WHEAT

ADVANCES SHOWN IN ALL AMERICAN MARKETS DUR-ING THE PAST SIX DAYS

#### IN THE FINANCIAL WORLD

ORIENTAL DEMAND NEVER SO HEAVY AND EXPORT VALUES ADVANCE AGAIN

FLOUR

### FLOUR DEALS ARE ENORMOUS

Sales to Orient Break All Records and Millers Refuse Many Orders.

By Hyman H. Cohen, Week's market features: Inormous deals in flour, ensational wheat advances, treamery butter gains firmness, trorbitant figures for poultry, legs steady, with atorage demand, lighting new tish licenas, 'otate market not very had, lation season is at an end. on season is at an end.

p men are much discouraged.

ir in creamery butter appears
lamook checks demand heavy.

Enormous Deals in Flour.

There was a continuance of the enormous export flour demand during the week just ended. Instead of the volume showing contraction, there was a notable increase in the orders cabled from the other side. From all paris of Chius and Japan and from Russia the demand is the greatest in history. While the Journals are not buying as much flour at this time as they did when making preparations for their war with Russia, it was not that fault that the volume of business, was not so great. They wanted the flour, and cabled the orders all right, but millers here and elsewhere in the United States were in no position to fill them. This was especially true when it came to orders for early delivery. According to a prominent miller of this city his mills could easily have sold all the fill it expects to manufacture during the next six months within the past six days.

Flour Is Getting Rather Scarce.

Thour is Getting Rather Boarce.

Ithough the price of export flour has added to \$5.55 and \$5.65 per barrel during the few days, that did not stop the orders coming. A Japanese cable received on my makes a firm offer for 5,000 barrels of at \$3.65 a barrel, but the order was id down, because millers could not fill it. W weeks ago millers would have been very to have sold all their product at \$3.55 xport, but now they are forced to refuse of \$3.65.

Central America a Heavy Buyer.

Central America is a heavy buyer of flour, this time, and a large per cent of the orders an there are turned down. However, they a more generally filled than are the Orientaliers, because there is a better demand in that many for our straight brands. While some dea better them the usual export brands been going into the Orient of Isto, owing the ecormona demand and the scarcity of regular quality, the trade in general on other side has not yet been willing to pay advanced figure which would allow the ment of local grades.

this time conservative estimates place the spormous demand and the scarcity of regular quality, the trade in general on other side has not yet been willing to bay advanced figure which would allow the pment of local grades.

At this time conservative estimates place the amount of whest in the entire Pacific threat—the kind available for milling—at mount of whest in the smallest amount when trades are the great strongth in the local values, account of the great scarcity of wheat, no of the great scarcity of the smaller millers have been forced. on account of the great carrier of the smaller millers have been forced to close their institutions, and few mills outside of the larger ones will be in operation the latter part of the present month. This is the reason why bluestem has jumped to 80c a bushel in the local market, and any kind of milling wheat is worth within 3c a bushel

that value.

Exorbitant Figures for Poultry. Exorbitant Figures for Feultry.

During the past week very exorbitant figures were paid for fresh poultry by the local trade. In some instances live hens sold as high as 18c a pound. This figure is so high, however, that the trade was not quite so anxious to purchase at the close of the week, and some concession in price was made. While the trade at this time is largely in eastern dressed stock, there is always a good demand for live local birds.

local birds.

With very heavy storage demand, the egg market acted somewhat better the latter part of the week and prices held stationary. At the first of the week receipts were so heavy that even with the heavy cold storage call the market did not clean up, and this resulted in a decline in value. a decline in value. It has been many days since the local choose

It has been many days since the local choose market was so firm and high at this time of the year. Receipts from Tillamook are quite fair, but demand is that much better than before the shipments arrive, they are already sold. The arrival of some fair-sized shipments from California helped to fill the demand somewhat, but the California article is a very poor substitute for the Oregon product, and the trade is waiting for more home shipments. Fighting New Fish License.

ments.

Fighting New Fish Liceuse.

Just whether the master fish warden will enforce the law according to the letter and charge all handlers of salmon an annual liceuse, is what is worrying the local trade codesanably. Fish desiers say they are unjustly discriminated against in the matter of paying liceuse for the selling of fish, and now they propose to force the retail grocers, if possible, to pay a fee to handle canned salmon. It is stated by the fish men that the liceuse law does not state any particular kind, and that all handlers of salmon fish must pay the fee. Attention of the master fish warden has been called to the matter by a local whole-saleer, but thus far he has received no reply. In any event, the retail grocers are they do not propose to pay the liceuse, no matter what course the fish warden pursues, and that all the machinery of the state association will be great to balk the plan. Then again the fish designs may that unless all salmon handlers pay the liceuse they will refuse, preferring to take the matter to the courts because of alleged discrimination.

offers of \$3.05.

The demand for flour is not only heavy from China and Japan, but Siberia is in the market. The Russians have sold considerable wheat his measure it was located on the other side of Siberis, where it was nother side of Siberis, where it was nother side of Siberis, where it was not wanted. To bring it to the Pacific side would cost such a high freight rate that it was found cheaper to well the wheat to Europe, and then retury from the United States. This maying demand for both wheat and flour from Siberia is several times as great as the volume of wheat sales made by that country. Latest sabled advices from Russia say that the bands is much worse than first expected, and it is now a certainty that the United States fill be asked to feed the starving until the ext crop is ready for harvest. Even then it not at all certain at this time whether he Russians can take care of themselves, because trop prospects are very poor there.

Central America a Reavy Buyer.

Central America is a beavy buyer of flour this time, and a large per cent of the orders from there are turned down. with other stocks. It is also to be remembered that the validity of a holding company to take over stocks of competing lines was dealed for all time in the Northern Securities decision. While the case of the Union Pacific is not the same in that many of the securities owned are those of non-competitors, it is difficult to see how the Union Pacific could turn over to a holding cenceral its interests in the Southern Pacific and the Atchison without violating the decision in the famous merger suit.

Summing the outside factors in the week's security movement, those which have operated against the market seem stronger in the aggregate than those which have worked in its favor. In the face of this the market owes its buogancy chiefly to the solidity of the conditions within itself, to the fact that it was thoroughly liquidated in the great decline in March and to the fact that prices, according to all accepted measures, were very low.

Some offset to these adverse influences has, on the other hand, been affected by the rise in the copper metal to the highest price in years and adds strength to the present condition in the steel trade. Steel corporation made a most impressive statement for the March quarter, and it was explained that had it not been for the great floods towards the end of the winter, which crippled the plans in that vielnity for several weeks, the net samings of the company would have surprised all previous company would have surprised all previous records.

A more powerful incentive to epeculative buying were the rumors of a new financial plan for the Union Pacific, which would involve the segregation of the company's investment holdings in a new company, the stock of which would have been offered to Union Pacific stock-bolders in such a war as to yield valuable sub-

scription rights. Whether there is any foundation for these reports may be greatly doubted. There was cause enough for the special rise in Union Pacific merely in the fact as a security reasonably sure of maintaining its 10 per cent dividend, it was selling too low as compared. reasonably sure of maintaining its 10 per cent dividend, it was selling too low as compared Total sales for the day, 851,900 shares. #### SALMON RUN IN ROGUE SMALLEST IN YEARS

(Special Dispatch to The Journal.)

Grants Pass, Or., May 6.—The run of salmon in Rogue river this winter and apring has been the smallest for years past. The catch of late is better, and fairly good shipments are being made from this place. The unusual number of freshets in the river this past winter is one cause of a shortage of fish, but the principal cause is the excessive fishing for years past and taking of vast quantities of salmon eggs each season that are shipped to the Clackamas and other batcheries, and when hatched the young fish are turned loose in other streams than Rogue river.

That salmon fishing is an important industry for Josephine county is shown by the value of the fish shipped from Grants Pass in the last two years, the salmon expected to exceed \$20,000 for 1907. The shipments were formerly made by local dealers, but last fall the fishermen organised the Rogue River Fishermen's union, and now ship their fish, which are sent in fee to the Portland and San Francisco markets, commanding a good price, as the Rogue river salmen can hardly be distinguished in size and flavor from the royal chinock of the Columbia river. The union now has 49 members, which embraces all the fishermen of Rogue river shove the Coast mountains. The officers of the union are H. Croisant, president J. H. Rimer, vice president; J. L. Coburn, secretary; L. L. Jewell, treasurer; Edward Magone, business manager.

Trout fishing, both in Rogue river end in the meuntain streams, is good this spring, and fine catches are made by the lovers of this sport.

#### ALL CONDITIONS FRUIT CROPS FAVORED BULLS NOT DAMAGED CAUSES CO

Wheat Price All Over the World Late Investigation Shows Frost Livestock Trade Wonders When Advances on Unfavorable Crop News.

The Chicago wheat market, in company with almost every market in the world, made san-sational advances in the price during the past week. The unfavorable crop conditions all over Europe and the possibility that a large per cent of the usual Canadian acreage will go unseeded because of a late sea son, were the helpful features that put up the price. Ameri-can conditions were not im-proved and the report of Crop Expert Snow confirming the former damage did much to

CHICAGO WHEAT VALUES.

the victory of the bulls

Corn Market Heavy.

Corn was no more active than it has been, and with all the delay in planting the market was beavy. The weakness did not prevent any change in the general situation and merely reflected the manuvars of the landers in the market, who do not want a strong advance so early in the month—for the May month more particularly. Local receipts were 254 cars and shipments bence 316,000 banhels. Liverpool reported futures 154 higher. Senboard clearances were 818,000 bushels against 208,000 inst year. Estimate of Monday's local receipts was 263 cars. The market maintained the sesy feeling with which it started and at the close May. July and September futures were each 15c lower.

lower. Oats Price Suffers. Offerings of oats in the early part of the session exceeded the demand considerably and wrought corresponding damage to the price. May, however, was the principal sufferer among the options. The declines in the later deliveries were not very material. Tendency of prices after the early decline was to recover the loss. Estimate of Monday's local receipts was 250 cars. Local receipts for the day were 240 cars and shipments hence 175,000 bushels. and shipments hence 175,000

Lard Domand a Help. Ensiness in the hog market as reported from the pards caused some little weakness in the products at the start, but there was a gradual products at the start, but there was a gradual recovery, due mainly to the improvement that developed in the demand for lard. Todan's receipts of hogs in the west were about the same as last year's, but for the wesk were 80,000 larger. Local receipts for the weak were 143,000 against 139,000 the atmilar week last year. Estimate of Monday's receipts was 40,000, with 145,000 for the week.

to Be a Good Thing-Wheat Looks Well.

By Hyman H. Coben.

After all is over, practically no damage was done the fruit crops of the Pacific northwest during the past week. The frosts which were said to ruin most of the fruits, were blessings in disguise. Many believed for awhile that the cherry crop was ruined, because most of the blossoms bas disappeared. Later investigation showed that most of the blossoms were turning into fruit and were not at all hart by the changed weather. Grangers report that had not some of the blossoms dropped off the trees would have been breken later when the fruit developed, so heavy were they laden.

Wheat crop prospects in the Pacific northwest are quite good. The past week showed the necessity of more rain in some sections, while in other sections the moisture was well distributed. Spring work is still continued in some districts, and has been retarded somewhat by the lack of moisture.

In the wheat being of the middle west and the southwest much damage was reported during the week by cold weather. According to latest reports the weather is changing and reins are reported in many sections.

BROADUS WILL TELL OF EASTERN POTATOES

W. S. Broadus.

Believing that there will not be sufficient amount of potatoes remaining in this state or on the Pacific coast to supply the trade until the new crop is ready for market, W. S. Broadus, a local shipper, left the latter part of the week for Wisconsin where he expects to study conditions. He will make reports for The Journal.

St. Louis Wheat Market. St. Louis, May 4,-Wheat close: May, 7814c. Kissing the Book.

From the Cornhill Magasine.

The exact origin of kissing the Book in English courts, though modern, is obscure. It is not, I should say, a matter of legal obligation, but seems to be merely a custom dating from the middle or and of the eighteenth century. If a witness claims to follow the law according to Coke and to take his "corporal oath" by touching the Book, who shall ding to Coke and to take his "corporal oath" by touching the Book, who shall refuse him his right?

The "kissing" act seems akin indeed to what the "fancy" call, somewhat un-pleasantly, a saliva custom, which in modern western life exists in very few forms, though many of the lower classes

Of radiant promise spoke forevermore.

Go thou and list, as did that sightless one.

With closed eyes, and thou, like him, shalt know

The sound of irremediable wee;

Likewise, forecoth, there shall be borne upon

The hearing, with triumphant overflow,

The joy of life in golden antiphen.

King Edward VII is eaid to be a firm believer in union labor. When he was yet the Prince of Wales he frequently with the cause of unionism. Since he became king he has a low capture and the lord of the shall be borne upon

Likewise, forecoth, there shall be borne upon

The joy of life in golden antiphen.

Kiamath Falls people are taking steps to be suffered to be a firm believer in union labor. When he was yet the Prince of Wales he frequently with the cause of unionism. Since he became king he has a low capture and the short of the short o

# LACK OF SHEEP

Supplies Will Increase-Rais-

ers Will Not Sell.

Portland Union Stockyards, May 4-took receipts: Ontrie. 558 184 

large concern could take care of. This compared with arrivals of 844 head a week ago and 2,588 head for this same week in 1904. Both a year ago and in 1906 during this week the run of sheared sheep into the yards was very likeral. During this same week in 1903 2,768 head arrived in the yards during the six days. The lack of sheep arrivals is keeping the trade here guessing as to what will happen with sheep prices when sheep are usually scarce. During the past week only a few head of sheezed sheep came in, alterning not yet being in tull swing.

The livestock trade is changing its opinion of the amount of sheen that will come to market after shearing. Some time ago it was balleved that the only reason why sheepnirm were withholding their stock from market was to keep them for shearing time and take advantage of the good price for wool. It now develope that a large per cent of the sheep and lambs which were to be sold have already changed hands, the transactions taking place some months ago when the eastern trade foresaw a shortage in supplies.

Sheepmen Won't Sell Stocks.

Sheepmen Won't Sell Stocks.

These sheep not already sold or contracted for will not likely be placed upon the market, for at the present price of sheep and wool sheepraleers want to go into the business out a larger scare and are going to keep all their During the past week the run of hogs totaled 415 head as against 383 head last week, 416 head a year ago and 658 the previous year. Hogs were very firm in price all through the week, but values showed no change. Cattle were firm all week with arrivals con-siderably larger than a week ago. Despite this the trade took all that came and prices of last week were easily maintained.

week were easily maintained.

Conditions a year ago: All markets were weak except hogs, the latter advancing 10c.

Cattle lost 25c and sheep the same amount. A year ago the arrivals of lambs were very heavy.

Official livestock prices:

Hogs—Best eastern Oregon, \$7.00@7.25;

stockers and feeders, \$7.00; China fats, \$7.00.

Cattle—Best eastern Oregon eteers. \$5.00\$

\$.25; best cows and helters, \$4.00@4.25; stockers and feeders, \$4.00@4.25; bulls, \$2.50.

Sheep—Mixed, \$6, 604c; lambs, 7638c.

Arrivals of the Week. past week:
Sunday—B. Wing of Eugens came in with a car of cattle; E. F. McGee brought in horses, which he shipped to Seattle.

Monday—Mr. Irwin came in from Payetle, Idaho, with a carlead of hogs; Beckley Broshad in two cars of sheep from Drain; Lacay Bros, had in two cars of cattle from Arlington; John Hill brought in a car of cattle from Payette, Idaho; G. L. Shamons came in from Payette, Idaho; G. L. Shamons came in from Huntington with a car of horses, which he shipped to Montesano.

Tuesday—J. E. Zeigler of Gervals was in with a car of sheep and hogs mixed: F. H. Following were the arrivals in the yards

with a car of sheep and hops mixed;
Ferguson of Amity brought in a load of
Wednesday—George W. Warren of W
ton sent in two cars of cattle; Henry
came in from Colfax, Washington, with
of hogs, also one of cattle; William Ni of hogs, also one of cattle; William Nish and in horses, which he sent to Tacoma; S. L. Overton of Brownsyills had in a car of hogs; G. D. Burdick of Salem passed through the yards with a carload of mich cows, which he shipped to Seattle.

Thursday—J. E. Calder came in from The Dalles with two cars of cattle, going to Montesano; F. M. Duby passed through the yards with a carload of horses, going to Contralin; A. P. Hunt sent in two cars of cattle from Merced, California, going to Tacoma; B. F. Hynd of Heppmer had in a single deck of stock sheep.

sheep.
Friday—O. D. Jones brought in six cars of cattle from Huntington; C. X. Larrabes brought in four cars of borses from Alder, Montana; Louis Marchant drove in a bunch of milch cows, which he shipped to Ashland, Oregon.

LAMB CROP IS SMALLER

Increase Is Only 75 Per Cent, Owing to Unfavorable Weather.

(Special Dispatch to The Journal.)
Shanko, Or., May 4.—Sheepmen in this locality report an average increase of only about 75 per cent to their flocks this year. This is a fair increase, but not near what it would have been had the weather conditions been more favorable last fail and winter. The lour cold day weather in the fail prevented grass from growing, the lack of which retarded sheep to such an extent that they were in very poor condition to stand the exceptionally cold weath-

to such an extent that they were in very poor condition to stand the exceptionally cold weather and bad storms of last winter. Consequently a large percentage of sheep did not bring lambs that would have done so had the weather conditions been more propitions. Many lambs were also lost during the storms of the early lambing season, so that the average increase is rather lower than usual.

Professional sheepsbearers are straggling in and it is expected that shearing will soon be in full blast. Some of our most progressive sheepmen have installed machine plants on their ranches. It is claimed a larger percentage of wool can be obtained by these machines than by the old primitive method of shearing by hand, though the professional sheepshearer will rather exceed the machine in speed.

It is estimated by conservative sheepmen the wool from 500,000 sheep, aggregating nearly 5,000,000 pounds, will be marketed at this place this season. If anything like last year's prices prevail this will mean the advent of several sang little fortunes to this community.
