FIRE DESTROYS EVIDENCE AGAINST STEEL TRUST

Material Sinclair Intended to Use in Next Novel Burned With Helicon Hall.

(Journal Special Service.) New York, March 18.—Affidavits relating to the operations of the steel trust, which Upton Sinclair had in his desk at Helicon hall and of which he intended to make use in his next novel, were lost in the fire which destroyed that institution at Englewood Saturday.

The suggestion has been advanced that an agent of the steel trust caused the disaster in order to wipe out the affidavits, but Sinclair says there is no reason for thinking so, and he sticks to the theory that the fire was accidental.

Sinclair, in dressing gown and pajamas, rested today in this city at the home of Gaylord Wilshire, a wealthy Socialist, Helicon hall and its equipment were insured for \$40,000 and on account of certain rumors in this connection the public prosecutor of Bergen county, New Jersey, has directed that a searching examination be made as to the facts.

FOURTEEN-INCH GUNS FOR COAST DEFENSE

(Journal Special Service.) Washington, March 18.—General Crozier, chief of ordnance, U. S. A., has ordered that the plans for a great new 14-inch gun for the coast defense.

The 14-inch gun will be something of a paradox in ordnance design, for, although full two inches larger in caliber than the standard coast defense gun of the first grade, the gun will be smaller in every other measurement and even lighter. The purpose is to make a weapon that will have a range and striking force at least equal to the present standard 12-inch gun, but that shall vastly exceed the very limited life of that gun.
