

Select Your Suit, Skirt and Waist From the Largest and Most Complete Stock on the Coast

FIRST FRIDAY EXTRA SPECIAL AT THE HOUSE OF VALUES

\$50,000

WORTH OF BELATED SPRING MERCHANDISE THAT MUST BE TURNED INTO MONEY AT ONCE. Within the past six weeks we have received many thousand dollars' worth of spring goods. Not having room in the old store to unpack them they are now on our hands. Under ordinary circumstances every scrap of this belated stock would be now have been turned into

\$50,000

money, and in order to make up for lost time we shall offer extraordinary sacrifices of values, including in our new department such as gloves, hosiery, handkerchiefs, neckwear, underwear and corsets. Considering the low prices at which goods will be sold, all sales must be final—no telephone or mail orders will be accepted—no goods will be sent on approval.

"TRY ACHESON'S FIRST"

WATER SUPPLY IS INCREASED

Lents Buys Mount Scott Works and Lays New Mains From Larger Tank.

The Lents Water company has purchased the Mount Scott water works, and the Lents water system is being renovated and put into the best of condition. The rapid development of the suburb is demanding increased water facilities, and Manager L. F. Coffman of the Lents Water company is preparing to meet all the requirements of the community.

Tubers arrived yesterday for a new 25,000-gallon tank, and the work of construction is already under way. The tower will be 75 feet high, about 20 feet higher than the old one, and the new tank will have twice the capacity of the old one. A great number of new high pressure pipes are being laid by the water company in order to supply the district satisfactorily.

APRIL WEATHER MET EVERY REQUIREMENT

Sixteen Days Clear, Just Enough Rain, Temperature Gentle as a Kitten.

The meteorological summary just issued by the weather bureau for the month of April brings to light the fact that April was a very ordinary month so far as weather conditions go, and behaved much as had the 36 Aprils that have gone before, since the establishment of the bureau in Portland in 1870.

The mean temperature for April was 52.2, while the average mean temperature for April for the past 36 years was 51.6. The warmest day was the 31st, when the mercury climbed up to 75°. Only one day, the 10th, did the temperature get as low as 36°, and not twice during the month did it go below 40°. The total precipitation was 2.57 inches slightly above the average of past Aprils, which was 2.12 inches.

The only unusual fact brought out in the report is that there were 16 clear days during the month, which is considerably above the average.

TRACK PERMIT GRANTED TO RELIEVE CONGESTION

Owing to the congestion of freight in the railroad yards, the council has granted the Northern Pacific Terminal company the right to build a temporary track on Tenth street south to Lovejoy. Manager Lyons told the council that with the present trackage facilities freight is often delayed for weeks. One hundred cars are now in the O. R. & N. yards, and there are several hundred more in the yards of the terminal company.

Alyan Has New Recorder. Albany, Or., May 2.—At an adjourned session of the city council held last evening P. M. Reafield was elected to the position of city recorder to fill the vacancy caused by the resignation of W. Lair Thompson who goes to Lakewood to practice law.

Special showings to-day and tomorrow.

A Chance for Cooperation

I wonder why the business women of Portland cannot have a club—now wait a club which should have for its especial function the serving of a lunch at the noon hour to business women and perhaps establish a rest room which should be supplied with the late magazines and other chancery.

I know that the Y. W. C. A. meets the needs of a few. It has a cheery reading room and a tasteful lunch is served in the dining room, but it can be patronized by only a few of the many. Most of the business women of the city cannot wait for a seat.

Every eating house down town where a woman can get a cheap and a sufficiently nourishing meal is crowded at the noon hour. The Woman's Exchange, Hazelwood, Royal bakery, Swetland's, Gordon's and the rest are overfull every day in the week from 12 or before until 1:30. It would seem that the business must be profitable or it would not flourish.

I am not informed as to the kind of a meal furnished every day to the members of the commercial club, but most women do not care for a heavy dinner at the noon hour.

A favorite luncheon of the business girl is a pot of tea and three hot biscuits.

BRONCHIAL COUGHS

Breathe Hyome's Healing Air and All Irritation Will Be Quickly Cured.

The most irritating and annoying form of cough is that termed bronchial. Persons subject to bronchial troubles whenever there is a change in the weather or they are exposed to a draft will "catch" a bronchial cough, which is very disagreeable, irritating and annoying.

Bronchial troubles cannot be cured by a drink of water. The specific of Hyome's is the only treatment that reaches the affected parts and gives relief and cure. It destroys all the disease germs that are present in the nose, throat and lungs, soothes and relieves the irritated mucous membrane in all parts of the bronchial tubes and quickly overcomes the irritation.

Bronchitis is really an inflammation of the mucous membrane lining the air passages and is nearly a local disease, so that it needs a local treatment like that afforded by Hyome's.

We do not want anyone's money unless Hyome's gives relief and cure and we absolutely agree that money will be refunded unless the remedy gives satisfaction.

All druggists should be able to supply you with Hyome's or we will send it by mail on receipt of price, \$1.00, and every package is sold with the distinct understanding that it costs nothing unless it cures. Booth's Hyome's Company, Buffalo, N. Y.

cuits, and if one is feeling particularly prosperous, a piece of pie. This at most times costs 15 cents. Another lunch which is frequently ordered is eggs and coffee, which costs 10 cents. Again a good and sufficient meal consists of a bowl of soup with crackers, a glass of milk and a chocolate eclair. This costs 15 cents, and it meets the general desire of the business woman better than a heavy meal.

The work of the arts and crafts societies is not such an attempt. The supporters of the movement do, it is true, try to bring back past conditions in this regard. They work toward the revival of that kind of doing which is a joy and a satisfaction. To take a very simple instance which every woman will appreciate, consider the difference between feeding a machine with material and working out a fine piece of embroidery. The first is a task, the second a deep and joyous pleasure.

Watching cloth woven by a machine and watching the work of her own hands into a thing of beauty under the guidance of one's own artistic sense are two widely different occupations.

The main tenet of the arts and crafts movement is that objects of daily use—the bowls, baskets, fire-irons, sugar tongs, portieres—whatever articles are necessary to our comfort and happiness in daily life are capable in some small degree of being the vehicle of artistic expression and thus of being works of art.

If they are to be so, it is plain that they must be the work of men and women who are themselves correctly guided in artistic expression and that they must be the work of the hand, wrought out, as are the works of the painter or the sculptor.

Where machine work is better or as good as hand work is should be employed; but articles so made should be entirely plain, unadorned and simple. A machine is incapable of artistic feeling, say the people of this movement, and elaboration and decoration are justified only when the article in question responds to the artist's touch. People are coming more and more to appreciate the beauty of objects made by hand which are thus capable of showing individual feeling in their execution; and such products, largely through the influence of the Arts and Crafts society, and whole-souled genuine workers in all parts of the civilized world are more and more sought after and valued, rather than the dull and uninteresting products of the machine.

For Fruit Whips.

An ingenious young housekeeper prepares on various fruit pulps with white or orange skins either for nasty light spring desserts. Apple sauce sweetened to taste is the foundation of two of the most delicious ones. If the applesauce is watery nearly all the juice is strained off and the pulp is put through a fruit press. Then it is whipped with a revolving egg-beater into the stiffly beaten whites of the eggs, a tablespoonful of the apple being incorporated at a time. For a pint bowlful of pulp the whites of two eggs are used.

To vary this apple whip, two bananas freed from their skins and the stringy portions scraped off are run through the press and added to the apple, the blend is very delicious. A light sprinkling of cocoanut and cinnamon given the top of the dish. No definite proportion of fruit and egg is required. This is one of the advantages of this class of desserts. The whip should be placed on the ice or in a cold place as soon as it is prepared and be served very cold.

For prune whip, stone a bowelful of prunes and put them through a fruit press, sweeten to taste and mix it with the whites of a couple of eggs.

These whips are sometimes made

with whipped cream. For a tasty dish mix a cupful of banana pulp that has gone through the fruit press with a cupful of cream whipped stiff and sweetened with four tablespoonsful of powdered sugar.

When cream is used powdered sugar is best because the mixture will be more watery but granulated sugar does equally well with whites of eggs. Half cream and half whites of eggs may be used.
