EARTHQUAKE DISASTER IN GERMAN NEW GUINEA. (Special Dispatch to The Journal.) Vancouver, B. C., Nov. 24.—News of alarming earthquake shocks in German New Guinea, followed by tidal waves, which devastated native villages for the distance of 50 miles, causing heavy loss of life, was received by the steamer Miower this morning. Captain Prejawa, of the German ship

Siar, which reached Sydney, Australia, brought the report that when anchored near Finchhafen his vessel rolled heavily and vibrated considerably. Investigation showed the shock was due to seismic disturbances. While steaming along the New Guinea coast Captain Prejawa noticed fissures in the mountain side. Some were fully two feet long and 100 feet deep. Houses and boats were carried away by a tidal wave and the country was devastated for 40 miles. At Chissed Island, in the Dampier straits, a tidal wave wrought great havoc, hardly a native had being left. Thousands of natives perished.
