

# DAY'S MARKETS

## GRAIN PRICES HIGHER

### Shortage in Supplies Forces the Local Wholesale Value to Ten Cents.

Today's market features: Salmon price advanced. Strawberries going lower. California cabbage higher. Mexican avocados lower. Creamery butter holds well. Apples in good supply. London offers bid for hops. Eggs and poultry hold.

### Salmon Scarcity Causes Advance.

There was an advance of a cent this morning in the price of fresh salmon along Front street. The rise in value was due entirely to the general shortage in supplies and the greater demand. The scarcity has caused the wholesalers to pay a higher price for their fish to catchers, so this forced the local advance. (Check salmon prices for this time of the year with the season open for fishing.)

### Local Dealers and Cannery Buy with Care.

Local dealers and cannery buy with care never seen a season before. The catch to date has proven so small that only a few of the season's crop are available. Even those are catching only a small amount of fish; the small catch volume has known for many years. On this account three weekly catches all the year around. This would enable the fish to get to the spawning ground at all times, as the season is so long that the fish are not so much interested in keeping up the hatcheries as they are. In the meantime no stores are being taken to catch from local hatcheries and wholesale fish men are wondering how matters will end.

### Strawberries Going Lower.

Most Front street houses carried over straw- berries from last season. The very early arrival of the southern train. This forced a large amount of berries on the market today, three days' surplus being displayed. As a result the Saturday stock was found to be unmarketable for selling this morning. On best California the price is down to 3 cents a crate today. Local strawberries are in good supply. The market is in good condition. This caused a drop in the price this morning, best stock going at 25 cents a box.

### London Offers Low Price for Hops.

Cables from London regarding the hop market show a very decided weakness in the hop market here. Eastern demand has been so dull of late and so low prices have been offered for Pacific coast hops that most dealers are trying to find an outlet on the other side. However, at this time the best offer that can be received for hops is from London. At this figure growers would not even talk to dealers, so no business has as yet resulted.

### Grain, Flour and Feed.
