

HOUSING OF MISS ANTHONY

Convention of Woman Suffragists Quit Business to Honor Late Leader.

MEMORIAL EXERCISES HELD AT GRAVE ALSO

Miss Isabella Beecher Hooker Likewise Eulogized—Words of Praise Said for Miss Mary Anthony Who Conducted Oregon Campaign.

Chicago, Ill., Feb. 15.—There was an almost total suspension of business today at the convention of the National American Woman Suffrage association. By previous arrangement the greater part of the day was given over to exercises in memory of Susan B. Anthony, the great pioneer of the woman suffrage movement in America, who was born 87 years ago today and who passed from life March 13, 1906.

Another earnest worker in the equal suffrage movement, recently passed away, Isabella Beecher Hooker, whose life and work were likewise eulogized by the speakers. Words of praise were also said for Miss Mary Anthony, sister of Susan B. Anthony, who died at the Anthony home in Rochester two weeks ago.

The principal speakers at the memorial exercises were Mrs. May Wright Sewall of Indianapolis, Mary T. L. Gannett of New York, Harriet Taylor Upton of Ohio, and Rev. Jenkin Lloyd Jones.

Rochester, N. Y., Feb. 15.—The grave of Susan B. Anthony in Mount Hope cemetery was covered with many hundreds of wreaths today on the occasion of the birthday anniversary of the great equal suffrage leader. The tributes were sent by friends and admirers in many sections of the country. The grave of Miss Mary Anthony, who died recently and was buried beside her more famous sister, was also decorated with flowers.

NEW CUTOFF FOR SANTA FE IN LONE STAR STATE

Twenty-Four Hours in Time Between San Francisco and Chicago Saved.

Austin, Tex., Feb. 15.—It is now expected that the new cutoff which the Santa Fe railroad is building across a portion of New Mexico to connect its transcontinental line with the Texas Valley division at Texas will be ready for operation before the end of the present month. The completion of this line will afford the Santa Fe a new transcontinental route between a point on its line in Kansas and Albuquerque, New Mexico, and will be used exclusively for its through business to and from California. The southern Kansas division and the Popo Valley line will be used as links in this new route, which will traverse the Panhandle of Texas, instead of by way of La Junta, Colorado, and down through New Mexico, as heretofore.

LONG STEP TOWARD HOME RULE IN IRELAND

Government to Establish Irish Council in Which Elective Element May Be Supreme.

London, Feb. 15.—The government is trying to redress some of its promises among others that made to Ireland. A bill will be introduced in parliament establishing an Irish council and for other purposes, which is considered a long step toward home rule. The bill will provide for a council in which the elective element will predominate. It is understood also that this council will have extensive administrative powers, but its right to legislate will be limited. The secretary for Ireland Birrell said the question of the restoration of evicted tenants to their homes was of primary importance, and brooked no delay. In conclusion, he pledged the government to take effective measures to secure the reinstatement of evicted tenants.

OBTAINS NITRIC ACID FROM THE ATMOSPHERE

London, Feb. 15.—An announcement of a scientific discovery in a number of years has created more public interest than the news that the experiments inaugurated by the distinguished scientist, Sir William Crookes, to obtain nitric acid from the atmosphere had been crowned with success. The discovery means the assurance of daily bread for generations yet unborn. Wheat—the chief source of the staple food of the world—grows in soil where the nitrogen is used up it must be replaced, or the wheat crop fails. Hitherto the soda-nitrate deposits of South America have been the principal source of the replenishing agent. They are, however, not quite adequate for the world's needs, and in another quarter of a century will be completely exhausted. If the nitrogenous fertilizer failed, an increase in the area of wheat-growing lands could save off eventual starvation. But with the discovery of Sir William Crookes that concentrated nitric acid can be made from the nitrogen in the air, a commercial source of the nitrogen of the soda-nitrate deposits becoming exhausted is no longer a cause for alarm.

MAIL REWEIGHING IN PROGRESS

Five Hundred Men at Work on Task Which Will Last for Nearly Four Months.

DECREASE IN RATE IS THREATENED BY CONGRESS

Committee Recommends Five Per Cent Decrease in Pay for Routes Carrying From Five Thousand to Fifty Thousand Pounds Daily.

Chicago, Feb. 15.—The reweighing of the mails, which takes place every four years to determine the amounts to be paid by the government to the railroads, was begun today in the sixth district and a portion of the seventh district. The sixth district comprises all of the territory east of the Missouri river up to a line drawn through Chicago and St. Louis.

Five Hundred at Work. Five hundred men are engaged in the work of reweighing. The task will occupy about 113 days, during which time all of the mails which are put on and all which are taken off of all established routes will be carefully weighed. Out of the reweighing period there will be a total of 86 working days, and the total tonnage of each route for the entire reweighing period will be divided by 86, the working days, in order to determine the average tonnage carried per day.

Upon this tonnage so determined the rate is scaled and when fixed will remain the rate which the railroads shall receive until the mails are reweighed four years hence. The railroad managements are considerably exercised over the probability of a decrease in the rate, owing to the recent recommendation of the congressional committee. The minimum pay is for 200 pounds or less, for which \$42.75 is allowed at present for carrying it one mile every day in the year. The pay is on a descending scale as the average weight increases until for 5,000 pounds or more daily \$21.00 per ton is allowed.

For Decrease in Payments. By the recommendation of the congressional committee there will be a 5 per cent decrease in the pay for routes carrying from 5,000 pounds daily to 48,000 pounds, which would reduce the pay on this kind of a route from \$21.37 to \$21.00. On routes carrying an average of between 48,000 and 90,000 pounds there will be a decrease of 10 per cent.

The proposed reductions in the rate would decrease the revenue on a single railroad route between Chicago and the Missouri river about \$100,000 annually. The total reduction of some of the large railroad systems would amount to several hundred thousand dollars a year. The railroad officials declare that they cannot stand the reduction, and that if the recommendation becomes a law there is bound to be a corresponding reduction in the service.

LEATHER TRUST ACCUSED OF ADULTERATING GOODS

London, Feb. 15.—While the American leather trust, so called, is having its own troubles at home, more trouble is brewing for it on this side of the water. Custom-house officials at various ports have just discovered that the leather exported to this country from America is being adulterated by glucose. Leather is sold by weight, and the American exporters, it is said, have been in the habit of adding to it from 15 to 30 per cent of glucose with the object of increasing the weight. As glucose is a dutiable article, large consignments of glucose-loaded leather have accordingly been held up at various ports, and the importers may have to pay duty. The London leather merchants declare that the question is likely to have a serious effect on the price of leather in the near future. More than half the leather imported into England comes from the United States, and the leather trust is accused by the British merchants of resorting to the "glucose" process in order to increase its already enormous profits.

THE REALM OF FEMININE

BY HELEN HAWTHORNE A Craftswoman.

A new way in which a woman of culture and some artistic talent can utilize her abilities as a means of livelihood is sure to be a welcome suggestion. By the death of her husband, who was a minister, the problem of bread winning was presented resolutely to a woman who had these qualifications but who felt how ineffective they are, usually, to meet the needs of a family.

She could china paint, and she did. She knew enough to make pretty, and cards, and she sold them until all her friends were supplied. When orders for china gave out and the income was small, work as hard as she might, she could not make ends meet. The market was overstocked with just the things she could do.

Finally a friend of hers went to Vienna, and bearing her in mind, looked about for some new way of making money, that she might carry back something that would help the wage-earner in this new step she had taken in life. The most expensive sort of fancy articles she found to be called the antique, embossed, leatherwork, and everybody was paying fabulous prices for it.

"That is the thing," she said. So following up one piece of work she discovered where it was made, and offered to pay to learn how to do hand-tooled and embossed, etc.

When she came back to New York she taught this art to her friend, and since the first orders were given she has had more than she could sell. The work is done on the very best Russian leather, that seems to be the only leather that will take the hand-tooled and act properly under the chemical coloring, through which it must go for coloring.

So far as known she is the only woman on this side of the water who does this antique embossed work, and reproduces samples purchased in Vienna that cannot be improved upon even by the original designers. She completed a few pieces and took them from art store to art store offering them for sale. The smaller stores did not know the process and felt that it would be unsafe to introduce such a new thing. The larger stores recognized the beautiful work, but doubted that it was done in this country.

"I will go to every store in the city but I will find a place for my goods," she said. "The world wants good things, unique things, and is willing to pay—I will keep on until I strike a sale." Finally an order was given from the Brooklyn Arts and Crafts.

This was followed by another order and another every place going out being its own advertising agent to such an extent that she today is unable to satisfy the demand of the public for these pretty things. "Never give up," is her motto. It was her perseverance in placing the work that gave this little woman success. There are many young women today who know how to make things that would sell, but they have no push, no confidence in themselves nor in the work that they do. Having a good article to sell is only half the business. Putting it on the market is quite as important.

Blouse Protectors. For the protection of the dainty blouses and evening gowns there are squares of lightweight muslin or silk of various sizes, which are hemmed all around, with a hole cut in the center, through which is pulled the hook of the waist hanger after the blouse is in place.

Separate Waists. Elaborate separate waists are among the very newest output of the Paris shops. Femininity has been so determined in clinging to the separate waist that the dressmakers have had to give in. So they have abandoned their efforts to make the separate waist a back number and are now engaged in luring their women patrons into untold extravagance in the matter of separate waists. One most beautiful waist just sent out by a Parisian house is made of Irish lace, with an application of English embroidery. The sleeves and chemisette are of soft net, with applications of the embroidery. Over this is a bolero of the Irish lace, which crosses in front at the waist line. There is a heading around this bolero through

KIDNEY TROUBLES

The kidneys are essential organs for keeping the body free from impurities. If they should fail to work death would ensue in very short time. Inflammation or irritation caused by some feminine derangement may spread to some extent to the kidneys and affect them. The cause can be so far removed by using Lydia E. Pinkham's Vegetable Compound that the trouble will disappear.

MISS KATE A. HEARN

Lydia E. Pinkham's Vegetable Compound

It may be the means of saving her life. Read what this medicine did for Kate A. Hearn, 520 West 47th Street, New York, who writes:—Dear Mrs. Pinkham:—I owe a debt of gratitude to Lydia E. Pinkham's Vegetable Compound for it has saved my life. I suffered with kidney trouble, irregularities and painful periods, and my blood was fast turning to water. I used your medicine for some time and it has made me strong again.

Mrs. Pinkham's Invitation to Women. Women suffering from any form of female illness are invited to write Mrs. Pinkham, at Lynn, Mass., for advice. It is free.

two tablespoonfuls of sherry, and one tablespoonful of mushroom ketchup. Let it boil up once, then serve poured over slices of buttered toast. Scotch Soups.—These warm cakes eaten with coffee make a breakfast one will not readily forget. Stir one quart of flour in a deep bowl with a teaspoonful each of salt and soda. Rub in three tablespoonfuls of butter and mix with a pint of sour milk. Toss on a floured leading board and cut off pieces large enough to roll out the size of a dinner plate. Do not knead the dough or touch it any more than is absolutely necessary. Roll until about one inch thick, then cut each round into four. Bake on a hot griddle slightly greased. Turn and bake on the other side. They will rise until thick and puffy. Be certain they are cooked through. Eat warm with butter.

Metzger fits your eyes for \$1.00. 111 Fifth street, near Washington.

JEWELS STOLEN FROM QUEEN OF GREECE

Vienna, Feb. 15.—A despatch from Athens says a great sensation has been created in that city by the robbery of \$30,000 in jewels belonging to Queen Olga of Greece. A maid servant has been arrested, and has confessed that on various occasions she took precious stones and valuable medals. These she gave to a German goldsmith who was her sweetheart, and he replaced them by counterfeits to delay the discovery of the thefts. All efforts to find the goldsmith have so far been fruitless, and it is believed by the authorities that he has made good his escape to America.

Scotch Cookery

Cockle-Leekie.—Choose a large, meaty fowl and prepare it as if it were to be roasted. It may be cooked with or without dressing, as to be used in the Scotch flavor, oatmeal enriched with butter and well seasoned with pepper and salt and chopped onion is the regulation mixture.

Hot Pot.—Take four quarts of boiling water, drop the stuffed, dressed fowl, simmer gently for four hours. When the fowl goes into the pot, add five leeks, cut into inch lengths. Half an hour later add four more leeks cut up, also pepper and salt to taste.

Sometimes when the fowl is not stuffed it is cut up and small pieces are put in the tureen with the soup. A knife and fork are laid by the spoon at each plate, and when the soup is served the meat is eaten afterward on the same plate. The fowl may be served as a second course.

Hotch Potch.—This is another famous Scotch soup. Put three pounds of meaty shin of beef in four quarts of cold water. Allow it to come to a boil and simmer for a few minutes, then skim it carefully. Cut in dice two onions, two carrots, two parsnips, two turnips, one head of celery, and when the meat has cooked for two hours add this to the contents of the pot, with four sprigs of parsley chopped fine, half a cupful of shredded cabbage, and half a cupful of barley which has been washed over night.

With the vegetables add seasoning of pepper and salt to taste. In two hours put in one cupful of green peas or one can of peas. Half an hour later the soup pot should be taken from the fire; bind slightly with two tablespoonfuls of flour and two tablespoonfuls of butter rubbed to a paste. After serving the soup follow it with the meat and boiled potatoes as a second course.

Scotch Collops.—Take one pound of veal, cut it in pieces about two inches square, flour the meat, and fry it in butter to a light brown. Dredge again with flour, pour half a cupful of cold water over the meat, set it to cook, and as soon as it boils add one chopped onion and a blade of mac. Let it simmer for a bolero of the Irish lace, which crosses in front at the waist line. There is a heading around this bolero through

Let Us Be Frank Today

We Are Closing Out Our Stock of Winter Suits, Overcoats and Heavy Underwear

So that we may give proper display to our Spring and Summer Goods due to arrive within a few days. Winter is now past, and we hope not to be compelled to carry any Winter garments over till next year.

We Are Actually Selling Most Excellent \$12.50 and \$15.00 Suits at

\$8.85

THESE ARE REALLY UP-TO-DATE APPAREL—SPLENDID MATERIAL AND FINELY TAILORED

You wouldn't get a better fit if you paid \$40 for the clothes.

"We Never Advertise a Lie."

The Red Front SELLS IT CHEAPER

Northwest Cor. First and Taylor

THE OUTLET CLOTHING CO.

Exceptional Union-Made Clothing

WHAT IT IS—WHERE TO BUY IT—WHAT IT SELLS FOR—HOW TO TEST IT

You see a lot of ordinary Suits of Clothing, don't you? Once in a while you come across something a little different from the ordinary, somehow; a Suit that seems to fit better—so correctly, indeed, that it gives to the wearer a sort of distinctive, dignified appearance—the bearing of a gentleman—and a man of thought and

solidity of character. We have much satisfaction in saying that we are noted for selling this class of garments—the distinctive, tailor-made appearance in those suits you see belong to that class of apparel specially designed for THE OUTLET CLOTHING COMPANY.

When You Are in Need of the Best That's Made in Men's Apparel

Come immediately to our store, where \$10 Suits of clothes are sold for \$10 because they are worth \$10. \$15 Suits of clothes are sold for \$15 because they are worth \$15. \$20, \$22.50 and \$25 Suits are sold at these prices because worth that sum.

Our Clothing is All Marked at Legitimate Profits, and No More

Our prices range from \$10 to \$25, for the reason that careful buying enables us to sell singularly superior apparel at these figures—figuring closely on the cost of cloth and trimmings, tailor's wages, etc. Therefore, when in need of a suit of clothes, COME TO US AND BUY FROM OUR SALESMEN AT THE SAME CLOSE FIGURES THAT WE SECURE THE GARMENTS FOR FROM THE MANUFACTURERS.

We Earnestly Request That You Examine Our Clothing Closely

Test it in every possible way. Feel the cloth and scrutinize the needlework, and observe that there is quality and perfection in every piece and stitch and thread. YOU CAN SEE IT! YOU CAN FEEL IT!

WE LIKE TO SHOW OUR CLOTHES, BECAUSE IF YOU BUY A SUIT YOU WILL LIKE TO SHOW THEM, TOO

As we have repeatedly said, WE WANT TO SHOW YOU THAT CONFIDENCE IS THE BACKBONE OF ALL SUCCESSFUL BUSINESS ENTERPRISES, and how can we win your confidence unless we show you that our merchandise is exactly what we represent it to be, and honesty our method of winning your patronage.

We know we can supply your wants, and we ask you to visit the best lighted store in Portland, where you will be attentively taken care of.

Danderine Grew This Hair AND WE CAN PROVE IT.

Little Frances Marie Knowlton is the daughter of Dr. W. Knowlton, the discoverer of this great hair-growing remedy, and her beautiful hair was grown wholly by the use of this great tonic. This little girl had no more hair than the average child before using Danderine, and now she has the longest and most beautiful head of golden hair ever possessed by a child of her age in the world. Danderine makes the scalp healthy and fertile and keeps it so. It is the greatest scalp fertilizer and therefore the greatest hair-growing remedy ever discovered. It is a natural food and a wholesome medicine for both the hair and scalp. Even a zinc bottle of it will put more genuine life in your hair than a gallon of any other hair tonic ever made.

NOW at all drugists, in three sizes, 25 cents, 50 cents and \$1.00 per bottle. FREE. To show how quickly Danderine acts, we will send a large sample free by return mail to any one who sends this advertisement to the Knowlton Danderine Co., Chicago, with name and address and 10 cents in silver or stamps to pay postage.
