Brix Introduces a Bill Which Grants Inestimable Privileges to Lumber Kings.

ALL STREAMS ARE MADE THEIR COMMON CARRIERS

(By a Staff Correspondent.)
Salem, Or., Feb. 5.—Representative Brix of Clatsop county has a bill in the house providing in brief that all streams which at any time of the year, during normal stage or freshet time, are capable of floating logs or lumber skingle bolts or ties, are by that token

sitingle bolts or ties, are by that token public highways, and that all companies floating logs or using the waters for the purposes of the lumber business are by that fact made common carriers.

Should this bill pass it would grant inestimable privileges and rights to the big lumber companies of the state as against the rights and holdings of the small property holder or to the timber land owner. It provides that any corporation which uses any stream subject to the act, can improve it to suit its purpose by deepening the channel, and can construct flash dams for floading the stream during low water in floating logs from the upper waters.

Power to condemn riparian rights and ownership existing prior to the improvement of the stream is conferred by the bill so that according to its provisions a lumber company could tear out the power dams or the irrigation works.

out the power dams or the irrigation works of a property owner along the stream in order to open the channel for

floating logs.

In the opinion of members of the house the bill has been prepared in the interests of the state and is intended to give them almost unlimited rights and privileges wherever it is possible for them to grab a small stream and convert it to their own use irrespective of the harm which might be done to the people settled along its banks.

We endorse the Pure Drug Law.

It suits us, because we have always stood before our friends unafraid and clear of conscience, made our contracts good to every one, and in the conduct of our business, had the good fortune to help hundreds of thousands of our fellow-citizens back to health and life.

We have no reason to hesitate, and so we do not hesitate, to recommend Cascarets to all sufferers from Constipation and all complications arising therefrom. Also any other diseases of the food-canal. We are advertised by our loving friends and whenever the American people pass judgment in favor of an article after over ten years of investigation, trial and

test,—their verdict speaks for itself.

The greatest merit of Cascarets however, is that of being a positive and reliable preventive of disease. The most important function of the human body is to keep its digestive channels and passages, with over thirty-six feet of bowels, strictly clean and disinfected, so that natural operations can take place in a natural manner, and the growth and activity of disease germs can be prevented

A Cascaret at night before "turning in" will keep your Bowels regular, and your whole digestive canal wholesome, pure and normally active.
