

The REALM FEMININE

Fashion Paragraphs From New York

In this season's fashions, the prevalence of the Japanese sleeve is the most notable feature. In one type or another it will be found in gowns and coats of widely varying character. This fashion naturally follows the long shoulder effect that is found successful in the dainty costumes intended for early summer wear, as well as in tailored gowns.

This new oversleeve, which is usually made in one piece with the oversleeve, is allowed different treatment in the trim for original effect. In band form, or draped, its prominent position affords ample opportunity for trimming. Voiles, chiffons, foulards and organzies with wide borders, give the best effect to the Japanese sleeve and are used to a liberal extent. The undersleeves and gumpes, which complete this gown, are of lace or some sheer material, inserted with medallions of lace of fine embroidery. The transparent sleeve and semi-transparent sleeve will be used throughout the spring and summer.

Many of the dressy coat suits are accompanied by a waist which serves to complete the costume when the days grow too warm for a coat. The oversleeves with the Japanese sleeves are almost invariably the style chosen. Original lines by slashings made to show the gumpes give it a pretty effect. The waist is made either of the same material as the suit or of silk or crepe de chine matching its color. The undersleeves and gumpes are of lace or net of corresponding color, and laced with narrow bands of elvet ribbon. The gumpes may be shirred front and back and finished at the neck by a standing collar, and the short puff sleeves terminate in fancy cuffs with tab ends meeting at the top and trimmed with buttons.

Lace is used extensively in decorating nearly all the newest costumes, and on some models the bodice is made almost entirely of white, cream or ecru lace, with straps or embroidered bands of the material to give the color.

There is a great deal of embroidery used this spring, and many of the finest voiles are worked with silk. Many skirts have embroidery as their only trimming. The soft materials are tucked or laid in folds, while the cloth skirts are plain and fit closely. Voile is unquestionably the most popular material for reception gowns and

afternoon dresses this season. There are coarse voiles very nearly as heavy as satins, and there are also qualities which are almost as fine as chiffon. The plain and fancy, striped and figured, dark shades and light are all to be found in the voiles of this season. It is a pity that the most severe tailored costume, and also in the daintiest robe suitable for weddings and luncheons. It certainly is better to have a suit of voiles than anything else, as it is the most fashionable material, and gives a satisfactory amount of wear. Striped voiles are perhaps the most in favor, but checks and figures are also much worn. There are often two shades of one color in the striped voiles, but the most popular is a narrow stripe of a decided tone in combination with white. The majority of veillings are made up over white, so that the character of the gown must be brought out in the trimmings which are decided and striking in coloring. A white and pink striped voile might be trimmed with a deep rose velvet or silk. If the veiling is a deep carnation, a touch of pale blue in the trimming is extremely smart. Brown is frequently used to bring out the color of a pale blue pink or mauve.

The very latest in a tailored suit is the cutaway coat. The style is suitable to be made of light-weight cloth, plain, checked or hair-striped, for pajah in plain or novelty weave, in Panama or voile. The closely fitted coat is fastened with three large buttons a little to the left side. The neck is completed by a mannish notched collar. Coat sleeves with cuffs or stitching at cuff depth are provided, and the top may be gathered or plaited. The skirt in this costume, is of nine gored, each being laid in two overlapping plaits, while the seam is hidden by tuck-stitching.

Separate jackets have the same graceful curves as the cutaway coat, and being worn short are decidedly "chic." They emphasize the slender waist and this effect is increased by the side front and side back seams. These seams are covered with shaped bands which take the curve of the side sections in the front, rounding to the bottom of the coat. A smart addition may be had by having a vest section which buttons high above the lower edge of the notched collar. The cuffs may be close-fitting, turn-back or suggested by stitching at cuff-depth.

Twilight Chat.

The influence of every life is twofold. Every one of us leaves an impression upon life as a whole, though it may be that we consider our part in the whole scheme of things a very insignificant one. When a man of a certain man dies we look at the deeds that they have knowingly accomplished. We say, he built so many buildings, wrote so many books, built up such and such a railroad; she managed the affairs of the missionary society, or taught school so many years, or gave so much to hospitals; these are the conscious acts of the life and their sum total is a mighty factor in the world's progress.

Every life, however, has its unconscious influence as well. The things which have been done by instinct are not all—there are not even the largest part of the life's influence. While he was building the railroad he was also living, and every day he exerted an influence upon those with whom he came in contact. An influence for good or evil, for purity and righteousness, or for selfishness and narrow selfishness. While she was contributing to the hospital fund she was also a good neighbor, friendly and helpful, a good mother, wise and unselfish, or she demanded much and gave little, shut herself away from those who were not of her "set," and repeated unkind things about others; shedding an influence of blight and unwholesomeness which will remain after her other deeds, her conscious deeds, are forgotten. The creed of unselfishness and mutual helpfulness is as old as the eternal hills, but as new as each morning's sunshine. It is a creed to live by and to die by. Let us not be afraid to be kind.

New Blouses.

Never was there greater variety in the convenient separate blouse and surgily there was never greater charm. Elaborate lingere blouses are more dainty and beautiful than those of last season if possible.

The hand embroidery used lavishly upon them is chiefly of the very fine and delicate kind associated with dainty baby garments and the whole tendency among the fine waists of the lingere class seems to be toward delicate effects rather than toward bold and striking design.

Valencienne lace is still the prime favorite for combination with the hand embroidery, but real Cluny in very narrow insertion is exceedingly popular for use even upon the sheerest batiste and handkerchief linen.

Some of the most charming models among the simpler blouses make use of lace at all, save perhaps a narrow

Marvelous Invention Cures Weak Men

Patent Granted By the U. S. Government

A new and scientific appliance invented by L. B. Hawley, M. D., will produce full manly power at first application. The effects are immediate and starting to a high degree. Develops strength and cures lost vigor. Positively no failures. Physicians endorse and use it in their practice. If you are the least skeptical as to the value of this remarkable treatment, send for illustrated circulars, take them to your family physician and get his opinion. This is the first time anyone has requested you to take his circulars to your family physician—why? Simply because he knows your physician will not recommend his treatment—not so with this appliance. Your doctor will immediately grasp the idea, and when he does he will recommend it. Nothing like it has ever been sold before. Works the same on every individual. Send today for Free Illustrated Circular, containing actual photographic reproductions of this wonderful instrument. The moment you see it you will realize its possibilities. No C. O. D. or free-trial schemes to catch the unwary. This is a plain business proposition that will appeal to you as the greatest opportunity ever offered to those who are weak. Address L. B. Hawley, M. D., 1020 Granite Bldg., Rochester, N. Y.

frill at collar top and as a sleeve finish. One very successful little model which is made both in sheer white batiste and in silk null is upon the Marie Antoinette line with plaited frills down the center front and finely tucked shoulders.

The front frills have their edges cut in deep pointed scallops and then embroidered in tiny scallops with silk of deep blue or green or brown, or rose. Little embroidered dots are set in these scallops and form a border to the frills.

The close high collar is finely tucked and embroidered to match the frill and a little lingerie bow embroidered in the same fashion is set at the head of the frill. The sleeves are rather full and reach well below the elbow, being finished with an embroidered turn back cuff. A cluster of very tiny, horizontal tucks along the inside seam, adds to the shapeliness of this sleeve model.

A Fruit Salad.

Peel the outside spikes from the blossom end of a pineapple cut the top for a lid and scoop out the fruit meat leaving the shell for the dessert receptacle. Mix the pineapple with two oranges, one-half cup fresh English walnuts and cover with a dressing made with the juice of two oranges, two lemons, one-half cup sherry wine and a half-teaspoonful salt, one cup of sugar.

The mixture was replaced in the shell while graceful pieces of parsley were inserted under the lid and further decorated with large red cherries held in the green foliage with toothpicks.

The pineapple was placed in an old-fashioned soup plate, which was filled with parsley and red cherries, while the pineapple spikes, which were cut from the top, were placed around the edge of the plate, making this dessert not only an attractive dish, but a very delicious one. If one does not care to mix oranges with the pineapple, cooked or raw strawberries, bananas or white grapes are splendid with the pineapple. If grapes are used they must be seeded.

For the Housekeeper.

Where hard water is used, if a common marble, not glass, is put in the kettle, it will prevent the flakes of lime from forming on the sides.

When linoleum begins to show wear paint the surface with a good quality of floor varnish and allow it a longer time to dry than would be necessary for wooden boards.

A pair of extra sleeves drawn up on the lower portion of your sleeves and a big bib apron as long as your gown makes it possible to get into the kitchen with a pretty gown on and emerge therefrom spotless and dainty as before.

A useful piece of kitchen furniture is a table covered with heavy tin or zinc. It costs but little and lasts so long. You can always have a nice clean table with little care. No unsightly, greasy oilcloth after preparing meat, etc.

To prevent rust heat the articles well and rub in thoroughly common beeswax. Then rub well with a cloth until the wax is well rubbed in. Knives, iron kettles, or any article which will rust have been kept for years in this manner.

Shrink the Summer Goods. In making the gowns that must withstand the laundress, it is wiser to shrink the materials before cutting them out. Gingham, flannels and betises come under this head, and are very easily shrunken. The gingham are usually put in cold water and soaked for several hours. Put a good amount of salt in the water to keep the colors from running. If the color is in a generous piece of alum in the water will keep the color bright.

The linen may be soaked in hot water, rinsed in cold and hung on the line dripping. Simply rinsing the batiste and drying will shrink it. Sprinkle and iron the material very carefully, so that when the pattern is placed on it there will be no wrinkles. To the inexperienced woman these precautions may seem unnecessary, but after one season she will see the advantage of them.

For the Hostess.

Serving Grapefruit—A new flavor is imparted to grapefruit by sweetening the pulp and chopping lime drops in and sprinkling them through the grapefruit at the last minute.

Fruit in New Ways—Peaches a la Mikado are molded from almond paste,

or mrisipan with peach flavoring. Candied cherries imitate the stone. A pineapple cream, very delicious, is made of meringue flavored with pineapple, made to imitate a slice of the fruit. This is served on a slice of rich cake. In pears a la Lakme a rich cream mixture is poured over thin quarters of the fruit.

Salad for Game—A novel salad to serve with game is made of two small turnips and two potatoes cooked, one slice of pineapple and two bananas, and shredded celery. Mix with mayonnaise, to which is added whipped cream, a tablespoonful of cider vinegar, a little sugar and salt. Cut the vegetables and fruit into fancy shapes, mix with the mayonnaise and garnish with the shredded celery.

Saturday's Menu.

BREAKFAST.
Grapefruit. Cereal.
Escalloped Fish. Fried Potatoes.
Hot Rolls. Coffee.
LUNCHEON.
Creamed Chicken on Toast.
Salad of Spinach and Egg, with French Dressing.

Lettuce Salad.
Bread and Raisin Pudding, Foam Sauce.
Coffee.

Sunday's Menu.

BREAKFAST.
Oranges. Cereal.
Broiled Bacon with Poached Eggs.
Popovers. Coffee.
DINNER.
Cream of Spinach Soup.
Roast Veal with Spiced Currants.
New Potatoes Creamed. Lima Beans.
Cucumbers with Mayonnaise.
Wafers. Cheese.
Rhubarb Pie. Coffee.
SUPPER.
Creamed Flinnan-baddie.
Olives.
Hot Biscuits. Tea.
Stewed Flig and Cream.
Sponge Cake.

The Icebox.

All refrigerators must be used with judgment. Beware of drain pipes discharged on the ground. Clean, soid and sun the refrigerator at least once a week. Dark, ill-ventilated halls are not fit places for the refrigerators. Every day put ice in the ice chamber; a little every day will keep an even temperature, while if this is neglected, much more ice will be required to chill the air current. Food should be carefully looked over and so far as possible placed in covered dishes before going into the icebox. Germs are good friends of an ill-kept icebox and must be continually fought. Hot sal-soda water is ideal for the weekly scalding. Ice should be carefully rinsed before placing in the ice chamber, even though the distilled variety be used.

INVESTIGATED HAYWOOD CASE

Roosevelt Called Upon Department of Justice to Investigate Undesirable Citizens.

(Journal Special Service.)
Washington, May 4.—In his coming letter to the New York Federation of Labor on the Moyer-Haywood case, promised next Sunday, it is understood the president will make it clear that his position as to the undesirability of these men was not taken without an investigation.

It was stated at the department of justice today that the president over a year ago, in answer to a warning from Governor Gooding that federal troops might be wanted in that state, called upon the department for an exhaustive investigation of the whole case including the acts against Moyer and Haywood of which laborites now complain.

Boise, Ida., May 4.—The coming trial of Haywood continues to bring crowds of strangers to this city. Every available room is taken and the authorities say that fully 500 men will be here from Colorado to attend the trial.

The attorney for Haywood this morning filed a motion in the district court asking that an order be made requiring the prosecution to furnish a bill of particulars. It will be argued Monday morning. Moyer, Haywood and Pettibone continue to take daily exercise on the courthouse lawn, but the number of guards has been increased from five to 10.

MILTON AND FREEWATER TRACTION LINE DEPOT

(Special Dispatch to The Journal.)
Freewater, Or., May 4.—Officials of the Walla Walla Traction company state that work will commence next week on the new freight and passenger depot for Milton and Freewater, which will be located at the junction of the O. R. & N. and the Walla Walla Traction company's tracks at Milton, on the Freewater side. The building will be of brick, 25 feet by 45 feet, and will contain an agent's office, waiting-rooms for men and women and freight sheds. It is expected that it will be ready for occupancy in 30 days. The construction of the main line through Milton is being rushed with all possible speed.

Charged With Murdering Parents.

(Journal Special Service.)
Chicago, May 4.—Mrs. Mary Sladek this afternoon was held by a coroner to the grand jury for the murder by poison of her parents, Frank and Mary Mette.

TEA

Is tea generally so bad? It is rather uncertain generally, there is no difficulty in getting it good.

Your grocer returns your money if you don't like Schilling's Best, we pay him.

Stubborn Coughs and Colds

Obstinate racking coughs that settle on the lungs and may develop into Pneumonia over night are quickly cured by

FOLEY'S HONEY AND TAR

It soothes and heals the inflamed air passages, stops the cough, heals and strengthens the lungs. FOLEY'S HONEY AND TAR contains no opiates or other harmful drugs, and is safest for children and delicate people.

Remember the name—FOLEY'S HONEY AND TAR—and insist upon having the genuine, as no other remedy is so safe or as certain in results.

Given Up to Die With Croup.

Mrs. P. I. Cordier, of Mannington, Ky., writes: "My three-year old girl had a severe case of croup; the doctor said she could not live and I gave her up to die. I went to the store and got a bottle of Foley's Honey and Tar. The first dose gave quick relief and saved her life."

Editor Cured of Lung Trouble.

W. L. Straub, Editor of St. Petersburg (Fla.) Times, writes: "When coming across the bay from Port Tampa I got wet and caught a cold that affected my throat and lungs. I neglected it, thinking I would soon recover, but I kept getting worse, until I bought a bottle of Foley's Honey and Tar, and it cured me completely."

Three sizes—25c, 50c, \$1.00. The 50 cent size contains two and one-half times as much as the small size and the \$1.00 bottle almost six times as much. Refuse Substitutes.

SOLD AND RECOMMENDED BY ALL DRUGGISTS
