It Is Worth While to Study What We Say About Extra Widths and Sizes in Shoes

Owing to the extra number of widths we constantly carry over other merchants, it enables us to fit your feet better than anyone else and don't you know in reality that fit should be your main thought in selecting a pair of shoes. So far as leathers are concerned you are running no risk when you trade with a reputable house, the risk is entirely in the fit. If not correctly fitted you will only get about half the wear you are entitled to and right here is where our experience and extra widths come into play. We give you the perfect fit, which adds 80 per cent to the wear.

We've 33 lines of women's Shoes, in widths from AAA to E in every one of the good leathers and all the latest styles and lasts and everyone of the styles is hand made; the price is **\$3.50** moderate; **\$3.00** and **\$3.50**

We are having one of the biggest sales in shoes we have held in a good many months; the prices
