UNIXAMPLED PLOW OF TRADE AS SHOWN IN IMPORTS AND RX-PORTS AND INTERNAL REVENUE, SIVES THE LIE TO MARD TIMES CROANING OF BOCKEFELLES. HILL AND BELMONT.

BY GILSON GARDNER

(Special Dispatch to the Sun.) Washington, April 25 .- In spite of the hard times croaking of Mesers. Rockefeller, Hill and Belmont, the official government statistics in regard to imports, exports and the internal commerce of the country continue to show nothing but great prosperity. The month of March was a record-breaker. With one exception-namely, the nonth of December, 1906—the imports of March were greater than any single month in the history of the government. They reached \$183,323,085 in val-

Exports likewise have been on the \$162,639,650. Cotton has been the rec- packing house conditions some months ord-breaker. The total of cotton sent abroad during March, 1907, sold for \$48,893,647, as against \$26,832,841 for the month of March, 1906.

United States treasury show also a steady increase in the customs and internal revenue receipts. The total receipts for the month of April up to and including the 12th, were \$22,264,617.12. For an equal number of days during in the internal commerce movements 504.13. This shows that, in spite of the slump in Wall street stocks the aver-age population is buying the same num-ber of cigars and drinks as aforetime.

The total receipts of the governmen from customs, internal revenue and miscellaneous sources for the present fiscal year dating from June 30, 1906 were \$514,110,685.08, as compared with \$465,734,246.16 for a similar period last year. There has been an excess of receipts over expenditures, which has accumulated in the treasury a surplus of \$52,070,911.53.

Reports to the Department of Com-merce and Labor show that the only place where there has been any decline —and this is only a very slight one—is for February, 1907, February shipments of packing house products from Chicago were 208,604,396 pounds, a slight loss as compared with the shipments during February, 1906, of 214,274,342 pounds. ue. Yesterday the press printed interviews with John D. Rockefeller and At gust Belmont, in which they said that they feared hard times. In strong centrast to their attitude is that taken by the following captains of industry, who are in the thick of the industrial battle of today:

#### BETTER TIMES EXPECTED IN WEST BY ARMOUN

Indications in western country, at least, are for better rather than hard times. There have been good crops and labor is all employed. I see no need for alarm. I do think, though, that when we get up to zenith of high prices and conditions as they exist today that retrenchments are bound to come. (Signed.) CHAS, W. ARMOUR.

President Armour Packing Co., Kansas City, Mo.

#### BUSINESS LOGIC DOES NOT JUSTIFY HARD TIMES

The logic of business does not justify predictions of hard times. The elements of the situation are big crops, future orders for six months ahead of industries, banks highly prosperous, railroads and stocks hard hit and the presidential election which may cause worry. Logically there is no cause for apprehension, but sentimentally there may be because of the two latter fac-

If labor continues to be employed and the crops are good, business cannot destroyed. That is the key of the whole situation. J. G. SCHMIDLAPP. (Signed.) airman Directors, Union Trust & Savings Co., capitalist and manufacturer, Cincinnati, Ohio,

#### NO CHANGE IN 1908 IN STOVE INDUSTRY

I do not believe there will be any radical change in our industrial condi-tions in the immediate future. The year 1907, in my opinion, will be an un-paralleled one in point of prosperity, and the year 1908 will see no diminution of the industrial activity.

#### STEEL MILLS RUSHED WITH ORDERS

Our business extends throughout every district of the United States,

never have we been so pushed to supply the demand. We have found that the factories and other concerns of the country are so rushed with business that they cannot do the work assigned them, and we are the same here. I cannot imagine a more prosperous season or a finer outlook. HARRY SCULLIN, (Signed.) President Scullin-Gallagher Iron & Steel Co., St. Louis, Mo.

### NO REASON TO EXPECT REACTION--OLIVER CROSBY

#### CORTELYOU-RIDGELEY SAY BANKERS OPTIMISTIC

"I have bankers in my office every day and find no apprehension amo them of any danger of widespread or even temporary business depression. Most of them say they look for no letting up of business in their districts at all." This statement was dictated by Wm. D. Ridgeley, controller of currency, and was given by him to the Washington representative of this newspaper after it had received the approval of the secretary of the treasury, George B. Cortelyou. Mesers. Ridgeley and Cortelyou were asked for an expression commenting upon recent predictions by prominent American capitalists that the country was facing a siege of hard times.

The scale of wages adopted a year ago, covering a period of two years, insures a continuance for another year of the present friendly relations between the employer and employes. It has enabled coal companies to make contracts with the consumers at a remunerative price and guarantees them their supply, which in turn has given them the opportunity of contracting ahead to deliver their manufactured products.
