Prussia, in 1726, arrived in Swedish waters, and in February of next year she will celebrate her 121st birthday.

her 121st birthday.

Not only is the De Tvende Brodre in a class by herself in point of age, but ahe is just as interesting so far as the history of her skippers is concerned. During all the years she has been on the seas she has had but five captains, and syery one of these skippers belonged to the same family. The first skipper navigated the vessel for 29 years, the second 22 years, the third 20 years, the fourth 23 years and the present skipper has been 17 years in command. At the present time the De Tvende Brodre is taking on cargo in the harbor of Nykoping, Sweden.

Owing to his business affairs at home, Hoke Smith, the new governor of Georgia, has found it necessary to decline the invitation to take the stump in Texas. Despite the fact that their success is assured the Democrate of the Lone Star state are pursuing a vigorous campaign with a view to rolling up an unprecedented majority.
