

# IDAHO PEOPLE AWAIT ROOSEVELT'S ACTION AT PRISON GATES

### Everyone Anxious to Hear Explanation of Condemnation of the Prisoners.

### AGENT OF DEFENSE IS ARRESTED FOR TALKING

### Harry Orchard Will Be Placed Upon the Witness Stand and His Written Confession Will Probably Never Be Published.

(Special News by Special Leased Wire.)

Boise, Idaho, May 4.—President Roosevelt's letter to the Central Federal Union of New York, in which the chief executive is expected to explain and defend his attitude toward Moyer, Haywood and Pettibone, is awaited with interest by the people of Idaho, the prosecution and the defense in the case which is to be tried here next Thursday.

It is known that the president sent some one connected with the department of justice to Boise after Harry Orchard was arrested for the assassination of former Governor Blaine and subsequently confessed to Detective McFarland. No one connected with Moyer, Haywood and Pettibone, the accused miner union officials, knows who the president sent here or when the investigation was made. It was reported at the time that an assistant of the United States attorney-general's staff had been here, talked with Governor Gooding, Harry Orchard and Special Prosecutors Hawley and Borah. On information obtained from the prosecution the president received an accurate report which it is understood from his own utterances form the basis of his adverse opinion, is against the miners.

The trial of Haywood will begin Thursday. Neither prosecution nor defense expects any further delays, and empanelment of a jury will begin just as soon as the lawyers can dispose of the usual preliminary technicalities.

**Hard to Get Jury.**

Senator Borah and James H. Hawley, who will conduct the prosecution, now believe that much trouble will be experienced in obtaining a jury. Many conditions surround this case which will interfere with selecting a jury, no matter how expeditious the court and lawyers might endeavor to be.

In the first place President Roosevelt's published condemnation of Moyer and Haywood has influenced many citizens against the defendants. Governor Gooding's repeated announcement that the men are guilty has prejudiced thousands of other citizens against the men. The executive and constant efforts of the socialist friends of the imprisoned men have influenced a large number of people, and the season of the year will cause many men to evade jury duty.

Next Thursday there will be 28 available taleymen in court. These men have been drawn as trial jurors from the lists of the county. Many of them have already sat in other cases and with prospect of being in custody for three months they are sure to announce objections that will disqualify them. Farmers are in the middle of spring work, and the state officers and the defendant attorneys think the men from the rural sections will declare the formation of opinions that will compel Judge Wood to dismiss them from jury service.

**Business Men Will Evade.**

Here in Boise the average business man will go great lengths to get out of serving on the Haywood jury. The men who are sworn to try the case will be compelled to remain away from their homes and they will not be able to attend to their own business for three months or more.

Boise and vicinity is free from any excitement or agitation resulting from the impending trial. There is less discussion of the case here than in any other section of the United States, and if irresponsible men do not stir up trouble the case will go to trial without a ripple in the peaceful conditions that now prevail.

**McFarland and Debs There.**

Detective McFarland of Denver has arrived and some of the state's witnesses from Colorado, who will tell about the Cripple Creek strike, will be here by the 7th inst. Eugene V. Debs is scheduled to arrive here in the middle of the week. He is expected to write a series of comments on the Haywood trial and procedure in Idaho for a number of socialist papers in the United States.

This afternoon W. M. Yost, a resident

of the county who was employed by the defense to ascertain the opinion among prospective jurors, was held for trial in the district court on a charge of felony.

Yost talked with men who are down as term jurors and asked them for their opinions on the guilt or innocence of Haywood.

He was held before Justice Wood for contempt, and the proceeding was dismissed. Subsequently Yost was arrested on a warrant charging him with attempting to influence a juror. It does not appear that he committed any grave breach of law, as he was doing what scores of agents for the prosecution and defense are doing every day.

The prosecution admits that it has a large corps of detectives at work to find out if any of the possible jurors was too friendly toward Haywood. The attorneys for the defense insist that the holding of Yost is simply a move to deter other witnesses of the miners from pursuing their investigations into the qualifications of the jurors.

**No Corruption Crises.**

So far there are no wild cries that the jury is in danger of being corrupted or bought by either side. That sort of talk may come later. Just now the people of Idaho are of one opinion, and that is that the accused men should be given an immediate trial, that they have been held too long in jail without a chance to vindicate themselves.

Up to this hour the defense has no definite knowledge of the character and mass of testimony the state will put in against Haywood. Of course, it is known that Orchard is to be the chief witness for the state. As some parts of his confession have already been annihilated, it is largely a matter of speculation how far he will go in trying to fix the numerous crimes upon the officers of the Western Federation of Miners.

Orchard will be placed on the witness stand and his written confession which was given to Governor Gooding and Detective McFarland will probably never be made public.

### NAME PUT ON BALLOTS

(Continued from Page One.)

Major Lane has not yet indicated that he will accept the nomination which has been forced upon him. When informed late last evening of the vote he said:

"I am very grateful to my party and I esteem the nomination a great honor. I wish to thank my loyal friends for their efforts in my behalf."

George H. Thomas, who was Lane's only competitor for the nomination, made an address several days ago in which he invited Democrats who desired Lane as the nominee to voice their preference at the polls, saying further that he would loyally abide by the result. In accordance with this declaration Mr. Thomas called at the mine office last night and left the following communication:

**Thomas Will Support Lane.**

To the Democratic Voters.—The issue of this campaign as to candidates terminated at the primaries and resulted in the nomination of Dr. Harry Lane for mayor on the Democratic ticket.

At this time I wish to state, in harmony with my previous declaration, that I shall support Dr. Lane if he shall accept the nomination, and as chairman of the Democratic county and city central committee I shall do all in my power not only to elect Mayor Lane, but to elect every other candidate on the Democratic ticket.

"I shall urge the committee to the utmost diligence in gathering together the Democratic forces of this city and thoroughly organizing the same for the purpose of making the most vigorous and insistent Democratic campaign for strictly Democratic principles and Democratic candidates that this city has ever known, in order that the citizens of this city will be so imbued with the necessity for embodying Democratic ideals in our institutions and government, local, state and national, that in the future no Democrat in this city or state need be ashamed of the fact that he is a Democrat or feel the necessity for apologizing therefor.

**All Pull Together.**

"Fellow Democrats, let us in this campaign seek to build up the strongest possible minority party. Let's have done with fusion and be Democrats on principle. The greatest safeguard of a people's rights is the ability of the citizens to shift the power. Such a minority party will hold the dominant party in check and so enable the citizens to shift it. My appreciation of the support given me at the polls today is complete and I thank those who voted for me for that support."

### American Jean Valjean Resided Within Twenty Miles of Leavenworth for Seven Years.

### PASSED AMONG MEN WHO WERE LOOKING FOR HIM

### Would Never Have Been Discovered If He Had Not Been Spotted by a Fellow Convict Who Gave Him Away for Sake of the Reward.

(Publisher's Press by Special Leased Wire.)

Washington, May 4.—The astounding fact developed here today that William January, the American Jean Valjean, now awaiting the promised executive pardon, resided for seven years within 20 miles of the Leavenworth (Kansas) prison from which he escaped nine years ago and to which he has just been returned.

January escaped in the night with a fellow convict, while a guard was asleep. He beat his way on a freight train to Wichita. He secured employment in a stone quarry at Winfield, where he remained until the death of his companion three months later. He was a drummer through Oklahoma, Kansas and Missouri for a coffee house, took up the insurance business in Kansas City, then peddled coffee on his own hook and finally settled down in the restaurant business in the latter city, after having been employed for a while on the Metropolitan street railway.

Although operating under the eyes of the prison authorities working on a street railway that carried them and conducting a restaurant business at the junction of this line and the electric line to Leavenworth which was used by the prison officials, he was never recognized until the other day when a fellow convict spotted him and informed the authorities in order to collect the standing reward, not daring by the government for escaped prisoners.

The papers in January's case are ready for the signature of the attorney-general.

### COUNTERFEITER WENDT RECAPTURED BY GUARDS

(Special Dispatch to The Journal.)

Tacoma, Wash., May 4.—Herman Wendt, the trusty who escaped last Sunday from the penitentiary on McNeil's island, was captured this morning on the opposite side of the island by Guards Hamilton and Smith, who had been patrolling the beach for six days. They came upon Wendt concealed in a clump of bushes. The convict made little resistance, as he was weak from his six days of hiding. Not daring to light a fire to cook any small game he might have captured, the man was almost starved. The strict patrol on the beach prevented him getting away in a boat or on floating timber.

Wendt was sentenced to three years for counterfeiting last summer at Seattle.

### SET OF FALSE TEETH SAVE MAN FROM PRISON

(Publisher's Press by Special Leased Wire.)

Cleveland, Ohio, May 4.—The timely arrival of a set of false teeth saved Joseph Lowe, aged 84, from the work-house today.

When Lowe was booked at the central station for vagrancy Friday the teeth dropped out of his mouth. Not daring to keep the sergeant explained to Lowe as he looked up the set of teeth. Lowe started to protest his innocence but could not talk intelligently. He stammered and stammered, but could not talk. "The man is best in the workhouse," said the judge. "He can't even talk."

Just then the teeth appeared from the property room in the hands of court officers. Lowe joyfully inserted the teeth in his mouth and told his story. He was discharged.

### FIREMAN OVERCOME BY GAS FALLS TO DEATH

(Special Dispatch to The Journal.)

Butte, Mont., May 4.—One of the most peculiar accidents in the history of the Great Northern happened this afternoon near Craig, when A. C. Wall, a fireman on a freight train, dazed by the gas in a tunnel from which the train had just emerged, tottered off the cab into the Missoula river and was drowned. The cater flow close to the track at the mouth of the tunnel and the current is so swift that Wall was swept out of sight in a twinkling.

### MILLS RULED OUT OF SOCIALIST PARTY

(Special Dispatch to The Journal.)

Seattle, May 4.—Walter Thomas Mills was ruled out of the Socialist party tonight for heresy. It appears that in British Columbia Mills supported the labor candidates. The state convention spent the day in discussion. At midnight organization was all that had been accomplished.

### AUTO NEWS AND NOTES

(Continued from Page Thirteen.)

flagration the roof is so constructed that on the outbreak of fire six tons of sand will be dumped into the building, thus smothering the base of the ones.

Order your foreign car of the local agent or importer. Take delivery abroad. Have it meet you upon arrival at some European port. The moment you leave the steamship you begin your foreign tour. That is the correct thing now in Europe, touring by American automobiles—unless, of course, the American takes across his own American car.

Steps toward the standardization of tires have been taken by the mechanic local branches of the Association of Licensed Automobile Manufacturers, which has recommended the adoption of the following 11 sizes as standard: 28x3, 30x3, 30x3 1/2, 32x3 1/2, 32x4, 34x4 1/2, 36x4, 36x4 1/2, and 38x5. Hereafter there were 13 different sizes of tires on the market.

The Interstate Good Roads association has been formed in Pennsylvania, to see that the provisions of the present general and local road laws are carried out, to encourage and compel officials to perform their duties as prescribed by law, to see that roads are kept free from loose stones, mud holes and ruts and that they are properly drained and graded. Branches are being formed in several eastern states.

### CAMERON IS NAMED

(Continued from Page One.)

2,492; Fred T. Merrill, 2,654, and Horace G. Parsons, 2,219.

In the contest for nominations for the different positions in the council from the wards some close voting was noted, as well as some where the margin was not so close. The votes cast in the different wards was as follows:

First Ward—R. A. Preston 209, W. A. Storey 142.

Fourth Ward—George L. Baker 539, Rufus C. Holman 464.

Fifth Ward—W. I. Cottell 692, J. F. Boothe 515, W. C. Puffer 24.

Sixth Ward—H. A. Belding 401, John M. Mann 190, Charles H. Piggott 12.

Seventh Ward—Frank S. Bennett 694, George F. Erice 474, Fred J. Brady 250, J. M. Kelly 92.

Serene in Defeat.

The election was a quiet one and the result will be that the defeated candi-

dates, with perhaps one or two exceptions, unite in the support of the ticket which has been nominated. A meeting of the city central committee will be held tomorrow night in the Seiling-Hirsch building for the purpose of organizing for the campaign. All of the candidates have pledged themselves to support the ticket with the exception of John B. Coffey and H. G. Parsons, who have not refused, but are expected to fight the nomination of Mr. Devlin. Mr. Devlin is much pleased at his success. Last night he expressed his gladness in unbounded terms, praising those who had supported him with many words.

"I wish to thank my many friends throughout the city for their indorsement and for the evidence of esteem and confidence which is carried by the splendid vote given me," said Mr. Devlin last night. "I am very grateful for the tribute of respect given me by the people at the polls and if I am elected I will try to show the people of the city that they did not err in choosing me as

the executive head of the city government."

**Merrill Says Vindicated.**

"I am satisfied, although starting late, 2,657 people (mostly the common people) thought I would be a good councilman," said Fred T. Merrill. "There were two reasons why my name did not head the list. First, a small vote on the west side, and a larger vote on the east side. Second, if my name was A. A. Aaron I would have beaten out Annand, Cellers or Blair, that alphabetical law is a bad one. I saw a dozen men putting their crosses opposite the first three names. Good men were elected, however, and I will support them at the regular election."

### IMMENSE LOG RAFTS FOR SAN DIEGO MILL

(Special Dispatch to The Journal.)

Astoria, Or., May 4.—The Oregon Logging company will tow three log rafts from Clatskanie to their mill at San Diego in early next month. The rafts will contain over 10,000 tons of logs and lumber. They will be towed before the end of August, and after that time severe storms are feared. The danger of losing the rafts is very great.

"As Comfortable as an Old Shoe"

originated with wearers of cheap shoes. They expect new shoes to hurt and consider this preliminary torture one of the things that goes with shoe-buying. The fact that a shoe should feel like an old one when it is new—should be as comfortable the first day it is worn as the last—is unknown to them because they have never felt the luxury of putting on a rightly-made shoe. The difference between a

## Hanan Shoe

and the other kinds is in the fit—the shape of the shoe—that kind of shoemaking skill which enables the shoe to adapt itself to the foot—not the foot to the shoe.

The Hanan last is just like the human foot, because the human foot is used as a model. A preliminary last is designed; shoes are made on it and tested for weeks. If they pinch, or bind anywhere, the last is changed and new samples made and tested. When the shoe fits perfectly—no wrinkles, no tight spots, no loose spots—then the last goes to the workrooms. It's expensive, but it's the only way to produce a smart, stylish shoe which will fit perfectly and be absolutely comfortable.
