

EARTH SWUNG AS IF IN A HAMMOCK

Famous War Correspondent Who Was in Mexican Quake Describes Sensation.

NO ONE WAS INJURED IN CITY OF MEXICO

Peculiar Formation of Ground Only Thing That Saved Capital From Destruction—Similar Shock Would Raise New York City.

By Major Ben C. Truman, famous as war correspondent and secretary to President Andrew Johnston. Major Truman has been touring Mexico for the past five weeks.

(Journal Special Service.) El Paso, Tex., April 22.—"I have just arrived here from the City of Mexico, and from all accounts from cities near the Pacific coast for 100 miles down from Manzanillo alarming destruction of life and property was wrought by the earthquake. I was in the city of Mexico during the disturbance, and as far as the capital and vicinity is concerned, no one was injured and only trivial damage was done.

"One old high unsupported government wall was thrown down; some plastering fell in the cathedral, the Jockey club and other buildings, but no walls were cracked. No structures of consequence sustained damage of any moment.

"The same is true of every city within a radius of 100 miles of the capital. No person was injured and practically no destruction wrought to property. Railways were unharmed and trains from Vera Cruz, Guadalajara, Aguascalientes, Orizaba and Puebla arrived and left on time the following morning and since then.

"Contrary to what might have been expected, the quake had seemingly no effect on the volcanoes in that region. No smoke whatever could be seen arising from Orizaba, Popocatepetl, or other nearby extinct craters.

"The tremor, however, was remarkable in point of duration and nature, lasting, according to all instruments and accounts, about four minutes.

"The movement was horizontal, but owing to its length, the inhabitants were thrown into a high state of alarm, running from their homes into the streets and falling on their knees in prayer.

"The movement was peculiar for an earthquake disturbance, a dizzy swinging back and forth. You felt as if you were being swung in a hammock rather than in a tree top, as in usual quakes.

"Water splashed over from the tanks in Padios and other big vessels. Beds, chairs, and all things movable in homes were sent to and fro about the rooms, but there was little or no rattling, the movement being so gentle. All clocks were stopped.

"The reasons assigned for the slight destruction is the foundation on which the City of Mexico is built, a sort of cushion formation. All the ground moved, not like a rock, but like a pillow.

"Had the quake built a rock like Manhattan island, it would have been utterly destroyed and many of the inhabitants would have perished.

MARION'S TEACHERS MEET AT WOODBURN

(Special Dispatch to The Journal.) Woodburn, Or., April 22.—The Marion county teachers' institute, held in this city Saturday, was very successful. Over 50 teachers were in attendance and a number of eminent instructors. At noon the visitors were entertained at an elaborate dinner served in Odd Fellows' hall. The program at the institute was as follows:

"Recent School Legislation"—State Superintendent J. H. Ackerman.
"Composition in the High School"—E. T. Mariotte.
"To What Extent Is the Teacher Responsible for a Good School?"—Director J. M. Poorman.
Program by pupils of the Woodburn schools.
"Domestic Science and Its Possibilities"—Mrs. Clara H. Waldo.
"The Economic Side of the Teacher's Profession"—M. F. Hanville.
"How May the Community Help the School?"—State Superintendent J. H. Ackerman.

The next meeting of the association will be at Stayton on May 4.

SUCCESS OF LEXINGTON CREAMERY ASSURED

(Special Dispatch to The Journal.) Lexington, Or., April 22.—The Lexington creamery commenced operations last Monday and turned out 120 pounds of first-class butter last week. It had been supposed that the cows of this locality were not up to the standard for dairy herds, yet the tests show they run from 5.5 to 5.8 per cent of butter fat. The creamery is receiving good patronage and will be a success. E. D. Brown purchased the first pound of butter printed, paying \$1.50 for it.

A number of farmers of this locality are purchasing grain sacks through the Inland Wheat Growers' association.

Metager hits your eyes for \$1.00. 111 Sixth street, near Washington.

Teamster Case to Be Appealed.

(Special Dispatch to The Journal.) Aberdeen, Wash., April 22.—The test case of G. L. Nelson, charged with violating a city ordinance relative to the place where the teamsters of the city should stand their teams when not at work, resulted in the defendant being fined the minimum, \$5. The justice held that the city council has the right to regulate this matter. The case will be appealed.

TO INVESTIGATE IMMIGRATION

Newly Appointed Commission Decides to Tour Europe to Study the Problem.

ALARMING INCREASE STIRS THEM TO ACTION

This Year's Influx of Foreigners Will Be Double That of Last Year—Twelve Thousand Arrive in Two Days.

(Journal Special Service.) Washington, April 22.—Aroused by the appalling increase in the immigration of this country from all parts of Europe and Asia, the national immigration commission, recently appointed under a law passed by congress, has decided to tour Europe as soon as possible in order to study better the situation and perfect restrictive laws. This tour, because of its unprecedented nature and the personality of the commission, will assume great importance.

One of the incentives which have stirred the commission to instant action, is the news made public today that about 30 ships bound for America are en route from Germany, Italy, the United Kingdom and half a dozen other countries, numbering 40,000 men, women and children.

Two days in March alone brought 12,000 foreigners to Ellis Island. Just one week later 16,000 reached port. Since then the tide has been steadily rising, until Ellis Island each month receives 30,000. Moreover, the Russian director of immigration estimates that 300,000 peasants will come here from that country during the year.

These figures by the year's end will nearly double the total immigration of 1906, which was 1,100,735, and the influx threatened is so colossal that the national commission was literally forced into action.

The nine members of the commission, all of whom probably will go abroad early in the summer to study conditions there are: Senators Dillingham of Vermont, Lodge of Massachusetts and Latham of South Carolina; Representatives Newell of New Jersey, Bennett of New York and Burnett of Alabama, and Commissioner of Labor Neill, Professor J. W. Jenks of Cornell and William R. Wheeler of Oakland, California.

PROSPERITY SUN NEVER BRIGHTER

All Over Oregon the Rancher Rejoices in Prospects Not to Be Improved.

FINE WEATHER MENDING ANY DAMAGE OF WINTER

Winter Conditions Ideal for Fruit in Holding It Back From All Frost Danger—Better Methods of Raising and Marketing.

(Special Dispatch to The Journal.) Albany, Or., April 22.—Crop conditions as a whole are very promising. Winter oats and wheat have suffered somewhat on account of the severe weather of the past few months, but it is thought that plenty of sunshine and clear weather will remedy this and make the crop a good one.

There is activity along all lines of horticultural and agricultural work and preparations are being made to reap the harvest in the months to come. The work of the farmer has progressed to a point where practically the entire spring crop has been sown and most of the early gardening attended to.

Horticulturists in Linn county are especially jubilant over the prospect of large yields of fruit and feel that the season is going to be a record breaker along all lines. The cold weather had no ill results on the early blossoming trees and was an advantage in that it held back the growth of the trees to the point where the fruit is the most valuable to the grower in this season. All danger of a blighting frost has passed and the season is too far advanced to admit of any damage to the fruit crop.

Spraying and proper handling of the orchards has been done and the orchards are free from scale and other destroying vermin. Whole orchards have been cut down and sacrificed on account of their infection with dangerous and destroying parasites. Such activity as this has made clean orchards and improved the quality of the fruit materially.

LOGANBERRY COMBINATION

Growers of Valley Perfect Organization in Order to Regulate Prices.

(Special Dispatch to The Journal.) Salem, Or., April 22.—The loganberry growers of Brooks, Clear Lake and Lake Lahesh have formed an association to promote their interests and to work in concert for the selling of their berries at the best possible price with the least loss to themselves. A. M. LaFollette has been chosen president and M. Aspinwall secretary. It will be the aim of the society to keep a close watch on the markets in the eastern and other cities and to regulate the consignments in such a way as to prevent an oversupply. The market in each town will be watched as to the number of crates likely to be sold each day.

Last year by means of the refrigerator cars the Oregon loganberries from these neighborhoods were shipped to New York and found a ready market. Many crates were shipped to Denver without the aid of refrigerator cars. Another advantage of the association will be that the growers will be able to secure their crates at much lower prices.

PLANTING FRUIT TREES

Many Hundreds of Acres Being Set Out This Season Near La Grande.

(Special Dispatch to The Journal.) La Grande, Or., April 22.—A tract of 220 acres has been planted to fruit trees by the Thompson fruit colony on the north side of Booth lane, five miles northeast of La Grande. The west 80 acres is divided into two equal tracts, one of which is owned by Dr. F. E. Moore and the other by E. W. Oliver. The remaining 140 acres have been divided into 10-acre tracts, nearly all of which have been sold.

WARM WEATHER NEEDED

Farmers of Wasco Complain That Grain Is Rotting in Ground.

(Special Dispatch to The Journal.) The Dalles, Or., April 22.—The cool weather of March and April has been favorable to fruit. There can be no danger of late frosts killing the young fruit as it has in some past seasons. Every indication points to a phenomenal crop of all kinds of fruit this year, but the grain grower is not equally hopeful. While the fruit has been kept back until period of safety has been reached, the farmer complains that the wheat he planted has begun rotting in the ground and without warm weather soon he is fearful the harvest will be nearly as light as it was last year.

UMATILLA LOOKS GOOD

Prospects for Good Crop of Wheat—More Moisture Than Usual Helps.

(Special Dispatch to The Journal.) Pendleton, Or., April 22.—Prospects at this time are for an immense wheat crop. In fact, from every section of Umatilla county comes the word that the grain is doing finely. This is especially true of the Adams, Athens, Helix, Weston and Echo country. The precipitation has been greater during the winter and spring than usual, and it is largely owing to this fact that the wheat outlook is so prosperous. Some who are in a position to know also state that they believe prices will be higher this fall than usual, some predicting 75 cents a bushel.

BUSINESS OF WASHINGTON STATE LAND OFFICE

(Special Dispatch to The Journal.) Olympia, Wash., April 22.—A report of the business transacted by the state land office shows an enormous increase during the past 12 months over the preceding year, the business being practically doubled during the latter period. From March 1, 1905, to March 1, 1906, there were 425 contracts issued, 125 deeds and 45 timber land sales. From March 1, 1906, to March 1, 1907, there were 856 contracts, 275 deeds issued and 120 timber land sales.

Hatch Sale for Eleven Thousand.

(Special Dispatch to The Journal.) Coos, Or., April 22.—Marshall F. Dean of the lower Coos section, has sold his farm of 240 acres to J. J. Becker, a neighbor, for \$11,000.

The Chancellor won his first success over thirty years ago and has since maintained its popularity against all competition. Surely its superiority is thus unquestionably established.

CHANCELLOR Cigar "Oldest and Best"

is one of the best made and most widely popular high-grade cigars offered the public. The "Triangle A" merit mark stamped on the box is an additional guarantee of its superior value.

AMERICAN CIGAR COMPANY Manufacturer

SORRY SLUSH FUND WAS NOT PUT IN HIS BANKS

Shaw Says He Never Saw a Penny of Conspiracy Fund—Visits President.

(Journal Special Service.) Washington, April 22.—Former Secretary of the Treasury Shaw, now head of a New York trust company, came to Washington today and called at the White House. He discussed with the president the political and financial situation, but nothing sensational developed.

When asked whether his banking concerns had received any deposits from the holders of the \$5,000,000 "conspiracy fund," the former secretary said he was sorry he had not, nor had he seen a single penny of it. Mr. Shaw would not talk about the next presidential campaign but would not deny he was still a candidate and made the point plain that he is still a citizen of Iowa in case the political bolt of lightning should find that a convenient place to strike.

Rent a Good Piano.

GIMBEL DIES OF SUICIDE WOUNDS

Philadelphia Millionaire Who Cut His Throat Dies at New York Hospital.

ATTEMPT AT SUICIDE FOLLOWED HIS ARREST

Wife and Family Stay at His Bedside—Family Physician Declares Downfall Was Result of Insanity Caused by Overwork.

(Journal Special Service.) New York, April 22.—(Bulletin)—Benedict Gimbel, who tried to commit suicide after his arrest upon the complaint of a young boy, died today. His family was at the bedside and attributed his downfall to insanity from overwork.

New York, April 22.—Benedict Gimbel, the millionaire Philadelphia merchant who attempted to kill himself on Friday afternoon after being arrested on a grave charge, coupled with a charge of bribery, will probably die. Early today he seemed to be recovering, but a relapse occurred later in the day and is expected to result fatally.

Gimbel is now in St. Mary's hospital, Hoboken, with three silver tubes in his gashed throat, his mangled wrists bandaged and bound fast to his sides, and his eyes covered.

Mrs. Gimbel, a pretty woman of 35, her two sisters, Dr. Jurist, the physician from Philadelphia, and two of his brothers, Isaac Gimbel of Philadelphia and Charles Gimbel of Milwaukee, are constantly by his side. He cannot speak or move. Dr. Jurist made this statement:

"Ben Gimbel is insane. His mind has undoubtedly been deranged for a year. I have known for fully that long that something was wrong with his brain. Three weeks ago he rushed into my office late at night, dressed in evening clothes, and in a state of great excitement. He begged me to bring a case of instruments and come with him.

"Supposing that there had been an accident of some sort, I picked up my emergency kit and went with him. He shoved me into an auto and drove at dizzy speed to a cottage in a suburb some distance away, where I found a young woman suffering from kidney trouble, but in no need of an operation.

"Then I learned that Gimbel, on returning from dinner, had heard some of his servants speaking of the case of a friend of theirs, a girl who was ill at home, without funds to secure the proper medical attention. He at once jumped into his auto and dashed off to find me.

"The six brothers of Mr. Gimbel will stand by him. They would stand by him if he had committed 20 murders. His wife will be true to the end."

The police say that Gimbel will be treated with "Jersey justice"—that is, he will be accorded the same treatment

The Store That Makes the Dollar Stretch

Your dollar not only has a greater purchasing power at LEFFERT'S than at other jewelry stores, but you are given the privilege of seeing a much greater variety of perfectly selected lines as well.

We have completed our purchases of rich new Spring Jewelry, including all of the latest things in fine NECKLACES, BRACELETS, COMBS, HAIR BARRETTES, BELT BUCKLES, HATPINS, etc., and give you the assurance that the styles are correct.

Our Scarfpin line is a stunner. The prices are extremely moderate.

Howard Watches, in solid gold \$125 cases. Howard Watches in 25-year \$37.50 filled cases.

Or we can sell you a good Elgin or Waltham for \$16.50. Either will keep you accurate time; simply a difference in the finish and workmanship. We guarantee our watches.

Diamonds That Shine

Never before have we made such extensive attempts to display such a beautiful and costly array of Diamonds as we are doing now. We are selling more diamonds in rings, studs and brooches than ever in our business history, and selling to you on a continuous rising market. We absolutely guarantee their perfection as to color and cutting. We guarantee our price lower than is possible for competition. Your money is invested well when you buy a diamond.

Our repair department is unsurpassed for its efficiency in doing only first-class work.

LEFFERT'S JEWELERS AND DIAMOND MERCHANTS

272 WASHINGTON STREET

as any other man, even a pauper, who attempts suicide and is arrested. It is believed from Dr. Jurist's remarks that the plea of insanity will be made to Recorder Staten. In that event it is said Dr. Converse, the county physician, will be called in, and if he is found mentally unbalanced Gimbel will be sent to an asylum.

Skating Rink at Newport Planned.

Salem, Or., April 22.—The managers of the Salem skating rink, Harry E. Albert and H. George Meyer, have completed plans for a rink 75x145 feet at Newport. A gasoline plant will furnish the illumination. The rink is to be fitted up in modern style.

A TYPEWRITER THAT IS MERELY A LETTER WRITER DOES BUT 1/2 THE WORK THAT A TYPEWRITER SHOULD DO

The Smith Premier Typewriter

with its new three-color device will produce with one ribbon:

Typewriting that will copy for correspondence;
Typewriting that will not fade or smudge, for documents to be kept as records;
Red typewriting for emphasis or display.

The change from one ink to another is made by simply moving a small lever. Costs no more than other models.
